Registration

In addition to certifying permit holders, all longline and gillnet vessel operators fishing with a limited access swordfish or limited access shark permit are required to attend the Safe Handling, Release, and Identification workshops. Vessels that have been issued a limited access swordfish or limited access shark permit may not fish unless both the vessel owner and operator have valid workshop certificates. Vessel operators must possess on board the vessel valid workshop certificates for both the vessel owner and the operator at all times.

To ensure the workshop certificate is linked to the correct permit, you will need to bring the following items with you to the workshop:

Individual vessel owners must bring: proof of identification, a copy of the appropriate permit(s), and a copy of the vessel registration or documentation.

Representatives of a business owned or co-owned vessel must bring: proof that the individual is an agent of the business, a copy of the applicable permit(s), and proof of identification.

Vessel operators must bring proof of identification.

Participants in the industry-sponsored workshops on safe handling and release of sea turtles that were held in Orlando, FL (April 8, 2005) and New Orleans, LA (June 27, 2005) will be issued a workshop certificate in December 2006 that will be valid for three years. Grandfathered permit holders must include a copy of this certificate when renewing limited access shark and limited access swordfish permits each year. Failure to provide a valid workshop certificate may result in a permit denial.

The Safe Handling, Release, and Identification Workshops are designed to teach longline and gillnet fishermen the required techniques for the safe handling and release of entangled and/or hooked protected species, such as sea turtles, marine mammals, and smalltooth sawfish. Identification of protected species will also be taught at these workshops in an effort to improve reporting. Additionally, individuals attending these workshops will gain a better understanding of the requirements for participating in these fisheries. The overall goal for these workshops is to provide participants the skills needed to reduce the mortality of protected species, which may prevent additional regulations on these fisheries in the future.
