DEPARTMENT OF VETERANS AFFAIRS

Privacy Act of 1974

AGENCY: Department of Veterans Affairs (VA).

ACTION: Notice of new system of records.

SUMMARY: The Privacy Act of 1974, 5 U.S.C. 552(e)(4), requires that all agencies publish in the Federal Register a notice of the existence and character of their systems of records. Notice is hereby given that the Department of Veterans Affairs (VA) is establishing a new system of records entitled "Automated Safety Incident Surveillance and Tracking System-VA", (99VA13).

DATES: Comments on the establishment of this new system of records must be received no later than November 24, 2006. If no public comment is received, the new system will become effective November 24, 2006.

ADDRESSES: Written comments concerning the proposed system of records may be submitted by mail or hand-delivery to Director, Office of Regulations Management (00REG1), Department of Veterans Affairs, 810 Vermont Avenue, NW., Washington, DC 20420; by fax to (202) 273-9026; or by e-mail to "VARegulations@mail.va.gov". All relevant material received before November 24, 2006 will be considered. Comments will be available for public inspection at the above address in the Office of Regulation Policy and Management, Room 1063B, between the hours of 8 a.m. and 4:30 p.m., Monday through Friday (except holidays).

FOR FURTHER INFORMATION CONTACT:

Veterans Health Administration (VHA) Privacy Officer, Department of Veterans Affairs, 810 Vermont Avenue, NW., Washington, DC 20420, telephone (727) 320–1839.

SUPPLEMENTARY INFORMATION:

I. Description of Proposed Systems of Records

The Automated Safety Incident Surveillance and Tracking System (ASISTS) is an information management system that serves as the backbone of VA's management of work-related injuries and illnesses. The national database provides support for disease reporting, surveillance, and intervention, and as an integrated system, brings together different professional groups in a single community of practice to manage the various aspects of occupational injuries and illnesses in an efficient fashion.

ASISTS allows VA to identify, characterize, and track adverse events involving and the progress of injured and ill current and former employees, trainees, contractors, subcontractors, volunteers, and other individuals working collaboratively with VA. It allows the affected individuals to file their initial report of injury or illness, supervisors to describe the setting of and events leading up to the injury or illness, and safety personnel to describe the results of their investigation. It supports electronic transmission of workers' compensation claims, causes of incidents, and other aspects of the cases to the Department of Labor through an electronic linkage with the Workers Compensation-Management Information System, which maintains the Department of Labor records, and provides these individuals with access to a copy of their filed information. These system functions are currently available through other approved systems of records, including the Employee Medical File System Records (Title 38)-VA (08VA05).

The database allows VA to collect data related to blood-borne pathogen exposure and other causes of injury and illness, in accordance with the recordkeeping requirements of the Occupational Safety and Health Act of 1970, Public Law 91–596 84 STAT. 1590. It enables VA to identify systemwide problems and opportunities for focused education, examine emerging causes and clusters of incidents, evaluate the effectiveness of health and safety programs, and support research in the area of occupational medicine.

The records and information in ASISTS may be used to examine or identify individual cases or file claims of work-related injuries and illnesses; to evaluate health and safety systems performance through statistical analysis; to track and evaluate services and medical care of injured or ill workers; to develop and manage the planning, distribution, and use of resources; and
