There are eight reporting requirements in this information collection. They are: (1) Applicants in the specific categories of 800

Specialized Mobile Radio (SMR) spectrum may request an extended period of time within which to construct their radio systems provided that they demonstrate such additional time is needed and provide a timetable for completing such construction; (2) licensees authorized to use a specific block of 800 MHz SMR frequencies within one of 175 Economic Areas (EAs), must notify the Commission of the technical parameters for any base stations operating on channels within their respective spectrum blocks that have been added, removed, relocated, or otherwise modified in accordance with the Commission's rules; (3) licensees operating on 800 MHz SMR frequencies who do not hold EA licenses must notify the Commission of the technical parameters for any base stations which they operate that have been added, removed, relocated, or otherwise modified in accordance with the Commission's rules; (4) incumbent licensees operating at multiple sites may exchange their multiple site licenses for a single license after the completion of the auction for the spectrum blocks within which their frequencies are included provided they submit a showing that their authorized facilities have been constructed and placed in operation and the contours associated with these facilities are contiguous and overlapping; (5) EA licensees must submit proof of their notification to incumbents operating on frequencies included within the EA licensees' spectrum blocks of their intention to relocate such incumbents; (6) auction winners claiming status as a small business must submit detailed ownership and gross revenue information necessary to determine they qualify as a small business pursuant to the Commission's rules; (7) auction winners must disclose the terms of any joint bidding agreements, if any, with other auction participants, and (8) EA licensees who transfer or assign their license within three years are required to file, together with a transfer application, a statement indicating that the license was obtained through competitive bidding, as well as the associated contracts for sale, option agreements, management agreements and all other documents disclosing the total consideration received in return for the transfer or assignment of the license.

The Commission has revised this collection because on July 22, 2005, the Commission adopted a Report and Order and Further Notice of Proposed Rulemaking (20 FCC Rcd 16293) to streamline and harmonize licensing provisions in the wireless radio services

pursuant to biennial regulatory review responsibilities. The Commission modified section 90.693 to eliminate the necessity of incumbent 800 SMR licensees filing notifications of minor modifications in certain circumstances. Specifically, notification of minor modifications is no longer required where a license locates its facilities closer than the minimum required distance separation but nonetheless falls within the parameters of the Short Space Separation Table under 47 CFR 90.621.

The information will be used by the Commission for the following purposes: (a) To update the Commission's licensing database and thereby facilitate the successful coexistence of EA licensees and incumbents in the 800 MHz SMR band; and (b) to determine whether an applicant is eligible for special provisions for small businesses provided for applicants in the 800 MHz service.

Under the Commission's E911 rules, a wireless carrier must provide E911 service to a particular Public Safety Answering Point (PSAP) within six months only if that PSAP makes a request for the service and is capable of receiving and utilizing the information provided. In the City of Richardson, TX, Order on Reconsideration II, the Commission adopted rules clarifying

what constitutes a valid PSAP request so as to trigger a wireless carrier's obligation to provide service to a PSAP within six months.
