

young, single, African American men. The study entails conducting focus groups and interviews with a sample of single African American heterosexual men, ages 18 to 45, with less than 4 years of college education to: (1) Explore participants' knowledge, attitudes and beliefs about HIV and HIV testing to inform the development of campaign messages; (2) identify the most

motivating approach, supporting data, and key messages for materials development; (3) test creative concepts, potential campaign themes, logos and names; and (4) test creative materials developed based on the findings from the previous phases of the research. Findings from this study will be used by CDC and its partners to inform current and future program activities.

We expect a total of 306 participants to be screened for eligibility. Of the 306 participants who are screened, we expect that 81 people will participate in a focus group and 72 people will participate in an interview. There are no costs to the respondents other than their time.

*Estimated Annualized Burden Hours and Burden Table:*

Respondents	Number of respondents	Number of responses per respondent	Average burden per response (in hours)	Total burden hours
Screener .....	306	1	10/60	51
Focus Group .....	81	1	2	162
Interview .....	72	1	1	72
Total .....				285
