**SUPPLEMENTARY INFORMATION:**

**Proposed Project**

*"Pilot Study of Proposed Nursing Home Survey on Resident Safety"*

The activity is an expansion and refinement of AHRQ's Hospital Survey on Patient Safety Culture (HSOPSC) which was developed and released to the public for use in November 2004. This proposed new tool is based on the HSOPSC but also contains new and revised items as well as dimensions that more accurately apply to the nursing home setting. The instrument will be pilot tested with staff in 40 nursing homes. The data collected will be analyzed to determine the psychometric properties of the survey's items and dimensions and provide information for the revision and shortening of the final survey based on an assessment of its reliability and construct validity. The final survey will be made publicly available to enable nursing homes to assess their resident safety culture.

**Methods of Collection**

A purposive sample of 40 nursing homes will be recruited and selected. These nursing homes will represent a distribution of bed size, nature of ownership (non-profit/for-profit), urbanicity (urban/rural), and geographic region of the United States. Recruited nursing homes will be allocated to each category in numbers roughly
