

All interested persons are invited to attend the FACOSH meeting at the time and location listed above. Anyone wishing to attend this meeting must be prepared to exhibit photo identification and sign-in at MSHA's front office, located in Suite 2176, for authorization to enter the meeting area.

**Public Participation:** Written data, views, or comments may be submitted, preferably with 20 copies, to the Office of Federal Agency Programs at the Department of Labor Frances Perkins Building, 200 Constitution Avenue, NW., Washington, DC 20210. All such submissions received by September 21, 2006 will be provided to the Federal Advisory Council members and included in the meeting record. Anyone wishing to make an oral presentation should notify the Office of Federal Agency Programs by the close of business on September 21, 2006. The request should state the amount of time desired, the capacity in which the person will appear, and a brief outline of the presentation's content. Those who request the opportunity to address the Council may be allowed to speak, as time permits, at the discretion of the Chairperson. An official record of the meeting will be available for public inspection at the Office of Federal Agency Programs.

**Authority:** Edwin G. Foulke, Jr., Assistant Secretary of Labor Occupational Safety and Health, directed the preparation of this notice under the authority granted by Section 1-5 of Executive Order 12196 and the Federal Advisory Committee Act (5 U.S.C. App.2).

Signed at Washington, DC, this 30th day of August, 2006.

**Edwin G. Foulke, Jr.,**

*Assistant Secretary of Labor.*

## NUCLEAR REGULATORY COMMISSION

[Docket No. 030-30074]

### Notice of Availability of Environmental Assessment and Finding of No Significant Impact for License Amendment to Byproduct Materials License No. 29-28056-01, for Unrestricted Release of the Celgene Corporation's Facility in Warren, NJ

**AGENCY:** Nuclear Regulatory Commission.

**ACTION:** Issuance of Environmental Assessment and Finding of No Significant Impact for License Amendment.

**FOR FURTHER INFORMATION CONTACT:** Dennis Lawyer, Health Physicist, Commercial and R&D Branch, Division of Nuclear Materials Safety, Region I, 475 Allendale Road, King of Prussia, PA 19406; telephone (610) 337-5366; fax number (610) 337-5393; or by e-mail: [dr11@nrc.gov](mailto:dr11@nrc.gov).

#### SUPPLEMENTARY INFORMATION:

##### I. Introduction

The U.S. Nuclear Regulatory Commission (NRC) is considering the issuance of a license amendment to Byproduct Materials License No. 29-28056-01. This license is held by Celgene Corporation (the Licensee), for the facility located at 7 Powder Horn Drive in Warren, New Jersey (the Facility). Issuance of the amendment would authorize release of the Facility for unrestricted use. The Licensee requested this action in a letter dated January 17, 2006. The NRC has prepared an Environmental Assessment (EA) in support of this proposed action in accordance with the requirements of Title 10, Code of Federal Regulations (CFR), part 51 (10 CFR part 51). Based on the EA, the NRC has concluded that a Finding of No Significant Impact (FONSI) is appropriate with respect to the proposed action. The amendment will be issued to the Licensee following the publication of this FONSI and EA in the **Federal Register**.

##### II. Environmental Assessment

###### Identification of Proposed Action

The proposed action would approve the Licensee's January 17, 2006, license amendment request, resulting in release of Celgene Corporation's Warren, NJ facility for unrestricted use. License No. 29-28056-01 was issued on September 10, 1987, pursuant to 10 CFR part 30, and has been amended periodically since that time. This license authorized the Licensee to use unsealed byproduct material for purposes of conducting research and development activities on laboratory bench tops and in hoods.

The Facility occupies 38,500 square feet and consists of administrative office and laboratories. The Facility is located in a light industrial area. Use of licensed material was confined to Rooms 13, 14, 15, 18A, 20, 105, 106, 113, Waste and Chemical Storage areas, associated hallways, and undeveloped areas of approximately 10,000 square feet within the Facility.

On August 15, 2005, the Licensee ceased licensed activities and initiated a survey, and decontamination of the areas in which licensed materials were used within the Facility. Based on the Licensee's historical knowledge of the

site and the conditions of the Facility, the Licensee determined that only routine decontamination activities, in accordance with its NRC-approved, operating radiation safety procedures, were required. The Licensee was not required to submit a decommissioning plan to the NRC because worker cleanup activities and procedures are consistent with those approved for routine operations. The Licensee conducted surveys of the areas where licensed materials were used and provided information to the NRC to demonstrate that it meets the criteria in subpart E of 10 CFR part 20 for unrestricted release.

###### Need for the Proposed Action

The Licensee has ceased conducting licensed activities at the Facility, and seeks the unrestricted use of its Facility.

###### Environmental Impacts of the Proposed Action

The historical review of licensed activities conducted at the Facility shows that such activities involved use of the following radionuclides with half-lives greater than 120 days: hydrogen-3 and carbon-14. Prior to performing the final status survey, the Licensee conducted decontamination activities, as necessary, in the areas of the Facility affected by these radionuclides.

The Licensee conducted a final status survey on December 5-7, 2005. This survey covered Rooms 13, 14, 15, 18A, 20, 105, 106, 113, Waste and Chemical Storage areas, underdeveloped areas and associated hallways. The final status survey report was enclosed with the Licensee's amendment request dated January 17, 2006, as supplemented in a letter dated April 28, 2006. The Licensee elected to demonstrate compliance with the radiological criteria for unrestricted release as specified in 10 CFR 20.1402 by using the screening approach described in NUREG-1757, "Consolidated NMSS Decommissioning Guidance," Volume 2. The Licensee used the radionuclide-specific derived concentration guideline levels (DCGLs), developed there by the NRC, which comply with the dose criterion in 10 CFR 20.1402. These DCGLs define the maximum amount of residual radioactivity on building surfaces, equipment, and materials, and in soils, that will satisfy the NRC requirements in subpart E of 10 CFR part 20 for unrestricted release. The Licensee's final status survey results were below these DCGLs and are in compliance with the As Low As Reasonably Achievable (ALARA) requirement of 10 CFR 20.1402. The NRC concludes that the Licensee's final status survey results are thus acceptable.

Based on its review, the staff has determined that the affected environment and any environmental impacts associated with the proposed action are bounded by the impacts evaluated by the "Generic Environmental Impact Statement in Support of Rulemaking on Radiological Criteria for License Termination of NRC-Licensed Nuclear Facilities" (NUREG-1496) Volumes 1-3 (ML042310492, ML042320379, and ML042330385). Accordingly, there were no significant environmental impacts from the use of radioactive material at the Facility. The NRC staff reviewed the docket file records and the final status survey report to identify any non-radiological hazards that may have impacted the environment surrounding the Facility. No such hazards or impacts to the environment were identified. The NRC has found no other radiological or non-radiological activities in the area that could result in cumulative environmental impacts.

The NRC staff finds that the proposed release of the Facility for unrestricted use is in compliance with 10 CFR 20.1402. Based on its review, the staff considered the impact of the residual radioactivity at the Facility and concluded that the proposed action will not have a significant effect on the quality of the human environment.

#### *Environmental Impacts of the Alternatives to the Proposed Action*

Due to the largely administrative nature of the proposed action, its environmental impacts are small. Therefore, the only alternative the staff considered is the no-action alternative, under which the staff would leave things as they are by simply denying the amendment request. This no-action alternative is not feasible because it conflicts with 10 CFR 30.36(d), requiring that decommissioning of byproduct material facilities be completed and approved by the NRC after licensed activities cease. The NRC's analysis of the Licensee's final status survey data confirmed that the Facility meets the requirements of 10 CFR 20.1402 for unrestricted release. Additionally, a denial of the application would result in no change in current environmental impacts. The environmental impacts of the proposed action and the no-action alternative are therefore similar, and the no-action alternative is accordingly not further considered.

#### *Conclusion*

The NRC staff has concluded that the proposed action is consistent with the NRC's unrestricted release criteria

specified in 10 CFR 20.1402. Because the proposed action will not significantly impact the quality of the human environment, the NRC staff concludes that the proposed action is the preferred alternative.

#### *Agencies and Persons Consulted*

NRC provided a draft of this Environmental Assessment to the State of New Jersey Department of Environmental Protection for review on June 13, 2006. On June 29, 2006, the Department of Environmental Protection responded by letter. The State agreed with the conclusions of the EA, and otherwise had no comments.

The NRC staff has determined that the proposed action is of a procedural nature, and will not affect listed species or critical habitat. Therefore, no further consultation is required under Section 7 of the Endangered Species Act. The NRC staff has also determined that the proposed action is not the type of activity that has the potential to cause effects on historic properties. Therefore, no further consultation is required under Section 106 of the National Historic Preservation Act.

#### **III. Finding of No Significant Impact**

The NRC staff has prepared this EA in support of the proposed action. On the basis of this EA, the NRC finds that there are no significant environmental impacts from the proposed action, and that preparation of an environmental impact statement is not warranted. Accordingly, the NRC has determined that a Finding of No Significant Impact is appropriate.

#### **IV. Further Information**

Documents related to this action, including the application for license amendment and supporting documentation, are available electronically at the NRC's Electronic Reading Room at <http://www.nrc.gov/reading-rm/adams.html>. From this site, you can access the NRC's Agencywide Document Access and Management System (ADAMS), which provides text and image files of NRC's public documents. The documents related to this action are listed below, along with their ADAMS accession numbers.

1. Amendment Request Letter dated January 17, 2006 [ML060240189];
2. Letter with additional information dated April 28, 2006 [ML061300452];
3. NUREG-1757, "Consolidated NMSS Decommissioning Guidance;"
4. Title 10 Code of Federal Regulations, part 20, subpart E, "Radiological Criteria for License Termination;"

5. Title 10, Code of Federal Regulations, part 51, "Environmental Protection Regulations for Domestic Licensing and Related Regulatory Functions;"

6. NUREG-1496, "Generic Environmental Impact Statement in Support of Rulemaking on Radiological Criteria for License Termination of NRC-Licensed Nuclear Facilities."

If you do not have access to ADAMS, or if there are problems in accessing the documents located in ADAMS, contact the NRC Public Document Room (PDR) Reference staff at 1-800-397-4209, 301-415-4737, or by e-mail to [pdr@nrc.gov](mailto:pdr@nrc.gov). These documents may also be viewed electronically on the public computers located at the NRC's PDR, O 1 F21, One White Flint North, 11555 Rockville Pike, Rockville, MD 20852. The PDR reproduction contractor will copy documents for a fee.

Dated at 475 Allendale Road, King of Prussia, PA, this 29th day of August 2006.

For the Nuclear Regulatory Commission.

## **NUCLEAR REGULATORY COMMISSION**

### **Advisory Committee on Nuclear Waste; Notice of Meeting**

The Advisory Committee on Nuclear Waste (ACNW) will hold its 173rd meeting on September 18-21, 2006, Room T-2B3, 11545 Rockville Pike, Rockville, Maryland.

The schedule for this meeting is as follows:

*Monday, September 18, 2006*

*10 a.m.-10:05 a.m.: Opening Remarks by the ACNW Chairman (Open)*—The ACNW Chairman, Dr. Michael Ryan, will make opening remarks regarding the conduct of today's sessions.

*10:05 a.m.-11:30 a.m.: Observations from ACNW Members and Staff on recent Activities (Open)*—ACNW members and staff will present a summary of their visit to Crow Butte In Situ Leach Facility in Nebraska and attendance at the U.S. Department of Energy (DOE) Workshop on Low Dose Radiation Research Program; and the International Commission on Radiological Protection (ICRP) Workshop.

*12:30 p.m.-5 p.m.: Discussion of Draft ACNW Letter Reports (Open)*—The Committee will discuss proposed ACNW letters.
