The experiment is designed to test three different approaches to providing ITAs. Data from the follow-up survey of ITA customers will be used by Mathematica Policy Research, Inc. to describe experiences inside the workforce system and labor market outcomes for ITA customers. Measures of these experiences and outcomes would be used to further evaluate the three approaches. Based on information from the survey and other data sources, the U.S. Department of Labor can provide information to local workforce boards on how to administer their ITA programs.
