

environmental impacts associated with the proposed action.

With regard to potential non-radiological impacts, the proposed action does not have a potential to affect any historic sites. It does not affect non-radiological plant effluents and has no other environmental impact. Therefore, there are no significant non-radiological environmental impacts associated with the proposed action.

Accordingly, the NRC concludes that there are no significant environmental impacts associated with the proposed action.

#### *Environmental Impacts of the Alternatives to the Proposed Action*

As an alternative to the proposed action, the staff considered denial of the proposed action (i.e., the "no-action" alternative). Denial of the application would result in no change in current environmental impacts. The environmental impacts of the proposed action and the alternative action are similar.

#### *Alternative Use of Resources*

The action does not involve the use of any different resources than those previously considered in the Final Addendum to the Final Environmental Statement Related to Operation of the Palisades Nuclear Plant, dated February 1978.

#### *Agencies and Persons Consulted*

In accordance with its stated policy, on September 11, 2006, the staff consulted with the Michigan State official, Mary Ann Elzerman of the Department of Environmental Quality, regarding the environmental impact of the proposed action. The State official had no comments.

#### **Finding of No Significant Impact**

On the basis of the environmental assessment, the NRC concludes that the proposed action will not have a significant effect on the quality of the human environment. Accordingly, the NRC has determined not to prepare an environmental impact statement for the proposed action.

For further details with respect to the proposed action, see the licensee's letter dated October 4, 2005, as supplemented by letter dated June 14, 2006.

**NUCLEAR REGULATORY COMMISSION**

**Notice of Availability of Model Application Concerning Technical Specification Improvement To Modify Requirements Regarding the Addition of LCO 3.0.9 on the Unavailability of Barriers Using the Consolidated Line Item Improvement Process**

**AGENCY:** Nuclear Regulatory Commission.

**ACTION:** Notice of availability.

**SUMMARY:** Notice is hereby given that the staff of the Nuclear Regulatory Commission (NRC) has prepared a model safety evaluation (SE) and model application relating to the modification of requirements regarding the impact of unavailable barriers, not explicitly addressed in technical specifications, but required for operability of supported systems in technical specifications (TS). The NRC staff has also prepared a model no-significant-hazards-consideration (NSHC) determination relating to this matter. The purpose of these models is to permit the NRC to efficiently process amendments that propose to add an LCO 3.0.9 that provides a delay time for entering a supported system TS when the inoperability is due solely to an unavailable barrier, if risk is assessed and managed. Licensees of nuclear power reactors to which the models apply could then request amendments utilizing the model application, as generically approved by this notice, and confirming the applicability of the SE and NSHC determination to their reactors.

**DATES:** The NRC staff issued a **Federal Register** notice (71 FR 32145, June 2, 2006) which provided a Model Safety Evaluation (SE) and model application relating to modification of requirements regarding the addition to the TS of LCO 3.0.9 the impact of unavailable barriers; similarly the NRC staff herein provides a Model Application, including a revised Model Safety Evaluation. The NRC staff can most efficiently consider applications based upon the Model Application, which references the Model Safety Evaluation, if the application is submitted within one year of this **Federal Register** notice.
