SUPPLEMENTARY INFORMATION:

Title: 30 CFR Part 250, Subpart A, “General”.

Form(s): MMS–132, MMS–1123, and MMS–1832.

OMB Control Number: 1010–0114.

Abstract: The Outer Continental Shelf (OCS) Lands Act, as amended (43 U.S.C. 1331 *et seq.* and 43 U.S.C. 1801 *et seq.*), authorizes the Secretary of the Interior to prescribe rules and regulations to administer leasing of the OCS. Such rules and regulations will apply to all operations conducted under a lease. Operations on the OCS must preserve, protect, and develop oil and natural gas resources in a manner that is consistent with the need to make such resources available to meet the Nation’s energy needs as rapidly as possible; to balance orderly energy resource development with protection of human, marine, and coastal environments; to ensure the public a fair and equitable return on the resources of the OCS; and to preserve and maintain free enterprise competition. Section 1332(6) states that “operations in the [O]uter Continental Shelf should be conducted in a safe manner by well trained personnel using technology, precautions, and other techniques sufficient to prevent or minimize the likelihood of blowouts, loss of well control, fires, spillages, physical obstructions to other users of the waters or subsoil and seabed, or other occurrences which may cause damage to the environment or to property or endanger life or health.”

The Independent Offices Appropriations Act (31 U.S.C. 9701), the Omnibus Appropriations Bill (Pub. L. 104–133, 110 Stat. 1321, April 26, 1996), and Office of Management and Budget (OMB) Circular A–25, authorize Federal agencies to recover the full cost of services that confer special benefits. Under the Department of the Interior’s (DOI) implementing policy, the Minerals Management Service (MMS) is required to charge fees for services that provide special benefits or privileges to an identifiable non-Federal recipient

above and beyond those which accrue to the public at large.

This information collection (IC) request covers 30 CFR Part 250, Subpart A, General. This request also covers the related Notices to Lessees and Operators (NTLs) that MMS issues to clarify and provide additional guidance on some aspects of our regulations.

Requests for MMS approval may contain proprietary information related to performance standards or alternative approaches to conducting operations different from those approved and specified in MMS regulations. We will protect this proprietary information according to the Freedom of Information Act, 30 CFR Part 252, and 30 CFR 250.197, "Data and information to be made available to the public." No items of a sensitive nature are collected. Responses are mandatory.

The MMS uses the information collected under the Subpart A regulations to ensure that operations on the OCS are carried out in a safe and pollution-free manner, do not interfere with the rights of other users on the OCS, and balance the protection and development of OCS resources. Specifically, we use the information collected to:

- Review records of formal crane operator training, rigger training, crane operator qualifications, crane inspections, testing, and maintenance to ensure that lessees perform operations in a safe and workmanlike manner and that equipment is maintained in a safe condition. The MMS also uses the information to make certain that all new and existing cranes installed on OCS fixed platforms must be equipped with anti-two block safety devices, and to assure that uniform methods are employed by lessees for load testing of cranes.

- Review welding, burning, and hot tapping plans, procedures, and records to ensure that these activities are conducted in a safe and workmanlike manner by trained and experienced personnel.

- Provide lessees greater flexibility to comply with regulatory requirements through approval of alternative equipment or procedures and departures to regulations if they demonstrate equal or better compliance with the appropriate performance standards.

- Determine the capability of a well to produce oil or gas in paying quantities or to determine the possible need for additional wells resulting in minimum royalty status on a lease. If a well does not yield hydrocarbons in sufficient quantity to warrant continued operation and production, MMS uses

the information to verify the claim and to release the lessee from lease obligations. Conversely, the information is used to extend the term of the lease if additional wells will warrant continued operation and production.

- Ensure that injection of gas promotes conservation of natural resources, prevents waste, and that subsurface storage of natural gas does not unduly interfere with development and production operations under existing leases.

- Ensure the appropriateness of reimbursing lessees for costs incurred in reproducing geological and geophysical (G&G) data and information for submission to MMS and processing or reprocessing G&G information in a form and manner other than that normally used in the conduct of a lessee's business, or to determine the proper reimbursement of costs incurred during inspections.

- Record the designation of an operator authorized to act on behalf of the lessee and to fulfill the lessee's obligations under the OCS Lands Act and implementing regulations, or to record the local agent empowered to receive notices and comply with regulatory orders issued (Form MMS-1123).

- Determine if an application for right-of-use and easement serves the purpose specified in the grant when conducting exploration, development, and production activities or other operations on or off the lease; is maintained for such purposes; and does not unreasonably interfere with the operations of any other lessee.

- Provide for orderly development of leases through the use of information to determine the appropriateness of lessee requests for suspension of operations, including production. For example, MMS needs the information to determine that a suspension is necessary to: (1) Ensure proper lease development, (2) allow time to construct or negotiate use of transportation facilities, (3) allow reasonable time to enter into a sales contract, (4) allow for unavoidable situations, (5) avoid continued operations resulting in premature abandonment of a producing well(s) that would be uneconomic, (6) comply with the National Environmental Policy Act or to conduct an environmental analysis, (7) install equipment for safety and environmental protection, (8) allow time for inordinate delays encountered in obtaining required permits or consents, (9) comply with judicial decrees, or (10) avoid activities that pose a threat of serious, irreparable, or immediate harm.

- Improve safety and environmental protection on the OCS through collection and analysis of accident reports to ascertain the cause of the accidents and to determine ways to prevent recurrences.

- Ascertain when the lease ceases production or when the last well ceases production in order to determine the 180th day after the date of completion of the last production. This requirement is expanded in the final rule to include reporting when lease production is initiated, resumes before the end of the 180-day period after production ceased, and when leaseholding operations occur during the referenced 180-day interval. The MMS will use this information to efficiently maintain the lessee/operator lease status.

- Approve requests to cancel leases.
- Be informed when there could be a major disruption in the availability and supply of natural gas and oil due to natural occurrences/hurricanes, to advise the U.S. Coast Guard (USCG) in case of the need to rescue offshore workers in distress, to monitor damage to offshore platforms and drilling rigs, and to advise the news media and interested public entities when production is shut in and when resumed. The OCS operations produce more than one-quarter of the Nation's natural gas and more than one-sixth of its oil, and it is essential to know when production is interrupted. The Gulf of Mexico Region (GOMR) uses a reporting form for respondents to report evacuation statistics when necessary (Form MMS-132, Evacuation Statistics). It is sent to respondents at the onset of each "hurricane season" in the GOMR.

- Allow operators who exhibit unacceptable performance an incremental approach to improving their overall performance prior to a final decision to disqualify an operator or to pursue debarment proceedings through the execution of a performance improvement plan (PIP). The Subpart A regulations do not address the actual process that we will follow in pursuing the disqualification of operators under §§ 250.135 and 250.136. However, our internal enforcement procedures include allowing such operators to demonstrate a commitment to acceptable performance by the submission of a PIP.

- Determine that respondents have corrected all Incidents of Non-Compliance (INC)(s) identified during inspections (Form MMS-1832). The MMS issues this form to the operator. The operator then corrects the INC(s) and returns the form to the MMS Regional Supervisor no later than 14 days.

• Review records of crane inspection, testing, maintenance, and crane operator qualifications to ensure that lessees perform operations in a safe and workmanlike manner and maintain equipment in a safe condition.

Frequency: On occasion, Form MMS-132 (Evacuation Statistics) submitted daily during the emergency situation.

Estimated Number and Description of Respondents: Approximately 190 Federal and 1 State oil and gas or sulphur lessees (potential respondents).

Estimated Reporting and Recordkeeping "Hour" Burden: The currently approved annual reporting burden for this collection is 24,741 hours. The following chart details the

individual components and respective hour burden estimates of this ICR. In calculating the burdens, we assumed that respondents perform certain requirements in the normal course of their activities. We consider these to be usual and customary and took that into account in estimating the burden.

Estimated Reporting and Recordkeeping “Non-Hour Cost”

Burden: We have identified three non-hour cost burdens. Section 250.143 requires a fee for a change in designation of operator. Section 250.165 requires a State lessee applying for a right-of-use and easement on the OCS to pay a cost recovery application fee. This cost is the same as the fee for a pipeline right-of-way grant specified in 30 CFR 250.1015 and is subject to change based on that regulation. We estimate receiving only one State lease application per year. Section 250.171 requests a fee for either a Suspension of Operations or Production Request (SOO/SOP). We have not identified any other “non-hour cost” burdens associated with this collection of information.

Public Disclosure Statement: The PRA (44 U.S.C. 3501, *et seq.*) provides that an agency may not conduct or sponsor a collection of information unless it displays a currently valid OMB control

number. Until OMB approves a collection of information, you are not obligated to respond.

Comments: Before submitting an ICR to OMB, PRA section 3506(c)(2)(A) requires each agency “o=* * * to provide notice o=* * * and otherwise consult with members of the public and affected agencies concerning each proposed collection of information o=* * *”. Agencies must specifically solicit comments to: (a) Evaluate whether the proposed collection of information is necessary for the agency to perform its duties, including whether the information is useful; (b) evaluate the accuracy of the agency’s estimate of the burden of the proposed collection of information; (c) enhance the quality, usefulness, and clarity of the information to be collected; and (d) minimize the burden on the respondents, including the use of automated collection techniques or other forms of information technology.

Agencies must also estimate the “non-hour cost” burdens to respondents or recordkeepers resulting from the collection of information. Therefore, if you have costs to generate, maintain, and disclose this information, you should comment and provide your total capital and startup cost components or annual operation, maintenance, and purchase of service components. You should describe the methods you use to estimate major cost factors, including system and technology acquisition, expected useful life of capital equipment, discount rate(s), and the period over which you incur costs. Capital and startup costs include, among other items, computers and software you purchase to prepare for collecting information, monitoring, and record storage facilities. You should not include estimates for equipment or services purchased: (i) Before October 1, 1995; (ii) to comply with requirements not associated with the information collection; (iii) for reasons other than to

provide information or keep records for the Government; or (iv) as part of customary and usual business or private practices.

We will summarize written responses to this notice and address them in our submission for OMB approval. As a result of your comments, we will make any necessary adjustments to the burden in our submission to OMB.

Public Comment Procedures: The MMS's practice is to make comments, including names and addresses of respondents, available for public review. If you wish your name and/or address to be withheld, you must state this prominently at the beginning of your comment. The MMS will honor this request to the extent allowable by law; however, anonymous comments will not be considered. There may be circumstances in which we would withhold from the record a respondent's identity, as allowable by the law. If you wish us to withhold your name and/or address, you must state this prominently at the beginning of your comment. In addition, you must present a rationale for withholding this information. This rationale must demonstrate that disclosure "would constitute an unwarranted invasion of privacy." Unsupported assertions will not meet this burden. In the absence of exceptional, documentable circumstances, this information will be released. All submissions from organizations or businesses, and from individuals identifying themselves as representatives or officials of organizations or businesses, will be made available for public inspection in their entirety.
