

supplements. REU Site awards fund groups of undergraduates to work with faculty members at an institution. Half of the undergraduates in an REU site must come from other institutions. ENG also makes REU Supplement awards to NSF-funded Engineering Research Centers and to other NSF-funded researchers for comparable involvement of undergraduates.

The proposed study will be similar to the 2003 URO study. It will focus on undergraduate ENG REU participants and the faculty members who are responsible for the ENG REU awards during summer 2006 through spring 2007, and will examine in detail for the first time the activities, outcomes, and impacts of REU awards made in a single NSF directorate—ENG. The study will evaluate the longer-term effects of REU experiences with a follow-up survey of the students approximately two years later. The REU program officers in NSF's Division of Engineering Education and Centers (EEC) particularly want to learn in depth about the EEC REU Site and ERC REU Supplement awards from former REU students and awardees, any differences between the Sites and ERC Supplements, and lessons learned for subsequent proposal review and advising prospective PIs. Information will also be used for ENG Program reporting requirements. The study will examine (1) the role of the REU program in aiding participating undergraduates in a decision to pursue graduate education or careers in engineering; and (2) the relationship between how REU activities are structured and managed and participants' subsequent education and career decisions and actions.

The survey data collection will be done on the World Wide Web.

Estimate of Burden: Public reporting burden for this collection of information is estimated to average 30 minutes per response.

Respondents: Individuals.

Estimated Number of Responses per Form: 5,006.

Estimated Total Annual Burden on Respondents: 2,400 hours (413 respondents at 15 minutes per response and 4,593 respondents at 30 minutes per response).

Frequency of Response: One time for faculty, two times for students.

Dated: December 21, 2006.

Suzanne H. Plimpton,

Reports Clearance Officer, National Science Foundation.

BILLING CODE 7555-01-P

NATIONAL SCIENCE FOUNDATION

National Science Board; Commission on 21st Century Education in Science, Technology, Engineering and Mathematics; Notice of Meeting

In accordance with the Federal Advisory Committee Act (Pub. L. 92-463, as amended), the National Science Foundation announces the following meeting of the National Science Board Commission on 21st Century Education in Science, Technology, Engineering, and Mathematics:

Date and Time: The meeting will take place at 8 a.m. on January 18, 2007. Please see http://www.nsf.gov/nsb/edu_com/ for schedule updates.

Place: The meeting will be held in at the Arizona State Capitol, 1700 W. Washington Street, Phoenix, AZ 85007. Check with the information desk in the lobby of the Capitol for the meeting room.

Type of Meeting: Open.

Contact Person: Dr. Elizabeth Strickland, Commission Executive Secretary, National Science Board Office, 4201 Wilson Boulevard, Arlington, VA 22230; Phone: 703-292-4527, E-mail estrickl@nsf.gov

Purpose of Meeting: The purpose of this meeting is for the Commission to discuss its draft recommendations relating to K-12 STEM education. A provisional agenda for the meeting will be available at http://www.nsf.gov/nsb/edu_com/ on January 4, 2007.

Topics to be Discussed: K-Science, Technology, Engineering, and Mathematics Education; recommendations of the Commission.

Public Comment: Written comments to the Commission may be submitted by e-mail to NSBEdCom@nsf.gov. Those wishing to make brief public comments during the meeting may register to do so either by signing up at the information table on the day of the meeting or in advance by sending an e-mail to NSBEdCom@nsf.gov.

Dated: December 21, 2006.

Susanne Bolton,

Committee Management Officer.

NATIONAL SCIENCE FOUNDATION

National Science Board Public Service Award Committee; Notice of Meeting

In accordance with the Federal Advisory Committee Act (Pub. L. 92-463, as amended), the National Science Foundation announces the following meeting:

Name: National Science Board Public Service Award Committee (5195).

Date and Time: Tuesday January 16, 2007, 11:00 a.m. EST (teleconference meeting).

Place: The teleconference will originate from the National Science Board Office, National Science Foundation, 4201 Wilson Blvd., Arlington, Virginia 22230.

Type of Meeting: Closed.

Contact Person: Ms. Ann Noonan, National Science Board Office, National Science Foundation, 4201 Wilson Blvd., Arlington, VA 22230. Telephone: 703-292-7000.

Purpose of Meeting: To provide advice and recommendations in the selection of the NSB Public Service Award recipients.

Agenda: To review and evaluate nominations as part of the selection process for awards.

Reason for closing: The nominations being reviewed include information of a personal nature where public disclosure would constitute clearly unwarranted invasions of personal privacy. These matters are exempt from open meeting and public attendance requirements under 5 U.S.C. Appendix 10(d) and 5 U.S.C. 552b(c)(6).

Dated: December 21, 2006.

Susanne Bolton,

Committee Management Officer.

BILLING CODE 7555-01-M

NUCLEAR REGULATORY COMMISSION

[EA-06-230]

In the Matter of Louisiana Energy Services, L.P. (National Enrichment Facility); Order Modifying License For Additional Security Measures (Effective Immediately)

I

Louisiana Energy Services (LES or the Licensee) is the holder of Special Nuclear Material License No. SNM-2010 for the National Enrichment Facility (NEF) issued by the U.S. Nuclear Regulatory Commission (NRC or Commission) pursuant to 10 CFR Part 70. The Licensee is authorized by its license to construct and operate a uranium enrichment facility in accordance with the Atomic Energy Act of 1954, as amended, and 10 CFR Parts 30, 40, and 70. The LES license was issued on June 23, 2006, and is due to expire on June 23, 2036.

II

On September 11, 2001, terrorists simultaneously attacked targets in New York, N.Y., and Washington, D.C., utilizing large commercial aircraft as weapons. In response to the attacks and intelligence information subsequently obtained, the Commission issued a number of Safeguards and Threat Advisories to its licensees in order to strengthen licensees' capabilities and readiness to respond to a potential attack on a nuclear facility. The Commission has also communicated with other Federal, State and local government agencies and industry representatives to discuss and evaluate the current threat environment in order to assess the adequacy of security measures at licensed facilities. In addition, the Commission has been conducting a comprehensive review of its safeguards and security programs and requirements.

As a result of its consideration of current safeguards and security plan requirements, as well as a review of information provided by the intelligence community, the Commission has determined that certain additional measures are required to be implemented by the Licensee as prudent measures to address the current threat environment. Therefore, the Commission is imposing requirements, set forth in the Attachments 1 and 2¹ of this Order, which supplement existing regulatory requirements, to provide the Commission with reasonable assurance that the public health and safety and common defense and security continue to be adequately protected in the current threat environment. These requirements will remain in effect until the Commission determines otherwise.

The Commission recognizes that some of the requirements set forth in Attachments 1 and 2² to this Order may already have been initiated by the Licensee on its own. It is also recognized that some measures may need to be tailored to specifically accommodate the specific circumstances and characteristics existing at the licensee's facility to achieve the intended objectives and avoid any unforeseen effect on safe operation.

In light of the current threat environment, the Commission concludes that the Additional Security Measures must be embodied in an Order, consistent with the established regulatory framework. In order to provide assurance that the Licensee is implementing prudent measures to achieve an adequate level of protection to address the current threat environment, Materials License SNM-2010 shall be modified to include the requirements identified in Attachments 1 and 2 to this Order. In addition, pursuant to 10 CFR 2.202 and 70.81, I find that, in light of the circumstances described above, the public health, safety, and interest, and the common defense and security require that this Order be immediately effective.

III

Accordingly, pursuant to Sections 53, 62, 63, 81, 147, 149, 161b, 161i, 161o, 182, and 186 of the Atomic Energy Act of 1954, as amended, and the

¹ Attachments 1 and 2 contain safeguards information and will not be released to the public.

² To the extent that specific measures identified in the Attachments to this Order require actions pertaining to the Licensee's possession and use of chemicals, such actions are being directed on the basis of the potential impact of such chemicals on radioactive materials and activities subject to NRC regulation.

Commission's regulations in 10 CFR 2.202 and 10 CFR Parts 30, 40, and 70, *it is hereby ordered*, effective immediately, that Material License SNM-2010 is modified as follows:

A. The Licensee shall, notwithstanding the provisions of any Commission regulation to the contrary, comply with the requirements described in Attachments 1 and 2 to this Order. The Licensee shall immediately start implementation of the requirements in Attachments 1 and 2 to the Order and shall complete implementation, unless otherwise specified in Attachments 1 and 2 to this order, no later than 6 months prior to facility operation.

B. 1. The Licensee shall, within twenty (20) days of the date of this Order, notify the Commission, (1) if it is unable to comply with any of the requirements described in the Attachment, (2) if compliance with any of the requirements is unnecessary in its specific circumstances, or (3) if implementation of any of the requirements would cause the Licensee to be in violation of the provisions of any Commission regulation or its license.

The notification shall provide the Licensee's justification for seeking relief from or variation of any specific requirement.

2. If the Licensee considers that implementation of any of the requirements described in Attachment 1 and 2 to this Order would adversely affect safe operation of its facility, the Licensee must notify the Commission, within twenty (20) days of this Order, of the adverse safety impact, the basis for its determination that the requirement has an adverse safety impact, and either a proposal for achieving the same objectives specified in Attachments 1 and 2 in question, or a schedule for modifying the facilities to address the adverse safety condition. If neither approach is appropriate, the Licensee must supplement its response to Condition B1 of this Order to identify the condition as a requirement with which it cannot comply, with attendant justifications as required in Condition B1.

C. 1. The Licensee shall, within twenty (20) days of the date of this Order, submit to the Commission, a schedule for achieving compliance with each requirement described in the Attachment.

2. The Licensee shall report to the Commission when it has achieved full compliance with the requirements described in the Attachment.

D. Notwithstanding any provision of the Commission's regulations to the contrary, all measures implemented or
