

region, and leveraging existing technology to adopt the most efficient and cost effective means of connecting those providers. Applicants should indicate in their application how they plan to fully utilize a newly created dedicated broadband network to provide health care services. We anticipate that successful applicants will be able to demonstrate that they have a viable strategic plan for aggregating usage among health care providers within their state or region. In choosing participants for the program, we will consider whether the applicant has a successful track record in developing, coordinating, and implementing a successful telehealth/telemedicine program within their state or region. In addition, because the purpose of this program is to encourage health care providers to aggregate their connection needs to form a comprehensive statewide or regional dedicated health care network, we will also consider the number of health care providers that would be included in the proposed network. In particular, we will give considerable weight to applications that propose to connect the rural health care providers in a given state or region. A proposal that connects only a *de minimis* number of rural health care providers will not be accepted.

To be eligible for participation in the pilot program, interested parties should submit applications that:

- (1) Identify the organization that will be legally and financially responsible for the conduct of activities supported by the fund;
- (2) Identify the goals and objectives of the proposed network;
- (3) Estimate the network's total costs for each year;
- (4) Describe how for-profit network participants will pay their fair share of the network costs;
- (5) Identify the source of financial support and anticipated revenues that will pay for costs not covered by the fund;
- (6) List the health care facilities that will be included in the network;
- (7) Provide the address, zip code, Rural Urban Commuting Area (RUCA) code and phone number for each health care facility participating in the network;
- (8) Indicate previous experience in developing and managing telemedicine programs;
- (9) Provide a project management plan outlining the project's leadership and management structure, as well as its work plan, schedule, and budget.
- (10) Indicate how the telemedicine program will be coordinated throughout the state or region; and

(11) Indicate to what extent the network can be self-sustaining once established.

Applicants will be required to comply with the existing competitive bidding requirements, certification requirements, and other measures intended to ensure funds are used for their intended purpose. We recognize that we may need to waive additional rules in order to implement this pilot program, and we request that applicants identify in their application any rules that they would like us to waive for purposes of this pilot program.

Applications to participate in the pilot program will be due 30 days from the receipt of OMB approval.
