[Docket No. 001005281-0369-02; I.D. 010507D]

Fisheries of the Caribbean, Gulf of Mexico, and South Atlantic; Coastal Migratory Pelagic Resources of the Gulf of Mexico and South Atlantic; Trip Limit Increase

AGENCY: National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Temporary rule; inseason trip limit increase.

SUMMARY: NMFS increases the trip limit in the commercial hook-and-line fishery for king mackerel in the Florida east coast subzone to 75 fish per day in or from the exclusive economic zone (EEZ). This trip limit increase is necessary to maximize the socioeconomic benefits of the quota.

DATES: This rule is effective 12:01 a.m., local time, February 1, 2007, through March 31, 2007, unless changed by further notification in the **Federal Register**.

FOR FURTHER INFORMATION CONTACT: Steve Branstetter, telephone: 727-824-5305, fax: 727-824-5308, e-mail: Steve.Branstetter@noaa.gov.

FOR COASTAL MIGRATORY PELAGIC FISH (KING MACKEREL, SPANISH MACKEREL, CERO, COBIA, LITTLE TUNNY, AND, IN THE GULF OF MEXICO ONLY, DOLPHIN AND BLUEFISH) IS MANAGED UNDER THE FISHERY MANAGEMENT PLAN FOR THE COASTAL MIGRATORY PELAGIC RESOURCES OF THE GULF OF MEXICO AND SOUTH ATLANTIC (FMP). THE FMP WAS PREPARED BY THE GULF OF MEXICO AND SOUTH ATLANTIC FISHERY MANAGEMENT COUNCILS (COUNCILS) AND IS IMPLEMENTED UNDER THE AUTHORITY OF THE MAGNUSON-STEVENS FISHERY CONSERVATION AND MANAGEMENT ACT (MAGNUSON-STEVENS ACT) BY REGULATIONS AT 50 CFR PART 622.

Based on the Councils' recommended total allowable catch and the allocation ratios in the FMP, on April 30, 2001 (66 FR 17368, March 30, 2001) NMFS implemented a commercial quota of 2.25 million lb (1.02 million kg) for the eastern zone (Florida) of the Gulf migratory group of king mackerel. That quota is further divided into separate quotas for the Florida east coast subzone and the northern and southern Florida west coast subzones. The quota implemented for the Florida east coast subzone is 1,040,625 lb (472,020 kg) (50 CFR 622.42(c)(1)(i)(A)(1)).

In accordance with 50 CFR 622.44(a)(2)(i), beginning on February 1, if less than 75 percent of the Florida east coast subzone quota has been harvested by that date, king mackerel in or from that subzone may be possessed on board or landed from a permitted vessel in amounts not exceeding 75 fish per day. The 75-fish daily trip limit will continue until a closure of the subzone's fishery has been effected or the fishing year ends on March 31, 2007.

NMFS has determined that 75 percent of the quota for Gulf group king mackerel for vessels using hook-and-line gear in the Florida east coast subzone will not be reached before February 1, 2007. Accordingly, a 75-fish trip limit applies to vessels in the commercial hook-and-line fishery for king mackerel in or from the EEZ in the Florida east coast subzone effective 12:01 a.m., local time, February 1, 2007. The 75-fish trip limit will remain in effect until the fishery closes or until the end of the current fishing season (March 31, 2007) for this subzone. From November 1 through March 31, the Florida east coast subzone of the Gulf group king mackerel is that part of the eastern zone north of 25°20.4' N. lat. (a line directly east from the Miami-Dade County, FL, boundary).

Classification

This action responds to the best available information recently obtained from the fishery. The Assistant Administrator for Fisheries, NOAA,

(AA) finds good cause to waive the requirement to provide prior notice and opportunity for public comment pursuant to the authority set forth in 5 U.S.C. 553(b)(B), as such prior notice and opportunity for public comment is unnecessary and contrary to the public interest. Such procedures are unnecessary because the rule itself already has been subject to notice and comment, and all that remains is to notify the public of the trip limit increase. Allowing prior notice and opportunity for public comment for this trip limit increase is contrary to the public interest because it requires time, thus delaying fishermen's ability to catch more king mackerel than the present trip limit allows and preventing fishermen from reaping the socioeconomic benefits derived from this increase in daily catch.

As this action allows fishermen to increase their harvest of king mackerel from 50 fish to 75 fish per day in or from the EEZ of the Florida east coast subzone, the AA finds it relieves a restriction and may go into effect on its effective date pursuant to 5 U.S.C. 553(d)(1). This action is taken under 50 CFR 622.43(a) and is exempt from review under Executive Order 12866.

Authority: 16 U.S.C. 1801 *et seq.*

Dated: January 18, 2007.

James P. Burgess,

Acting Director, Office of Sustainable Fisheries, National Marine Fisheries Service.

National Oceanic and Atmospheric Administration

50 CFR Part 679

[Docket No. 060216044-6044-01; I.D. 011707G]

Fisheries of the Exclusive Economic Zone Off Alaska; Pollock in Statistical Area 630 in the Gulf of Alaska

AGENCY: National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Temporary rule; closure.

SUMMARY: NMFS is prohibiting directed fishing for pollock in Statistical Area 630 in the Gulf of Alaska (GOA). This action is necessary to prevent exceeding the A season allowance of the 2007 total allowable catch (TAC) of pollock for Statistical Area 630 in the GOA.

DATES: Effective 1200 hrs, Alaska local time (A.l.t.), January 22, 2007, through 1200 hrs, A.l.t., March 10, 2007.

FOR FURTHER INFORMATION CONTACT: Jennifer Hogan, 907-586-7228.

SUPPLEMENTARY INFORMATION: NMFS manages the groundfish fishery in the GOA exclusive economic zone according to the Fishery Management Plan for Groundfish of the Gulf of Alaska (FMP) prepared by the North Pacific Fishery Management Council under authority of the Magnuson-Stevens Fishery Conservation and Management Act. Regulations governing fishing by U.S. vessels in accordance with the FMP appear at subpart H of 50 CFR part 600 and 50 CFR part 679.

The A season allowance of the 2007 TAC of pollock in Statistical Area 630 in the GOA is 3,234 metric tons (mt) as established by the 2006 and 2007 harvest specifications for groundfish of the GOA (71 FR 10870, March 3, 2006).

In accordance with § 679.20(d)(1)(i), the Regional Administrator has determined that the A season allowance of the 2007 TAC of pollock in Statistical Area 630 in the GOA will soon be reached. Therefore, the Regional Administrator is establishing a directed fishing allowance of 2,934 mt, and is setting aside the remaining 300 mt as bycatch to support other anticipated groundfish fisheries. In accordance with § 679.20(d)(1)(iii), the Regional Administrator finds that this directed fishing allowance has been reached. Consequently, NMFS is prohibiting directed fishing for pollock in Statistical Area 630 in the GOA.

After the effective date of this closure the maximum retainable amounts at § 679.20(e) and (f) apply at any time during a trip.

Classification

This action responds to the best available information recently obtained from the fishery. The Assistant Administrator for Fisheries, NOAA (AA), finds good cause to waive the requirement to provide prior notice and opportunity for public comment pursuant to the authority set forth at 5 U.S.C. 553(b)(B) as such requirement is impracticable and contrary to the public interest. This requirement is impracticable and contrary to the public interest as it would prevent NMFS from responding to the most recent fisheries data in a timely fashion and would delay the closure of pollock in Statistical Area 630 in the GOA. NMFS was unable to publish a notice providing time for public comment
