NUCLEAR REGULATORY COMMISSION

Request for a License To Export Radioactive Waste

Pursuant to 10 CFR 110.70 "Public notice of receipt of an application," please take notice that the Nuclear Regulatory Commission has received the following request for an export license. Copies of the request are available electronically through ADAMS and can be accessed through the Public Electronic Reading Room (PERR) link http://www.nrc.gov/NRC/ADAMS/index.html at the NRC Homepage.

A request for a hearing or petition for leave to intervene may be filed within 30 days after publication of this notice in the **Federal Register**. Any request for hearing or petition for leave to intervene shall be served by the requestor or petitioner upon the applicant, the Office of the General Counsel, U.S. Nuclear Regulatory Commission, Washington DC 20555; the Secretary, U.S. Nuclear Regulatory Commission, Washington, DC 20555; and the Executive Secretary, U.S. Department of State, Washington, DC 20520.

The information concerning this import license application follows.

NRC EXPORT LICENSE APPLICATION

Name of applicant date of application, date received, Application No., Docket No.	Description of material		End use	Country
	Material type	Total quantity	Liid use	of origin
UniTech Services Group, Inc., August 17, 2006, September 7, 2006, XW011, 11005649.	Class A radioactive waste consisting of source, special nuclear and byproduct materials including paper, cardboard, plastic, metals, cloth, rubber, wood, etc.	Up to 30,000 lbs. Or 5,000 cubic feet of contaminated materials.		Canada.

Dated this 13 day of October 2006 at Rockville, Maryland.

For the Nuclear Regulatory Commission.

Margaret M. Doane,

Deputy Director, Office of International Programs.

NUCLEAR REGULATORY COMMISSION

[EA-06-249]

In the Matter of Certain Licensees
Authorized To Possess and Transfer
Items Containing Radioactive Material
Quantities of Concern; Order Imposing
Fingerprinting and Criminal History
Records Check Requirements for
Unescorted Access to Certain
Radioactive Materials and Modification
of the Additional Security Measures
(Effective Immediately)

T

The Licensees identified in Attachment 1 ¹ to this Order hold licenses issued in accordance with the Atomic Energy Act (AEA) of 1954, as amended, by the U.S. Nuclear Regulatory Commission (NRC or Commission) or Agreement States, authorizing them to possess and transfer items containing radioactive materials

in quantities of concern. On August 8, 2005, the Energy Policy Act of 2005 (EPAct) was enacted. Section 652 of the EPAct amended section 149 of the AEA to require fingerprinting and a Federal Bureau of Investigation (FBI) identification and criminal history records check of any person who is permitted unescorted access to radioactive materials subject to regulation by the Commission, and which the Commission determines to be of such significance to the public health and safety or the common defense and security as to warrant fingerprinting and background checks. NRC has decided to implement this requirement, in part, prior to the completion of the rulemaking to implement the provisions under the EPAct, which is underway, because a deliberate malevolent act by an individual with unescorted access to these radioactive materials has a potential to result in significant adverse impacts to the public health and safety or the common defense and security. Those exempted from fingerprinting requirements under 10 CFR 73.59 (71 FR 33,989 (June 13, 2006)) for access to Safeguards Information 2 (SGI) are also exempt from the fingerprinting requirements under this Order. In addition, individuals who have a favorably-decided U.S. Government

criminal history record check within the last five (5) years, or individuals who have an active federal security clearance (provided in each case that they make available the appropriate documentation), have satisfied the EPAct fingerprinting requirement and need not be fingerprinted again. Individuals who have been fingerprinted and granted access to SGI by the reviewing official under EA-06-155 do not need to be fingerprinted again.

II

Subsequent to the terrorist events of September 11, 2001, the NRC issued a security Order requiring certain Licensees who may transport radioactive material quantities of concern to implement Additional Security Measures (ASMs) for radioactive materials. The requirements imposed by that Order (RAMQC Order), and certain measures licensees have developed to comply with that Order, were designated by the NRC as SGI and were not released to the public. One specific ASM imposed by the RAMQC Order required licensees to conduct local background checks to determine the trustworthiness and reliability of individuals needing unescorted access to radioactive materials. "Access" to these radioactive materials means that an individual could exercise some physical control over the material or device. At that time, the NRC did not

 $^{^{1}}$ Attachment 1 contains sensitive information and will not be released to the public.

² Safeguards Information is a form of sensitive, unclassified, security-related information that the Commission has the authority to designate and protect under section 147 of the AEA.
