Farm Service Agency

Title: Highly Erodible Land Conservation and Wetland Conservation (7 CFR Part 12).

OMB Control Number: 0560-0185.

Summary of Collection: The Food Security Act of 1985 as amended by the Federal Agriculture Conservation and Trade Act of 1990 and the Federal Agriculture Improvement and Reform Act of 1996 (the 1996 Act), and the Agricultural Assistance Act of 2003 (the 2003 Act) provides that any person who produces an agricultural commodity on a field that is predominately highly erodible, converts wetland, or plants an agricultural commodity on converted wetland after December 23, 1985, shall be ineligible for certain program benefits. These provisions are an attempt to preserve the nation's wetland and to reduce the rate at which the conversion of highly erodible land occurs which contributes to the national erosion problem. In order to ensure that persons who request benefits subject to the conservation restrictions get technical assistance needed and are informed regarding the compliance requirements on their land, the Farm Service Agency (FSA) collects information using several forms from producers with regard to their financial activities on their land that could affect their eligibility for requested USDA benefits.

Need and Use of the Information: Information must be collected from producers to certify that they intend to comply with the conservation requirements on their land to maintain their eligibility. Additional information may be collected if producers request

that certain activities be exempt from provisions of the statute in order to evaluate whether the exempted conditions will be met. The collection of information allows the FSA county employees to perform the necessary compliance checks and fulfill USDA's objectives towards preserving wetlands and reducing erosion.

Description of Respondents: Individuals or households; Business or other for-profit; Not-for-profit institutions; Federal Government; State, local or tribal government.

Number of Respondents: 262,788.

Frequency of Responses: Reporting: On occasion.

Total Burden Hours: 262,346.

SUPPLEMENTARY INFORMATION:

Title: Generic Clearance to Conduct Survey Research Studies.

OMB Control Number: 0535-NEW.

Type of Request: Intent to Seek Approval to Conduct an Information Collection.

Abstract: The National Agricultural Statistics Service (NASS) of the United States Department of Agriculture (USDA) will request approval from the Office of Management and Budget (OMB) for generic clearance that will allow NASS to rigorously develop, test, and evaluate its survey instruments and methodologies. The primary objectives of the National Agricultural Statistics Service are to prepare and issue State and national estimates of crop production, livestock production, economic statistics, and environmental statistics related to agriculture and to conduct the Census of Agriculture. This request is part of an on-going initiative to improve NASS surveys as recommended by both its own guidelines, as well as those of OMB.

In the last decade, state-of-the-art techniques have been increasingly instituted by NASS and other Federal agencies and are now routinely used to improve the quality and timeliness of survey data and analyses, while simultaneously reducing respondents' cognitive workload and burden. The purpose of this generic clearance is to allow NASS to continue to adopt and use these state-of-the-art techniques to improve its current data collections on agriculture. They will also be used to aid in the development of new surveys.

NASS envisions using the following kinds of survey improvement techniques, as appropriate to the individual project under investigation: Focus groups, cognitive and usability laboratory and field techniques, exploratory interviews, behavior coding, respondent debriefing, pilot surveys, and split-panel tests.

Following standard OMB requirements NASS will apply to OMB individually for each survey improvement project it undertakes under this generic clearance and provide OMB with a copy of the questionnaire (if one is used), and all other materials describing the project.

These data will be collected under the authority of 7 U.S.C. 2204(a). Individually identifiable data collected under this authority are governed by Section 1770 of the Food Security Act of 1985, 7 U.S.C. 2276, which requires USDA to afford strict confidentiality to non-aggregated data provided by respondents.

Estimate of Burden: Public reporting burden for these collections of information is estimated to average 30 minutes per response.

Respondents: Farms, agri-businesses, and households.

Estimated Number of Respondents: 1,000.

Frequency of Responses: On occasion.
Estimated Total Annual Burden: 500 hours.

Copies of this information collection and related instructions can be obtained without charge from Ginny McBride, NASS Clearance Officer, at (202) 720-5778.

Comments: Comments are invited on: (a) Whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information will have practical utility; (b) the accuracy of the agency's estimate of the burden of the proposed collection of information including the validity of the methodology and assumptions used; (c) ways to enhance the quality, utility, and clarity of the information to be collected; and (d) ways to minimize the burden of the collection of information on those who are to respond, including through the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology.

All responses to this notice will become a matter of public record and be summarized in the request for OMB approval.

Signed at Washington, DC, September 28, 2006.

R. Ronald Bosecker,
NASS Administrator.
