

On March 31, 2006 notice was published (71 FR 16291) that the permit holder requested authorization to skin biopsy loggerhead sea turtles. In addition to skin biopsy the permit holder has since requested authorization for additional sampling and satellite tracking of loggerhead sea turtles. The permit modification would annually authorize an increase in the number of turtles undergoing ultrasound, cloacal swabbing, keratin scraping, and having satellite transmitters attached. The number of sea turtles captured would not change. The goal of the additional research would be to assess the potential diversity of diets and foraging habits and document over-wintering habitats of loggerheads.
