SUPPLEMENTARY INFORMATION:

I. Introduction

The U.S. Nuclear Regulatory Commission (NRC) is considering issuing an exemption to BWX Technologies, Inc. (BWXT), the holder of NRC special nuclear materials License SNM–42. The proposed action would exempt BWXT from certain requirements set forth in 10 CFR 73.46(b) and Part 73 Appendix B. The exemptions would authorize the licensee to allow medical examinations to be given by licensed nurse practitioners authorized to practice medicine by the Commonwealth of Virginia. The exemptions would allow such nurses, in addition to licensed physicians, to give medical examinations that are required prior to allowing personnel to participate in physical fitness tests. The exemptions would be to requirements stated in 10 CFR 73.46(b)(10)(iii) and (iv); 73.46(b)(11)(iii) and (v); 73.46(b)(12)(ii); and Part 73 Appendix B paragraphs I.B.1.b, I.B.2.b, and I.C.

In accordance with the requirements of 10 CFR Part 51 the NRC has prepared an Environmental Assessment (EA) in support of this action. Based on the EA, the NRC has concluded that a Finding of No Significant Impact is appropriate. If approved, the exemption would be issued following the publication of this Notice.

II. EA Summary

As stated above, the staff has prepared an EA in support of the proposed action. The EA contains sensitive information and is not publicly available. The NRC

staff has concluded that issuing the proposed exemptions will not result in a significant impact to the environment. The NRC staff concluded that the proposed action will not adversely affect federally listed species or federally designated critical habitat because no federally listed species are known to occur in the project area. The NRC staff found that no historic properties will be affected by the proposed action.

The proposed action does not have a potential to affect the probability or consequences of accidents; the types or amounts of effluents; nor occupational or public radiation exposure. Therefore, there are no significant radiological environmental impacts associated with the proposed action.

III. Finding of No Significant Impact

On the basis of the EA, the NRC has concluded that there are no significant environmental impacts from the proposed action, and has determined that the preparation of an environmental impact statement is not required.
