

from the requirements of FIFRA those products whose only active ingredients are among a set of ingredients listed in the exemption, provided that, among other things:

1. The only inert ingredients in the product are those listed in the most current List 4A (minimal risk ingredients);
2. The product does not “bear claims either to control or mitigate microorganisms that pose a threat to human health, including but not limited to disease transmitting bacteria or viruses, or claims to control insects or rodents carrying specific diseases, including, but not limited to ticks that carry Lyme disease”; and
3. The product does not “include any false and misleading labeling statements, including those listed in 40 CFR 156.10(a)(5)(i) through (viii).”

The petitioner argues that the exemption in 40 CFR 152.25(f) as currently written, endangers public health by permitting labeling claims for effectiveness against public health pests without requiring proof that these exempt pesticides are effective against such pests.
