

AFB, beginning October 2007, as the new mission for that base. The EIS will analyze the impacts of that proposed action on the environment. AFSOC is considering what aircraft and other equipment to base at Cannon AFB, how best to utilize existing facilities, and what facilities will need to be modified or built. The proposed action will consider moving approximately 90 aircraft and approximately 3,500 personnel to the base. It is possible that additional facilities may need to be constructed at Melrose AFR. The impacts from the proposed actions will be considered in the EIS. In addition, the EIS will also address alternatives to the proposed action, including a "no action" alternative. Because the proposed action is to be taken as the result of the BRAC directive to the SECDEF to designate a new mission for Cannon AFB, the basing/installation alternative will be limited to the confines of Cannon AFB and Melrose AFR; however, the airspace alternatives will include Melrose AFR, surrounding Military Training Routes and Military Operations Areas (MOAs) including the Mt Dora MOA, Pecos MOA Complex and Bronco MOA.

DATES: The Air Force will hold a series of scoping meetings to solicit public input concerning the scope of the proposed action and alternatives, as well as to help identify other concerns and issues to be addressed in the environmental analysis. The scheduled dates, times, locations, and addresses for the scoping meetings are as follows:

1. September 18, 2006—Monday, 6–8 p.m., at Clovis and Portales, NM, Clovis Community College, 417 Schepps Blvd.
2. September 19, 2006—Tuesday, 6–8 p.m., at Clayton, NM, Clayton High School, 323 South Fifth Street.
3. September 20, 2006—Wednesday, 6–8 p.m., at Fort Sumner, NM, Fort Sumner Community House, 137 East Baker Avenue.

No additional meetings are scheduled at this time. In addition to comments received at the scoping meetings, any written comments on the scope of the EIS received at the address below by October 5, 2006, will be considered in the preparation of this EIS.
