PHMSA will request a three-year term of approval for each information collection activity and, when approved by OMB, publish notice of the approval in the **Federal Register**.

PHMSA requests comments on the following information collections:

Title: Requirements for Cargo Tanks.
OMB Control Number: 2137-0014.

Summary: This information collection consolidates and describes the information collection provisions in parts 178 and 180 of the HMR involving the manufacture, qualification, maintenance and use of all specification cargo tank motor vehicles. It also includes the information collection and recordkeeping requirements for persons who are engaged in the manufacture, assembly, requalification and maintenance of DOT specification cargo tank motor vehicles. The types of information collected include:

(1) *Registration Statements:* Cargo tank manufacturers and repairers, and cargo tank motor vehicle assemblers are required to be registered with DOT by furnishing information relative to their qualifications to perform the functions in accordance with the HMR. The registration statements are used to identify these persons in order for DOT to ensure that they possess the knowledge and skills necessary to perform the required functions and they are performing the specified functions in accordance with the applicable regulations.

(2) *Requalification and maintenance reports:* These reports are prepared by persons who requalify or maintain cargo tanks. This information is used by cargo tank owners, operators and users, and DOT compliance personnel to verify that the cargo tanks are requalified, maintained and are in proper condition for the transportation of hazardous materials.

(3) *Manufacturers' data reports, certificates and related papers:* These reports are prepared by cargo tank manufacturers and certifiers, and are used by cargo tank owners, operators, users and DOT compliance personnel to verify that a cargo tank motor vehicle was designed and constructed to meet all requirements of the applicable specification.

Affected Public: Manufacturers, assemblers, repairers, requalifiers, certifiers and owners of cargo tanks.

Annual Reporting and Recordkeeping Burden:

Number of Respondents: 41,366.

Total Annual Responses: 132,600.

Total Annual Burden Hours: 102,021.

Title: Inspection and Testing of Portable Tanks and Intermediate Bulk Containers.

OMB Control Number: 2137-0018.

Summary: This information collection consolidates provisions for documenting qualifications, inspections, tests and approvals

pertaining to the manufacture and use of portable tanks and intermediate bulk containers under various provisions of the Hazardous Materials Regulations (49 CFR Parts 171–180). It is necessary to ascertain whether portable tanks and intermediate bulk containers have been qualified, inspected, and retested in accordance with the HMR. The information is used to verify that certain portable tanks and intermediate bulk containers meet required performance standards prior to their being authorized for use, and to document periodic requalification and testing to ensure the packagings have not deteriorated due to age or physical abuse to a degree that would render them unsafe for the transportation of hazardous materials.

Applicable sections include, but are not limited to: § 173.32—requirements for the use of portable tanks; § 173.38—hazardous materials in intermediate bulk containers; § 178.273—approval of specification IM portable tanks and UN portable tanks; § 178.801—general requirements for intermediate bulk containers; § 180.352—requirements for retest and inspection of intermediate bulk containers; and § 180.605—requirements for periodic testing, inspection and repair of portable tanks.

Affected Public: Manufacturers and owners of portable tanks and intermediate bulk containers.

Annual Reporting and Recordkeeping Burden:

Number of Respondents: 8,770.
Total Annual Responses: 86,100.
Total Annual Burden Hours: 66,390.
Frequency of collection: On occasion.

Title: Hazardous Materials Incident Reports.

Summary: This collection is applicable upon occurrence of incidents as prescribed in §§ 171.15 and 171.16. A Hazardous Materials Incident Report, DOT Form F 5800.1, must be completed by a person in physical possession of a hazardous material at the time a hazardous material incident occurs in transportation, such as a release of materials, serious accident, evacuation or closure of a main artery. Incidents meeting criteria in § 171.15 also require a telephonic report. This information collection enhances the Department's ability to evaluate the effectiveness of its regulatory program, determine the need for regulatory changes, and address emerging hazardous materials transportation safety issues. The requirements apply to all interstate and intrastate carriers engaged in the transportation of hazardous materials by rail, air, water, and highway.

Affected Public: Shippers and carriers of hazardous materials.

Title: Flammable Cryogenic Liquids.
OMB Control Number: 2137–0542.

Summary: Provisions in § 177.840 specify certain safety procedures and documentation requirements for drivers of motor vehicles transporting flammable cryogenic liquids. This information allows the driver to take appropriate remedial actions to prevent a catastrophic release of the flammable cryogenics should the temperature of the material begin to rise excessively or if the travel time will exceed the safe travel time. These requirements are intended to ensure a high level of safety when transporting flammable cryogenics due to their extreme flammability and high compression ratio when in a liquid state.

Affected Public: Carriers of cryogenic materials.
