

cracking of principal structural elements (PSEs). Compliance with these inspections is required by 14 CFR 91.403(c). For airplanes that have been previously modified, altered, or repaired in the areas addressed by these inspections, the operator may not be able to incorporate the inspections described in the revisions. In this situation, to comply with 14 CFR 91.403(c), the operator must request approval for an alternative method of compliance according to paragraph (h) of this AD. The request should include a description of changes to the required inspections that will ensure the continued damage tolerance of the affected structure. The FAA has provided guidance for this determination in Advisory Circular (AC) 25-1529.

Unsafe Condition

(d) This AD results from a revised damage tolerance analysis. We are issuing this AD to detect and correct fatigue cracking of certain principal structural elements (PSEs), which could adversely affect the structural integrity of the airplane.

Compliance

(e) You are responsible for having the actions required by this AD performed within the compliance times specified, unless the actions have already been done.

Revision of Airworthiness Limitations Section

(f) Within 18 months after the effective date of this AD: Revise the Airworthiness Limitations section of the Instructions for Continued Airworthiness, Airworthiness Limitations Instructions (ALI), according to a method approved by the Manager, Los Angeles Aircraft Certification Office (ACO), FAA. Boeing MD-11 ALI, Report Number MDC-K5225, Revision 11, dated March 2006, is one approved method.

(g) Except as provided by paragraph (h) of this AD: After the actions specified in paragraph (f) of this AD have been done, no alternative inspection intervals or replacement times may be approved for the PSEs and safe-life limited parts specified in Boeing Report Number MDC-K5225, Revision 11, dated March 2006.

Alternative Methods of Compliance (AMOCs)

(h)(1) The Manager, Los Angeles ACO, has the authority to approve AMOCs for this AD, if requested in accordance with the procedures found in 14 CFR 39.19.

(2) An AMOC that provides an acceptable level of safety may be used for any repair required by accomplishing the actions in this AD, if it is approved by an Authorized Representative for the Boeing Commercial Airplanes Delegation Option Authorization Organization who has been authorized by the Manager, Los Angeles ACO, to make those findings. For a repair method to be approved, the repair must meet the certification basis of the airplane, and the approval must specifically refer to this AD.

(3) Before using any AMOC approved in accordance with § 39.19 on any airplane to which the AMOC applies, notify the appropriate principal inspector in the FAA

Flight Standards Certificate Holding District Office.

SUPPLEMENTARY INFORMATION: On July 26, 2006, the Alcohol and Tobacco Tax and Trade Bureau (TTB) published Notice No. 62, Major Food Allergen Labeling for Wines, Distilled Spirits and Malt Beverages, in the **Federal Register** (71 FR 42329). In that notice of proposed rulemaking, TTB requested public comment on the proposed adoption of mandatory labeling standards for major food allergens used in the production of alcohol beverages subject to the labeling requirements of the Federal Alcohol Administration Act. The comment period for Notice No. 62, when published, was scheduled to close on September 25, 2006.

After publication of Notice No. 62, TTB received requests from the Distilled Spirits Council of the United States, the National Association of Beverage Importers, Inc., and Wine Institute to extend the comment period for Notice No. 62 for a period ranging from 60 to 120 days beyond the September 25, 2006, closing date. In support of their extension requests, these organizations note that the comment period of this notice would coincide with habitual August vacations in Europe, where many industry member suppliers reside, and that it would also coincide with the approaching grape harvest in California. Consequently, the three organizations state, many industry members would be unable to focus on the complexities and ramifications of the proposed rule and would not have adequate time to formulate a response to the proposal.

In response to these requests, TTB extends the comment period for Notice No. 62 for an additional 90 days. Therefore, comments on Notice No. 62 are now due on or before December 26, 2006.

Drafting Information: Gabriel J. Hiza of the Regulations and Rulings Division drafted this notice.

Signed: September 14, 2006.

Administrator.
