

Appendix I

SECTION I: The first moving average of lift cycles per hour TIS.

The first moving average calculation is performed on the IFWU assembly when the external lift component history card record reflects that the IFWU assembly has reached its first 250 hours TIS. To perform the calculation, divide the total number of lift cycles performed during the first 250 hours TIS by 250. The result will be the first moving average calculation of lift cycles per hour TIS.

SECTION II: Subsequent moving average of lift cycles per hour TIS.

Subsequent moving average calculations are performed on the IFWU assembly at intervals of 50 hour TIS after the first moving average calculation. Subtract the total number of lift cycles performed during the first 50-hour TIS interval used in the previous moving average calculation from the total number of lift cycles performed on the IFWU assembly during the previous 300 hours TIS. Divide this result by 250. The result will be the next or subsequent moving average calculation of lift cycles per hour TIS.

SECTION III: Sample calculation for subsequent 50 hour TIS intervals.

Assume the total number of lift cycles for the first 50 hour TIS interval used in the previous moving average calculation = 450 lift cycles and the total number of lift cycles for the previous 300 hours TIS = 2700 lift cycles. The subsequent moving average of lift cycles per hour TIS = (2700 - 450) divided by 250 = 9 lift cycles per hour TIS.

We are proposing to approve local rules to regulate these emission sources under the Clean Air Act as amended in 1990 (CAA or the Act).

DATES: Any comments on this proposal must arrive by November 29, 2006.

ADDRESSES: Submit comments, identified by docket number EPA-R09-OAR-2006-0548b, by one of the following methods:

Instructions: All comments will be included in the public docket without change and may be made available online at www.regulations.gov, including any personal information provided, unless the comment includes Confidential Business Information (CBI) or other information whose disclosure is restricted by statute. Information that you consider CBI or otherwise protected should be clearly identified as such and should not be submitted through www.regulations.gov or e-mail.

www.regulations.gov is an "anonymous access" system, and EPA will not know your identity or contact information unless you provide it in the body of your comment. If you send e-mail directly to EPA, your e-mail address will be automatically captured and included as part of the public comment. If EPA cannot read your comment due to technical difficulties and cannot contact you for clarification, EPA may not be able to consider your comment.

SUPPLEMENTARY INFORMATION: This proposal addresses the following Clark County rules: Section 90—Fugitive Dust from Open Areas and Vacant Lots; Section 92—Fugitive Dust from Unpaved Parking Lots, Material Handling and Storage Yards, and Vehicle and Equipment Storage Yards; Section 93—Fugitive Dust from Paved Roads and Street Sweeping Equipment; and, Section 94—Permitting and Dust Control for Construction Activities. In the Rules and Regulations section of this **Federal Register**, we are approving these local rules in a direct final action without prior proposal because we believe these SIP revisions are not controversial. SUPPLEMENTARY INFORMATION: In the "Rules and Regulations" section of this **Federal Register**, EPA is authorizing the revisions by an immediate final rule. EPA did not make a proposal prior to the immediate final rule because we believe this action is not controversial and do not expect comments that oppose it. We have explained the reasons for this authorization in the preamble to the immediate final rule. Unless we receive written comments that oppose this authorization during the comment period, the immediate final rule will become effective on the date it establishes, and we will not take further action on this proposal. If we receive comments that oppose this authorization, EPA will publish a document in the **Federal Register** withdrawing the immediate final rule before it takes effect. EPA will then address public comments in a later final rule based on this proposal. If we receive comments that oppose only the authorization of a particular change to the State hazardous waste program, we will withdraw that part of the immediate final rule. However, the authorization of the program changes that are not opposed by any comments will become effective on the date established in the immediate final rule. A **Federal Register** withdrawal document will specify which part of the authorization will become effective and which part is being withdrawn. EPA may not provide further opportunity for comment. Any parties interested in commenting on this action must do so at this time.
