[Docket No. DEA-300P]

Assessment of Annual Needs for the List I Chemicals Ephedrine, Pseudoephedrine, and Phenylpropanolamine for 2007: Proposed

AGENCY: Drug Enforcement Administration (DEA), Justice.

ACTION: Notice of proposed year 2007 assessment of annual needs.

SUMMARY: This notice proposes initial year 2007 assessment of annual needs for certain List I chemicals in accordance with the Combat Methamphetamine Epidemic Act of 2005 (CMEA), enacted on March 9, 2006. The Act required DEA to establish production quotas and import quotas for ephedrine, pseudoephedrine, and phenylpropanolamine. This effort was done in order to prevent the illicit use of these three chemicals in the clandestine manufacture of methamphetamine. The enactment of the CMEA places additional regulatory controls upon the manufacture, distribution, importation and exportation of the three List I chemicals.

DATES: Comments or objections must be received on or before December 4, 2006.

ADDRESSES: To ensure proper handling of comments, please reference "Docket No. DEA-300P" on all written and electronic correspondence. Comments may be directly sent to DEA electronically by sending an electronic message to *dea.diversion.policy@usdoj.gov*. DEA will accept attachments to electronic comments in Microsoft Word, WordPerfect, Adobe PDF, or Excel file formats only. SUPPLEMENTARY INFORMATION: Section 713 of the Combat Methamphetamine Epidemic Act of 2005 (Title VII of Pub. L. 109-177) (CMEA) amended section 306 of the Controlled Substances Act (CSA) (Title 21 United States Code (U.S.C.) § 826 "Production quotas for controlled substances") by adding ephedrine, pseudoephedrine, and phenylpropanolamine to existing language to read as follows: "The Attorney General shall determine the total quantity and establish production quotas for each basic class of controlled substance in schedules I and II and for ephedrine, pseudoephedrine, and phenylpropanolamine to be manufactured each calendar year to provide for the estimated medical, scientific, research, and industrial needs of the United States, for lawful export requirements, and for the establishment and maintenance of reserve stocks." Further, § 715 of CMEA amended 21 U.S.C. § 952 "Importation of controlled substances" by adding the same List I chemicals to the existing language in paragraph (a), and by adding a new paragraph (d) to read as follows:

(a) Controlled substances in schedule I or II and narcotic drugs in schedule III, IV, or V; exceptions:

It shall be unlawful to import into the customs territory of the United States from any place outside thereof (but within the United States), or to import into the United States from any place outside thereof, any controlled substance in schedule I or II of subchapter I of this chapter, or any narcotic drug in schedule III, IV, or V of subchapter I of this chapter, or ephedrine, pseudoephedrine, and phenylpropanolamine, except that—

(1) such amounts of crude opium, poppy straw, concentrate of poppy straw, and coca leaves, and of ephedrine, pseudoephedrine, and phenylpropanolamine, as the Attorney General finds to be necessary to provide for medical, scientific, or other legitimate purposes, and * * *

(d)(1) With respect to a registrant under section 958 who is authorized under subsection (a)(1) to import ephedrine, pseudoephedrine, or phenylpropanolamine, at any time during the year the registrant may apply for an increase in the amount of such chemical that the registrant is authorized to import, and the Attorney General may approve the application if the Attorney General determines that the approval is necessary to provide for medical, scientific, or other legitimate purposes regarding the chemical.

Note: This excerpt of the amendment is published for the convenience of the reader. The official text is published at 21 U.S.C. 952(a) and (d)(1).

The responsibility for establishing the assessment of annual needs has been delegated to the Administrator of the DEA by § 0.100 of Title 28 of the Code of Federal Regulations. The Administrator, in turn, has redelegated this function to the Deputy Administrator, pursuant to the Code of Federal Regulations Title 28 § 0.104.

The proposed year 2007 assessment of annual needs represents those quantities of ephedrine, pseudoephedrine, and phenylpropanolamine which may be manufactured domestically and/or imported into the United States to provide adequate supplies of each substance for: The estimated medical, scientific, research, and industrial needs of the United States; lawful export requirements; and the establishment and maintenance of reserve stocks.

Calculation of the Assessment: Medical Needs of the United States for Ephedrine and Pseudoephedrine

Since the manufacture and importation of ephedrine, pseudoephedrine, and phenylpropanolamine have not been previously regulated through the establishment of an assessment of annual needs, the Drug Enforcement Administration obtained assistance from a private independent contractor, IMS Health Government Solutions (IMS), to develop the proposed initial estimate of the medical needs of the United States of ephedrine and pseudoephedrine.

IMS' estimates of medical needs for ephedrine and pseudoephedrine were derived from 2005 data that the company routinely collects and offers to customers in order to understand the pharmaceutical market. For this analysis, IMS utilized the following types of data: (1) Sales to retail establishments (including pharmacies), (2) sales by retail establishments to patients, and (3) medical insurance claims. IMS' estimates of medical needs were intended to encompass only those products containing either ephedrine or pseudoephedrine, whether requiring a
