B. What is the Agency's Authority for Taking this Action?

Section 4(g)(2) of FIFRA as amended directs that, after submission of all data concerning a pesticide active ingredient, the Administrator shall determine whether pesticides containing such active ingredient are eligible for reregistration, before calling in product specific data on individual end-use products and either reregistering products or taking other "appropriate regulatory action."

Section 408(q) of the Federal Food, Drug, and Cosmetic Act (FFDCA), 21 U.S.C. 346a(q), requires EPA to review tolerances and exemptions for pesticide residues in effect as of August 2, 1996, to determine whether the tolerance or exemption meets the requirements of section 408(b)(2) or (c)(2) of FFDCA. This review was completed by August 3, 2006.

SUPPLEMENTARY INFORMATION:

**I. Information About the Project/
Document**

This draft report presents a survey of the current state of knowledge of the potential impacts of climate change and variability on aeroallergens—pollens, mold, and indoor allergens—in the United States and the allergenic illnesses associated with them. Allergies are prevalent in the U.S. and impose substantial economic and quality of life burdens. While limited data suggest that aeroallergen levels have remained relatively stable, the prevalence of allergenic illnesses in the U.S. has increased over the past 30 years, a trend that appears to be mirrored in other countries. Overall, experimental and observational data indicate that pollen production is likely to increase in many parts of the U.S. Phenologic advance is likely to occur for numerous species of plants, especially trees, and increases in allergen content, and thus, potency, of some aeroallergens are possible.
