[Docket No. 001005281-0369-02; I.D. 112006D]

**Fisheries of the Caribbean, Gulf of Mexico, and South Atlantic; Coastal Migratory Pelagic Resources of the Gulf of Mexico and South Atlantic; Trip Limit Reduction****AGENCY:** National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.**ACTION:** Temporary rule; trip limit reduction.**SUMMARY:** NMFS reduces the trip limit in the commercial hook-and-line fishery for king mackerel in the northern Florida west coast subzone to 500 lb (227 kg) of king mackerel per day in or from the exclusive economic zone (EEZ). This trip limit reduction is necessary to protect the Gulf king mackerel resource.**DATES:** This rule is effective 12:01 a.m., local time, November 27, 2006, through June 30, 2007, unless changed by further notification in the **Federal Register**.**FOR FURTHER INFORMATION CONTACT:** Steve Branstetter, telephone 727-824-5305, fax 727-824-5308, e-mail [steve.branstetter@noaa.gov](mailto:steve.branstetter@noaa.gov).**SUPPLEMENTARY INFORMATION:** The fishery for coastal migratory pelagic fish (king mackerel, Spanish mackerel, cero, cobia, little tunny, and, in the Gulf of Mexico only, dolphin and bluefish) is managed under the Fishery Management Plan for the Coastal Migratory Pelagic Resources of the Gulf of Mexico and South Atlantic (FMP). The FMP was prepared by the Gulf of Mexico and South Atlantic Fishery Management Councils (Councils) and is implemented under the authority of the Magnuson-Stevens Fishery Conservation and Management Act (Magnuson-Stevens Act) by regulations at 50 CFR part 622.

On April 27, 2000, NMFS implemented the final rule (65 FR 16336, March 28, 2000) that divided the Florida west coast subzone of the eastern zone into northern and southern subzones, and established their separate quotas. The quota for the northern Florida west coast subzone is 168,750 lb (76,544 kg) (50 CFR 622.42(c)(1)(i)(A)(2)(ii)).

In accordance with 50 CFR 622.44(a)(2)(ii)(B), from the date that 75

percent of the northern Florida west coast subzone's quota has been harvested until a closure of the subzone's fishery has been effected or the fishing year ends, king mackerel in or from the EEZ may be possessed on board or landed from a permitted vessel in amounts not exceeding 500 lb (227 kg) per day.

NMFS has determined that 75 percent of the quota for Gulf group king mackerel from the northern Florida west coast subzone has been reached. Accordingly, a 500-lb (227-kg) trip limit applies to vessels in the commercial fishery for king mackerel in or from the EEZ in the northern Florida west coast subzone effective 12:01 a.m., local time, November 27, 2006. The 500-lb (227-kg) trip limit will remain in effect until the fishery closes or until the end of the current fishing year (June 30, 2007), whichever occurs first.

The Florida west coast subzone is that part of the eastern zone south and west of 25° 20.4' N. lat. (a line directly east from the Miami-Dade County, FL, boundary). The Florida west coast subzone is further divided into northern and southern subzones. The northern subzone is that part of the Florida west coast subzone that is between 26° 19.8' N. lat. (a line directly west from the Lee/ Collier County, FL, boundary) and 87° 31'06" W. long. (a line directly south from the Alabama/Florida boundary).

**Classification**

This action responds to the best available information recently obtained from the fishery. The Assistant Administrator for Fisheries, NOAA, (AA), finds good cause to waive the requirement to provide prior notice and opportunity for public comment pursuant to the authority set forth at 5 U.S.C. 553(b)(3)(B) as such prior notice and opportunity for public comment is unnecessary and contrary to the public interest. Such procedures would be unnecessary because the rule itself already has been subject to notice and comment, and all that remains is to notify the public of the closure, if warranted. Allowing prior notice and opportunity for public comment is contrary to the public interest because of the need to immediately implement this action in order to protect the fishery since the capacity of the fishing fleet allows for rapid harvest of the quota. Prior notice and opportunity for public comment will require time and would potentially result in a harvest well in excess of the established quota. For the aforementioned reasons, the AA also finds good cause to waive the 30-day delay in the effectiveness of this action under 5 U.S.C. 553(d)(3).

This action is taken under 50 CFR 622.43(a) and is exempt from review under Executive Order 12866.

**Authority:** 16 U.S.C. 1801 *et seq.*

Dated: November 21, 2006.

[I.D. 112006C]

**Atlantic Highly Migratory Species; Atlantic Bluefin Tuna Fisheries****AGENCY:** National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.**ACTION:** Temporary rule; inseason retention limit adjustment.**SUMMARY:** NMFS has determined that the daily Atlantic bluefin tuna (BFT) retention limits for the Atlantic tunas General category should be adjusted to provide reasonable opportunity to harvest the General category December time-period subquota. Therefore, NMFS increases the daily BFT retention limits for the entire month of December, including previously scheduled Restricted Fishing Days (RFDs), to provide enhanced commercial General category fishing opportunities in all areas while minimizing the risk of an overharvest of the General category BFT quota.**DATES:** The effective dates for the BFT daily retention limits are provided in Table 1 under **SUPPLEMENTARY INFORMATION**.**FOR FURTHER INFORMATION CONTACT:** Brad McHale, 978-281-9260.**SUPPLEMENTARY INFORMATION:**Regulations implemented under the authority of the Atlantic Tunas Convention Act (16 U.S.C. 971 *et seq.*) and the Magnuson-Stevens Fishery Conservation and Management Act (Magnuson-Stevens Act; 16 U.S.C. 1801 *et seq.*) governing the harvest of BFT by persons and vessels subject to U.S. jurisdiction are found at 50 CFR part 635.

The 2006 BFT fishing year began on June 1, 2006, and ends May 31, 2007. The final initial 2006 BFT specifications and General category effort controls
