NUCLEAR REGULATORY COMMISSION

Draft Regulatory Guide: Issuance, Availability

The U.S. Nuclear Regulatory Commission (NRC) has issued for public comment a draft of a new guide in the agency's Regulatory Guide Series. This series has been developed to describe and make available to the public such information as methods that are acceptable to the NRC staff for implementing specific parts of the NRC's regulations, techniques that the staff uses in evaluating specific problems or postulated accidents, and data that the staff needs in its review of applications for permits and licenses.

The draft regulatory guide, entitled "Combined License Applications for Nuclear Power Plants (LWR Edition)," is temporarily identified by its task number, DG-1145, which should be mentioned in all related correspondence. This proposed regulatory guide contains guidance for use in submitting combined license (COL) applications in compliance with the Commission's regulations in Title 10 Part 52 of the Code of Federal Regulations (10 CFR Part 52), "Early Site Permits; Design Certifications; and Combined Licenses for Nuclear Power Plants." Specifically, 10 CFR Part 52 governs the issuance of early site permits, standard design certifications, and combined licenses for nuclear power plants.

In February 1972, the NRC initially published Regulatory Guide 1.70,

"Standard Format and Content of Safety Analysis Reports for Nuclear Power Plants (LWR Edition)," which the nuclear industry has since used in preparing applications for construction permits and operating licenses for new nuclear power plants. The NRC most recently revised Regulatory Guide 1.70 in November 1978 and, since that time, the Commission has established a new process for licensing new reactors. That process, described in detail in 10 CFR Part 52, allows an applicant to reference an early site permit (ESP), a design certification (DC), both, or neither, in a COL application. The NRC has developed Draft Regulatory Guide DG-1145 to provide guidance to applicants who plan to use this new process.

The NRC initially issued 10 CFR Part 52 in April 1989 to offer alternative licensing (ESP, standard DC, COL, and manufacturing license) processes for new nuclear power plants. More recently, the agency proposed a revision of the rule on March 13, 2006, (71 FR 12782), to clarify the applicability of various requirements to each of the licensing processes. This Draft Regulatory Guide, DG-1145, is based on the proposed revised rule. The specific requirements pertaining to technical requirements for content of applications are contained in proposed 10 CFR 52.79, "Contents of applications, general requirements" and proposed 10 CFR 52.80, "Contents of applications, additional technical information." The final Regulatory Guide will be conformed to the final rule that is adopted by the Commission, and will be issued when that final rule is available.

At this time, the NRC staff is soliciting comments on Draft Regulatory Guide DG-1145. Comments may be accompanied by relevant information or supporting data, and should mention DG-1145 in the subject line. Comments submitted in writing or in electronic form will be made available to the public in their entirety through the NRC's Agencywide Documents Access and Management System (ADAMS). SECURITIES AND EXCHANGE COMMISSION

[Release No. 34-54394; File No. 4-523]

Program for Allocation of Regulatory Responsibilities Pursuant to Rule 17d-2; Order Approving and Declaring Effective a Plan for Allocation of Regulatory Responsibilities Between NYSE Arca, Inc. and the National Association of Securities Dealers, Inc.

August 31, 2006.

Notice is hereby given that the Securities and Exchange Commission ("Commission") has issued an Order, pursuant to Sections 17(d)¹ and 11A(a)(3)(B)² of the Securities Exchange Act of 1934 ("Act"), granting approval and declaring effective a revised amended and restated plan for the allocation of regulatory responsibilities ("Plan")³ that was filed pursuant to Rule 17d-2 under the Act⁴ by NYSE Arca, Inc.⁵ ("NYSE Arca") and the National Association of Securities

Dealers, Inc. ("NASD") (together with the NYSE Arca, the "Parties").

Accordingly, NASD shall assume, in addition to the regulatory responsibility it has under the Act, the regulatory responsibilities allocated to it under the Plan. At the same time, NYSE Arca is relieved of those regulatory responsibilities allocated to NASD under the Plan.

I. Introduction

Section 19(g)(1) of the Act,⁶ among other things, requires every self-regulatory organization ("SRO") registered as either a national securities exchange or registered securities association to examine for, and enforce compliance by, its members and persons associated with its members with the Act, the rules and regulations thereunder, and the SRO's own rules, unless the SRO is relieved of this responsibility pursuant to Section 17(d)⁷ or 19(g)(2)⁸ of the Act. Section 17(d)(1) of the Act⁹ was intended, in part, to eliminate unnecessary multiple examinations and regulatory duplication for those broker-dealers that maintain memberships in more than one SRO ("common members").¹⁰ With respect to a common member, Section 17(d)(1) authorizes the Commission, by rule or order, to relieve an SRO of the responsibility to receive regulatory reports, to examine for and enforce compliance with applicable statutes, rules, and regulations, or to perform other specified regulatory functions.

To implement Section 17(d)(1), the Commission adopted two rules: Rule 17d-1¹¹ and Rule 17d-2 under the Act.¹² Rule 17d-2 permits SROs to propose joint plans for the allocation of regulatory responsibilities, other than financial responsibility rules, with respect to their common members. Under paragraph (c) of Rule 17d-2, the Commission may declare such a plan effective if, after providing for notice and comment, it determines that the plan is necessary or appropriate in the public interest and for the protection of investors, to foster cooperation and

¹¹ 17 CFR 240.17d-1. Rule 17d-1 authorizes the Commission to name a single SRO as the designated examining authority ("DEA") to examine common members for compliance with the financial responsibility requirements imposed by the Act, or by Commission or SRO rules.
