II. What Action is EPA Taking?

This document extends the public comment period established in the **Federal Register** of August 2, 2006 (70 FR 43746) (FRL-8066-6) and later extended in the **Federal Register** of September 29, 2006 (71 FR 57506) (FRL-8096-6). In the first notice, the Agency provided a 60-day comment period for public input on the reregistration decision for PCNB, particularly on the benefits associated with certain minor uses of PCNB. This original comment period was to close on October 2, 2006. EPA then extended the comment period until November 1, 2006, based on requests from a PCNB registrant and the National Potato Council. Both entities had requested that the comment period be extended by 60 days, but the Agency granted an extension of approximately 30 days. The registrant and the National Potato Council subsequently reiterated their requests for the longer extension, and the Agency determined that the longer time period would facilitate comments from potato growers, many of whom will be busy with the potato harvest through November, and provide additional time for technical review by the registrant. The Agency is hereby extending the comment period to **December 4, 2006**. This new extension brings the total duration of the comment period to four months.

III. What is the Agency's Authority for Taking this Action

Section 4(g)(2) of FIFRA as amended directs that, after submission of all data concerning a pesticide active ingredient, the Administrator shall determine whether pesticides containing such active ingredient are eligible for reregistration. Further provisions are made to allow a public comment period. However, the Administrator may extend the comment period if additional time for comment is requested. In this case, two different public entities have requested additional time to develop comments.
