The following agenda reflects only those items from the original agenda for September 18, 2006, as amended, that will be considered by the Board on September 22, 2006.

Matters to Be Considered on Friday, September 22, 2006

Board of Directors

Open Session

1. Approval of Agenda.

11. Consider and act on whether to authorize non-public briefings of the Board and discussion by the Board as per the items listed below under Closed Session.

Closed Session

14. Briefing by the OIG on status of the investigation requested by Chairmen Enzi, Grassley and Cannon.

15. Briefing by LSC Management on the investigation requested by Chairmen Enzi, Grassley and Cannon.

16. Discussion of above briefings.

Open Session

18. Consider and act on closed session briefings regarding the investigation requested by Chairmen Enzi, Grassley and Cannon.

19. Consider and act on motion to adjourn meeting.

Contact Person For Information: Patricia D. Batie, Manager of Board Operations, at (202) 295-1500.

Special Needs: Upon request, meeting notices will be made available in alternate formats to accommodate visual and hearing impairments. Individuals who have a disability and need an accommodation to attend the meeting may notify Patricia D. Batie, at (202) 295-1500.

Dated: September 20, 2006.

Victor M. Fortuno,

Vice President for Legal Affairs, General Counsel & Corporate Secretary.

BILLING CODE 7050-01-P

NUCLEAR REGULATORY COMMISSION

[Docket No. 50-285]

Omaha Public Power District Notice of Withdrawal of Application for Amendment to Facility Operating License

The U.S. Nuclear Regulatory Commission (the Commission) has granted the request of Omaha Public Power District (the licensee) to withdraw its May 14, 2004, application for proposed amendment to Facility Operating License No. DPR-40 for the Fort Calhoun Station, Unit No. 1 (FCS), located in Washington County, Nebraska.

The proposed amendment would have revised the Technical Specifications Section 2.3(2)b, "Modification of Minimum Requirements." Specifically, the proposed change would have provided a risk-informed alternative to the existing restoration period for the High-Pressure Safety Injection System.

The Commission had previously issued a Notice of Consideration of Issuance of Amendment published in the **Federal Register** on July 6, 2004 (69 FR 40677). However, by letter dated August 25, 2006, the licensee withdrew the proposed change.

For further details with respect to this action, see the application for amendment dated May 14, 2004, and the licensee's letter dated August 25, 2006, which withdrew the application for license amendment. Documents may be examined, and/or copied for a fee, at the NRC's Public Document Room (PDR), located at One White Flint North, Public File Area O1 F21, 11555 Rockville Pike (first floor), Rockville, Maryland. Publicly available records will be accessible electronically from the Agencywide Documents Access and Management Systems (ADAMS) Public Electronic Reading Room on the internet at the NRC Web site, <http://www.nrc.gov/reading-rm.html>. Persons

who do not have access to ADAMS or who encounter problems in accessing the documents located in ADAMS should contact the NRC PDR Reference staff by telephone at 1-800-397-4209, or 301-415-4737 or by e-mail to pdr@nrc.gov.

Dated at Rockville, Maryland, this 8th day of September 2006.

For the Nuclear Regulatory Commission.

Alan B. Wang,

Project Manager, Plant Licensing Branch IV, Division of Operating Reactor Licensing, Office of Nuclear Reactor Regulation.

BILLING CODE 7590-01-P

NUCLEAR REGULATORY COMMISSION

Notice of Opportunity To Comment on Model Application on Technical Specification Improvement To Modify Requirements Regarding LCO 3.10.1, Inservice Leak and Hydrostatic Testing Operation Using the Consolidated Line Item Improvement Process

AGENCY: Nuclear Regulatory Commission.

ACTION: Request for comment.

SUMMARY: Notice is hereby given that the staff of the Nuclear Regulatory Commission (NRC) has prepared a model licensee application relating to the modification of shutdown testing requirements in technical specifications (TS) for Boiling Water Reactors (BWR). The purpose of this model is to permit the NRC to efficiently process amendments that propose to modify LCO 3.10.1 that would allow control rod scram time testing to be performed concurrently with inservice leak and hydrostatic testing. Licensees of nuclear power reactors to which the model applies could then request amendments, confirming the applicability to their reactors. The NRC staff is requesting comment on the model application prior to announcing its availability for license amendment applications. A model
