opportunity for public comment while seeking OMB approval to extend the existing paperwork clearance for the Rule. All comments should be filed as prescribed in the **ADDRESSES** section above, and must be received on or before February 23, 2007.

The Rule, which implements the Energy Policy Act of 1992, Pub. L. 102-486, requires disclosure of specific information on labels posted on fuel dispensers for non-liquid alternative fuels and on labels on Alternative Fueled Vehicles (AFVs). To ensure the accuracy of these disclosures, the Rule also requires that sellers maintain records substantiating product-specific disclosures they include on these labels.

### Burden Statement

It is common practice for alternative fuel industry members to determine and monitor fuel ratings in the normal course of their business activities. This is because industry members must know and determine the fuel ratings of their products in order to monitor quality and to decide how to market them. "Burden" for PRA purposes is defined to exclude effort that would be expended regardless of any regulatory requirement. 5 CFR 1320.2(b)(2). Moreover, as originally anticipated when the Rule was promulgated in 1995, many of the information collection requirements and the originally-estimated hours were associated with one-time start up tasks of implementing standard systems and processes.

Other factors also limit the burden associated with the Rule. Certification may be a one-time event or require only infrequent revision. Disclosures on electric vehicle fuel dispensing systems may be useable for several years.<sup>2</sup> Nonetheless, there is still some burden associated with posting labels. There also will be some minimal burden associated with new or revised certification of fuel ratings and recordkeeping. The burden on vehicle manufacturers is limited because only newly-manufactured vehicles will require label posting and manufacturers produce very few new models each year.

*Estimated total annual hours burden:* 24,000 total burden hours, rounded

#### *Non-liquid alternative fuels:*

*Certification:* Staff estimates that the Rule's fuel rating certification requirements will affect approximately 550 industry members (compressed natural gas producers and distributors and manufacturers of electric vehicle

fuel dispensing systems) and consume approximately one hour each per year for a total of 550 hours.

*Recordkeeping:* Staff estimates that all 1,900 industry members (non-liquid fuel producers, distributors, and retailers) will be subject to the Rule's recordkeeping requirements (associated with fuel rating certification) and that compliance will require approximately one-tenth hour each per year for a total of 190 hours.

*Labeling:* Staff estimates that labeling requirements will affect approximately nine of every ten industry members (or roughly 1,700 members), but that the number of annually affected members is only 340 because labels may remain effective for several years (staff assumes that in any given year approximately 20% of 1,700 industry members will need to replace their labels). Staff estimates that industry members require approximately one hour each per year for labeling their fuel dispensers for a total of 340 hours.

Sub-total: 1,080 hours (550 + 190 + 340).

#### *AFV manufacturers:*

*Recordkeeping:* Staff estimates that all 58 manufacturers will require 30 minutes to comply with the Rule's recordkeeping requirements for a total of 29 hours.

*Producing labels:* Staff estimates 2.5 hours as the average time required of manufacturers to produce labels for each of the five new AFV models introduced industry-wide each year for a total of 12.5 hours.

*Posting labels:* Staff estimates 2 minutes as the average time to comply with the posting requirements for each of the approximately 680,000 new AFVs manufactured each year for a total of 22,667 hours.

Sub-total: 22,709 hours (29 + 12.5 + 22,667).

Thus, the total burden for these industries combined is approximately 24,000 hours (1,080 + 22,709), rounded.

Estimated labor costs: \$698,000, rounded.

Labor costs are derived by applying appropriate hourly cost figures to the burden hours described above. According to Bureau of Labor Statistics data for 2005 (most recent available whole-year information), the average compensation for producers and distributors in the fuel industry is \$19.34 per hour and \$9.13 per hour for service station employees; the average compensation for workers in the vehicle industry is \$29.90 per hour.

#### *Non-liquid alternative fuels:*

*Certification and labeling:* Generally, all of the estimated hours except for recordkeeping will be performed by

producers and distributors of fuels. Thus, the associated labor costs would be \$17,212.60. [(550 certification hours + 340 labeling hours) × \$19.34]

*Recordkeeping:* Only 1/6 of the total 190 recordkeeping hours will be performed by the producers and distributors of fuels (1/6 of 190 hours = approximately 32 hours; 32 hours × \$19.34 = \$618.88); the other 5/6 is attributable to service station employees (5/6 of 190 hours = approximately 158 hours; 158 hours × \$9.13 = \$1,442.54). Thus, the labor cost due to recordkeeping for the entire industry is approximately \$2,061.42 (\$618.88 for producers and distributors of fuels + \$1,442.54 for service station employees) and the total paperwork related labor cost for the entire industry is approximately \$19,274.02 (\$17,212.60 for certification and labeling costs + \$2,061.42 for recordkeeping costs).

#### *AFV manufacturers:*

The maximum labor cost for the entire industry is approximately \$678,999.10 per year for recordkeeping and producing and posting labels (22,709 total hours × \$29.90/hour).

Thus, the estimated total labor cost for both industries for all paperwork requirements is \$698,000 (\$19,274.02 + \$678,999.10) per year, rounded.

Estimated annual non-labor cost burden: \$259,000 rounded.

#### *Non-liquid alternative fuels:*

Staff believes that there are no current start-up costs associated with the Rule, inasmuch as the Rule has been effective since 1995. Industry members, therefore, have in place the capital equipment and means necessary to determine automotive fuel ratings and comply with the Rule. Industry members, however, incur the cost of procuring fuel dispenser and AFV labels to comply with the Rule. The estimated annual fuel labeling cost, based on estimates of 540 fuel dispensers (assumptions: an estimated 20% of 1,350 total fuel retailers need to replace labels in any given year given an approximate five-year life for labels—i.e., 270 retailers—multiplied by an average of two dispensers per retailer) at thirty-eight cents for each label (per industry sources), is \$205.00 (\$0.38 × 540).

#### *AFV manufacturers:*

Here, too, staff believes that there are no current start-up costs associated with the Rule, for the same reasons as stated immediately above regarding the non-liquid alternative fuel industry.

However, based on the labeling of an estimated 680,000 new and used AFVs each year at thirty-eight cents for each label (per industry sources), the annual

<sup>2</sup> Label specifications were designed to produce labels to withstand the elements for several years.

AFV labeling cost is estimated to be \$258,400 (\$0.38 × 680,000).

Thus, the estimated total annual non-labor cost burden associated with the Rule is \$259,000 (\$205 + \$258,400), rounded.

General Counsel.

**SUPPLEMENTARY INFORMATION:**

**Background**

Section 673(2) of the Omnibus Budget Reconciliation Act (OBRA) of 1981 (42 U.S.C. 9902(2)) requires the Secretary of the Department of Health and Human Services to update, at least annually, the poverty guidelines, which shall be used as an eligibility criterion for the Community Services Block Grant program. The poverty guidelines also are used as an eligibility criterion by a number of other Federal programs. The poverty guidelines issued here are a simplified version of the poverty thresholds that the Census Bureau uses to prepare its estimates of the number of individuals and families in poverty.

As required by law, this update is accomplished by increasing the latest published Census Bureau poverty thresholds by the relevant percentage change in the Consumer Price Index for All Urban Consumers (CPI-U). The guidelines in this 2007 notice reflect the 3.2 percent price increase between calendar years 2005 and 2006. After this inflation adjustment, the guidelines are rounded and adjusted to standardize the differences between family sizes. The same calculation procedure was used this year as in previous years. (Note that these 2007 guidelines are roughly equal to the poverty thresholds for calendar year 2006 which the Census Bureau expects to publish in final form in

August 2007.) The guideline figures shown represent annual income.
