Under this alternative, the refuge will continue to seek acquisition of lands within the present acquisition boundary. Lands acquired as part of the refuge will be made available for compatible wildlife-dependent recreation and environmental education opportunities, where appropriate. Lands that provide high-quality habitat and connectivity to existing refuge lands will be priority acquisitions. Equally important acquisition tools to be used include: transfer lands, partnerships with conservation organizations, conservation easements with adjacent landowners, and leases/cooperative agreements with state agencies.

Public comments were requested, considered, and incorporated throughout the planning process in numerous ways. Public outreach included open houses, public meetings, technical workgroups, planning update mailings, and **Federal Register** notices. During the draft comprehensive conservation plan/environmental assessment comment period, the Service received several comments, which were incorporated, when appropriate, and responded to in the comprehensive conservation plan.
