

references to specific portions of the application (including the applicant's environmental report and safety report) that the requester/petitioner disputes and the supporting reasons for each dispute, or, if the requester/petitioner believes the application fails to contain information on a relevant matter as required by law, the identification of each failure and the supporting reasons for the requester's/petitioner's belief.

In addition, in accordance with 10 CFR 2.309(f)(2), contentions must be based on documents or other information available at the time the petition is filed, such as the application, supporting safety analysis report, environmental report or other supporting document filed by an applicant or licensee, or otherwise available to the petitioner. On issues arising under the National Environmental Policy Act, the requester/petitioner shall file contentions based on the applicant's environmental report. The requester/petitioner may amend those contentions or file new contentions if there are data or conclusions in the NRC draft, or final environmental impact statement, environmental assessment, or any supplements relating thereto, that differ significantly from the data or conclusions in the applicant's documents. Otherwise, contentions may be amended or new contentions filed after the initial filing only with leave of the presiding officer.

Each contention shall be given a separate numeric or alpha designation within one of the following groups:

1. *Technical*—primarily concerns issues relating to matters discussed or referenced in the Safety Evaluation Report for the proposed action.
2. *Environmental*—primarily concerns issues relating to matters discussed or referenced in the Environmental Report for the proposed action.
3. *Emergency Planning*—primarily concerns issues relating to matters discussed or referenced in the Emergency Plan as it relates to the proposed action.
4. *Physical Security*—primarily concerns issues relating to matters discussed or referenced in the Physical Security Plan as it relates to the proposed action.
5. *Miscellaneous*—does not fall into one of the categories outlined above.

If the requester/petitioner believes a contention raises issues that cannot be classified as primarily falling into one of these categories, the requester/petitioner must set forth the contention and supporting bases, in full, separately for each category into which the requester/petitioner asserts the contention belongs

with a separate designation for that category.

Requesters/petitioners should, when possible, consult with each other in preparing contentions and combine similar subject matter concerns into a joint contention, for which one of the co-sponsoring requesters/petitioners is designated the lead representative. Further, in accordance with 10 CFR 2.309(f)(3), any requester/petitioner that wishes to adopt a contention proposed by another requester/petitioner must do so in writing within ten days of the date the contention is filed, and designate a representative who shall have the authority to act for the requester/petitioner.

In accordance with 10 CFR 2.309(g), a request for hearing and/or petition for leave to intervene may also address the selection of the hearing procedures, taking into account the provisions of 10 CFR 2.310.

III. Further Information

The application, including the safety analysis report and other information referenced in the application, may be made available pursuant to a protective order and subject to applicable security requirements upon a showing that the petitioner has an interest that may be affected by the proceeding.

Dated at Rockville, Maryland, this 21st day of September 2006.

For the U.S. Nuclear Regulatory Commission.

Gary S. Janosko,

Chief, Fuel Cycle Facilities Branch, Division of Fuel Cycle Safety and Safeguards, Office of Nuclear Material Safety and Safeguards.

BILLING CODE 7590-01-P

NUCLEAR REGULATORY COMMISSION

[Docket Nos. 50-498 and 50-499]

STP Nuclear Operating Company; Notice of Withdrawal of Application for Amendments to Facility Operating Licenses

The U.S. Nuclear Regulatory Commission (NRC/the Commission) has granted the request of STP Nuclear Operating Company (the licensee) to withdraw its July 4, 2005, application for the proposed amendments to Facility Operating License No. NPF-76, to be issued to the licensee for operation of the South Texas Project, Unit 1; and Facility Operating License No. NPF-80, to be issued to the licensee for South Texas Project, Unit 2; located in Matagorda County, Texas.

The proposed amendments would have modified the facility technical specifications (TSs) to extend allowed outage time for TS 3.7.4, "Essential Cooling Water System," and associated TSs for those systems that are supported by Essential Cooling Water, from 7 days to 14 days.

The Commission had previously issued a Notice of Consideration of Issuance of Amendments published in the **Federal Register** on August 2, 2005 (70 FR 44403). However, by letter dated September 13, 2006, the NRC informed the licensee that the NRC would consider the proposed application for the amendments to be withdrawn unless the licensee notified the NRC by September 21, 2006, that our understanding was incorrect. Thus, the July 4, 2005, application for the amendments is considered to be withdrawn by the licensee.

For further details with respect to this action, see (1) the application for the amendments dated July 4, 2005, and (2) the NRC staff's letter dated September 21, 2006, which withdrew the application for the license amendments. Documents may be examined, and/or copied for a fee, at the NRC's Public Document Room (PDR), located at One White Flint North, Public File Area O1 F21, 11555 Rockville Pike (first floor), Rockville, Maryland. Publicly available records will be accessible electronically from the Agencywide Documents Access and Management Systems (ADAMS) Public Electronic Reading Room on the internet at the NRC Web site, <http://www.nrc.gov/reading-rm.html>. Persons who do not have access to ADAMS or who encounter problems in accessing the documents located in ADAMS should contact the NRC PDR Reference staff by telephone at 1-800-397-4209, or 301-415-4737 or by e-mail to pdr@nrc.gov.

Dated at Rockville, Maryland, this 25th day of September 2006.

For the Nuclear Regulatory Commission.

Mohan C. Thadani,

Senior Project Manager, Plant Licensing Branch IV, Division of Operating Reactor Licensing, Office of Nuclear Reactor Regulation.
