#### Background

In May 2004, EPA convened a technical working group (TWG) with personnel from the Department of Defense, the Department of the Interior, the Association of State and Territorial Solid Waste Management Officials, and the Tribal Association for Solid Waste and Emergency Response. The TWG

was tasked with developing a recommended methodology to evaluate explosive safety hazards at munitions response sites. When finalized the methodology developed by the TWG and the work group organizations will be available to evaluate baseline explosive hazards at munitions response sites, and to evaluate the effects of removal or remedial actions under CERCLA, including changes to land use and land use activities. As part of this effort, the TWG developed additional information that can be found on the EPA Web site listed above.

EPA is requesting public comment on the draft Guidance. An electronic comment form is posted on the same link as the draft Guidance. To be considered, all comments must be provided on this comment form and submitted to the email address provided on the form.

After considering the comments, EPA, the Department of Defense, and the Department of the Interior will make available a final Munitions and Explosives of Concern Hazard Assessment document issued as joint guidance.
