

exemptions to individuals who have minimal moving violations and that being in the program promotes a driver to maintain a safe driving record.

In regard to the two comments, the discussion under the heading, "Basis for Exemption Determination," explains in detail the evaluation methods the Agency utilizes prior to granting an exemption to ensure that the granting of an exemption is likely to achieve an equivalent or greater level of safety than would be achieved without the exemption. To evaluate the effect of these exemptions on safety, FMCSA considered not only the medical reports about the applicants' vision, but also their driving records and experience with the vision deficiency, and found that all 33 applicants met the Program's eligibility criteria. FMCSA will continue to monitor each applicant's driving safety record on a semi-annual basis to ensure continued compliance with the Program.

Another anonymous individual believes that if a driver has a driving history with the vision deficiency and he/she has had no accidents, then the process should not take so long.

The Agency has 180 days from the date a completed application is submitted to make a final determination whether to grant the exemption. FMCSA strives to expedite the processing of all applications received and is often successful in completing the process in less time. It is the Agency's responsibility to ensure that the granting of an exemption is likely to achieve an equivalent or greater level of safety than would be achieved without the exemption.

Conclusion

Based upon its evaluation of the 33 exemption applications, FMCSA exempts Kreis C. Baldrige, James L. Baynes, Daniel H. Bungartz, Thomas L. Carter, Orlando Colon, Donald D. Daniels, Jimmy W. Deadwyler, William E. Dolson, Michael A. Fouch, Paul R. Kerpsie, Gerald D. Larson, Carl A. Lohrbach, Donald R. McCracken, Sharon D. McDaniel, Larry E. McMillan, James E. Menz, William F. Nickel, Jeffrey L. Olson, John J. Payne, Chris H. Pedersen, Timmy J. Pottebaum, Jerald W. Rehnke, Donnie R. Riggs, Luis H. Sanchez, James A. Shepard, Timothy L. Shorey, Herbert W. Smith, Phillip L. Smith, Randall S. Surber, Roger A. Thein, Jr., Ernest W. Waff, Mikiel J. Wagner, and Joseph W. Wigley from the vision requirement in 49 CFR 391.41(b)(10), subject to the requirements cited above (49 CFR 391.64(b)).

In accordance with 49 U.S.C. 31136(e) and 31315, each exemption will be valid for 2 years unless revoked earlier by FMCSA. The exemption will be revoked if: (1) The person fails to comply with the terms and conditions of the exemption; (2) the exemption has resulted in a lower level of safety than was maintained before it was granted; or (3) continuation of the exemption would not be consistent with the goals and objectives of 49 U.S.C. 31136 and 31315.

If the exemption is still effective at the end of the 2-year period, the person may apply to FMCSA for a renewal under procedures in effect at that time.

Issued on: February 23, 2007.

Larry W. Minor,

Office Director, Bus and Truck Standards and Operations.

BILLING CODE 4910-EX-P

DEPARTMENT OF TRANSPORTATION

Federal Motor Carrier Safety Administration

[Docket No. FMCSA-2006-26600]

Qualification of Drivers; Exemption Applications; Diabetes

AGENCY: Federal Motor Carrier Safety Administration (FMCSA).

ACTION: Notice of applications for exemption from the diabetes standard; request for comments.

SUMMARY: FMCSA announces receipt of applications from 55 individuals for exemptions from the prohibition against persons with insulin-treated diabetes mellitus (ITDM) operating commercial motor vehicles (CMVs) in interstate commerce. If granted, the exemptions would enable these individuals with ITDM to operate commercial motor vehicles in interstate commerce.

DATES: Comments must be received on or before April 2, 2007.

ADDRESSES: You may submit comments identified by Department of Transportation (DOT) Docket Management System (DMS) Docket Number FMCSA-2006-26600 using any of the following methods:

- *Web Site:* <http://dmses.dot.gov>. Follow the instructions for submitting comments on the DOT electronic docket site.
- *Fax:* 1-202-493-2251.
- *Mail:* Docket Management Facility; U.S. Department of Transportation, 400 Seventh Street, SW., Nassif Building, Room PL-401, Washington, DC 20590-0001.
- *Hand Delivery:* Room PL-401 on the plaza level of the Nassif Building,

400 Seventh Street, SW., Washington, DC, between 9 a.m. and 5 p.m., Monday through Friday, except Federal Holidays.

• *Federal eRulemaking Portal:* Go to <http://www.regulations.gov>. Follow the on-line instructions for submitting comments.

All submissions must include the Agency name and docket number for this Notice. Note that all comments received will be posted without change to <http://dms.dot.gov>, including any personal information provided. Please see the Privacy Act heading under Regulatory Notices. To read background documents or comments received, go to <http://dms.dot.gov> or to Room PL-401 on the plaza level of the Nassif Building, 400 Seventh Street, SW., Washington, DC between 9 a.m. and 5 p.m. Monday through Friday, except Federal holidays.

Docket: For access to the docket to read background documents or comments received, go to <http://dms.dot.gov> at any time or Room PL-401 on the plaza level of the Nassif Building, 400 Seventh Street, SW., Washington, DC, between 9 a.m. and 5 p.m., Monday through Friday, except Federal holidays. The DMS is available 24 hours each day, 365 days each year. If you want acknowledgment that we received your comments, please include a self-addressed, stamped envelope or postcard or print the acknowledgement page that appears after submitting comments on-line.

Privacy Act: Anyone may search the electronic form of all comments received into any of our dockets by the name of the individual submitting the comment (or of the person signing the comment, if submitted on behalf of an association, business, labor union, etc.). You may review the DOT's complete Privacy Act Statement in the **Federal Register** published on April 11, 2000 (65 FR 19477; Apr. 11, 2000). This information is also available at <http://dms.dot.gov>.

FOR FURTHER INFORMATION CONTACT: Dr. Mary D. Gunnels, Chief, Physical Qualifications Division, (202) 366-4001, maggi.gunnels@dot.gov, FMCSA, Department of Transportation, 400 Seventh Street, SW., Room 8301, Washington, DC 20590-0001. Office hours are from 8:30 a.m. to 5 p.m., Monday through Friday, except Federal holidays.

SUPPLEMENTARY INFORMATION:

Background

Under 49 U.S.C. 31136(e) and 31315, FMCSA may grant an exemption for a 2-year period if it finds "such exemption would likely achieve a level of safety

that is equivalent to, or greater than, the level that would be achieved absent such exemption." The statute also allows the Agency to renew exemptions at the end of the 2-year period. The 55 individuals listed in this notice have recently requested an exemption from the diabetes prohibition in 49 CFR 391.41(b)(3), which applies to drivers of CMVs in interstate commerce. Accordingly, the Agency will evaluate the qualifications of each applicant to determine whether granting the exemption will achieve the required level of safety mandated by the statute.

Qualifications of Applicants

James F. Andrews

Mr. Andrews, age 43, has had ITDM since 2001. His endocrinologist examined him in 2006 and certified that he has had no hypoglycemic reactions resulting in loss of consciousness, requiring the assistance of another person, or resulting in impaired cognitive function that occurred without warning in the past 5 years; understands diabetes management and monitoring; and has stable control of his diabetes using insulin, and is able to drive a CMV safely. Mr. Andrews meets the requirements of the vision standard at 49 CFR 391.41(b)(10). His ophthalmologist examined him in 2006 and certified that he does not have diabetic retinopathy. He holds a Class A Commercial Driver's License (CDL) from New Hampshire.

Roger D. Balzan

Mr. Balzan, 65, has had ITDM since 2001. His endocrinologist examined him in 2006 and certified that he has had no hypoglycemic reactions resulting in loss of consciousness, requiring the assistance of another person, or resulting in impaired cognitive function that occurred without warning in the past 5 years; understands diabetes management and monitoring; and has stable control of his diabetes using insulin, and is able to drive a CMV safely. Mr. Balzan meets the requirements of the vision standard at 49 CFR 391.41(b)(10). His optometrist examined him in 2006 and certified that he does not have diabetic retinopathy. He holds a Class D operator's license from Arizona.

Ronald K. Barker

Mr. Barker, 55, has had ITDM since 1988. His endocrinologist examined him in 2006 and certified that he has had no hypoglycemic reactions resulting in loss of consciousness, requiring the assistance of another person, or resulting in impaired cognitive function

that occurred without warning in the past 5 years; understands diabetes management and monitoring; and has stable control of his diabetes using insulin, and is able to drive a CMV safely. Mr. Barker meets the requirements of the vision standard at 49 CFR 391.41(b)(10). His ophthalmologist examined him in 2006 and certified that he does not have diabetic retinopathy. He holds a Class C operator's license from California.

James A. Bettis

Mr. Bettis, 31, has had ITDM since 1984. His endocrinologist examined him in 2006 and certified that he has had no hypoglycemic reactions resulting in loss of consciousness, requiring the assistance of another person, or resulting in impaired cognitive function that occurred without warning in the past 5 years; understands diabetes management and monitoring; and has stable control of his diabetes using insulin, and is able to drive a CMV safely. Mr. Bettis meets the requirements of the vision standard at 49 CFR 391.41(b)(10). His ophthalmologist examined him in 2006 and certified that he has stable nonproliferative diabetic retinopathy. He holds a Class B CDL from Missouri.

Daniel W. Bezdek

Mr. Bezdek, 26, has had ITDM since 1987. His endocrinologist examined him in 2006 and certified that he has had no hypoglycemic reactions resulting in loss of consciousness, requiring the assistance of another person, or resulting in impaired cognitive function that occurred without warning in the past 5 years; understands diabetes management and monitoring; and has stable control of his diabetes using insulin, and is able to drive a CMV safely. Mr. Bezdek meets the requirements of the vision standard at 49 CFR 391.41(b)(10). His ophthalmologist examined him in 2006 and certified that he does not have diabetic retinopathy. He holds a Class B CDL from Ohio.

James A. Burchette

Mr. Burchette, 46, has had ITDM since 1996. His endocrinologist examined him in 2006 and certified that he has had no hypoglycemic reactions resulting in loss of consciousness, requiring the assistance of another person, or resulting in impaired cognitive function that occurred without warning in the past 5 years; understands diabetes management and monitoring; and has stable control of his diabetes using insulin, and is able to drive a CMV safely. Mr. Burchette meets the

requirements of the vision standard at 49 CFR 391.41(b)(10). His optometrist examined him in 2006 and certified that he does not have diabetic retinopathy. He holds a Class A CDL from California.

Andrew J. Causey

Mr. Causey, 27, has had ITDM since 2006. His endocrinologist examined him in 2006 and certified that he has had no hypoglycemic reactions resulting in loss of consciousness, requiring the assistance of another person, or resulting in impaired cognitive function that occurred without warning in the past 5 years; understands diabetes management and monitoring; and has stable control of his diabetes using insulin, and is able to drive a CMV safely. Mr. Causey meets the requirements of the vision standard at 49 CFR 391.41(b)(10). His ophthalmologist examined him in 2006 and certified that he does not have diabetic retinopathy. He holds a Class A CDL from Maryland.

Ross E. Cheney

Mr. Cheney, 58, has had ITDM since 2005. His endocrinologist examined him in 2006 and certified that he has had no hypoglycemic reactions resulting in loss of consciousness, requiring the assistance of another person, or resulting in impaired cognitive function that occurred without warning in the past 5 years; understands diabetes management and monitoring; and has stable control of his diabetes using insulin, and is able to drive a CMV safely. Mr. Cheney meets the requirements of the vision standard at 49 CFR 391.41(b)(10). His ophthalmologist examined him in 2006 and certified that he does not have diabetic retinopathy. He holds a Class A CDL from Missouri.

Joan L. Chumney

Ms. Chumney, 50, has had ITDM since 2001. Her endocrinologist examined her in 2006 and certified that she has had no hypoglycemic reactions resulting in loss of consciousness, requiring the assistance of another person, or resulting in impaired cognitive function that occurred without warning in the past 5 years; understands diabetes management and monitoring; and has stable control of her diabetes using insulin, and is able to drive a CMV safely. Ms. Chumney meets the requirements of the vision standard at 49 CFR 391.41(b)(10). Her ophthalmologist examined her in 2006 and certified that she does not have diabetic retinopathy. She holds a Class D operator's license from Arizona.

Jerry R. Chandler

Mr. Chandler, 55, has had ITDM since 1967. His endocrinologist examined him in 2006 and certified that he has had no hypoglycemic reactions resulting in loss of consciousness, requiring the assistance of another person, or resulting in impaired cognitive function that occurred without warning in the past 5 years; understands diabetes management and monitoring; and has stable control of his diabetes using insulin, and is able to drive a CMV safely. Mr. Chandler meets the requirements of the vision standard at 49 CFR 391.41(b)(10). His ophthalmologist examined him in 2006 and certified that he has stable nonproliferative diabetic retinopathy. He holds a Class D operator's license from Alabama.

Leonard T. Coker

Mr. Coker, 56, has had ITDM since 2005. His endocrinologist examined him in 2006 and certified that he has had no hypoglycemic reactions resulting in loss of consciousness, requiring the assistance of another person, or resulting in impaired cognitive function that occurred without warning in the past 5 years; understands diabetes management and monitoring; and has stable control of his diabetes using insulin, and is able to drive a CMV safely. Mr. Coker meets the requirements of the vision standard at 49 CFR 391.41(b)(10). His optometrist examined him in 2006 and certified that he does not have diabetic retinopathy. He holds a Class B CDL from Georgia.

Robert S. Conchola, Sr.

Mr. Conchola, 51, has had ITDM since 2005. His endocrinologist examined him in 2006 and certified that he has had no hypoglycemic reactions resulting in loss of consciousness, requiring the assistance of another person, or resulting in impaired cognitive function that occurred without warning in the past 5 years; understands diabetes management and monitoring; and has stable control of his diabetes using insulin, and is able to drive a CMV safely. Mr. Conchola meets the requirements of the vision standard at 49 CFR 391.41(b)(10). His optometrist examined him in 2006 and certified that he does not have diabetic retinopathy. He holds a Class A CDL from Kansas.

Robert M. Cottongim

Mr. Cottongim, 58 has had ITDM since 2004. His endocrinologist examined him in 2006 and certified that he has had no hypoglycemic reactions resulting in loss of consciousness, requiring the assistance of another

person, or resulting in impaired cognitive function that occurred without warning in the past 5 years; understands diabetes management and monitoring; and has stable control of his diabetes using insulin, and is able to drive a CMV safely. Mr. Cottongim meets the requirements of the vision standard at 49 CFR 391.41(b)(10). His optometrist examined him in 2006 and certified that he does not have diabetic retinopathy. He holds an operator's license from Ohio.

Don C. Doerfler

Mr. Doerfler, 39, has had ITDM since 2005. His endocrinologist examined him in 2006 and certified that he has had no hypoglycemic reactions resulting in loss of consciousness, requiring the assistance of another person, or resulting in impaired cognitive function that occurred without warning in the past 5 years; understands diabetes management and monitoring; and has stable control of his diabetes using insulin, and is able to drive a CMV safely. Mr. Doerfler meets the requirements of the vision standard at 49 CFR 391.41(b)(10). His ophthalmologist examined him in 2006 and certified that he does not have diabetic retinopathy. He holds a Class A CDL from Texas.

Frederick J. Fath

Mr. Fath, 59, has had ITDM since 2006. His endocrinologist examined him in 2006 and certified that he has had no hypoglycemic reactions resulting in loss of consciousness, requiring the assistance of another person, or resulting in impaired cognitive function that occurred without warning in the past 5 years; understands diabetes management and monitoring; and has stable control of his diabetes using insulin, and is able to drive a CMV safely. Mr. Fath meets the requirements of the vision standard at 49 CFR 391.41(b)(10). His optometrist examined him in 2006 and certified that he does not have diabetic retinopathy. He holds a Class D operator's license from Illinois.

Jason L. Freeseaman

Mr. Freeseaman, 19, has had ITDM since 2001. His endocrinologist examined him in 2006 and certified that he has had no hypoglycemic reactions resulting in loss of consciousness, requiring the assistance of another person, or resulting in impaired cognitive function that occurred without warning in the past 5 years; understands diabetes management and monitoring; and has stable control of his diabetes using insulin, and is able to drive a

CMV safely. Mr. Freeseaman meets the requirements of the vision standard at 49 CFR 391.41(b)(10). His ophthalmologist examined him in 2006 and certified that he does not have diabetic retinopathy. He holds a Class A CDL from Iowa.

Rusty W. Frost

Mr. Frost, 28, has had ITDM since 1984. His endocrinologist examined him in 2006 and certified that he has had no hypoglycemic reactions resulting in loss of consciousness, requiring the assistance of another person, or resulting in impaired cognitive function that occurred without warning in the past 5 years; understands diabetes management and monitoring; and has stable control of his diabetes using insulin, and is able to drive a CMV safely. Mr. Frost meets the requirements of the vision standard at 49 CFR 391.41(b)(10). His ophthalmologist examined him in 2006 and certified that he does not have diabetic retinopathy. He holds a Class A CDL from New Mexico.

Marcel C. Gagnier

Mr. Gagnier, 53, has had ITDM since 2004. His endocrinologist examined him in 2006 and certified that he has had no hypoglycemic reactions resulting in loss of consciousness, requiring the assistance of another person, or resulting in impaired cognitive function that occurred without warning in the past 5 years; understands diabetes management and monitoring; and has stable control of his diabetes using insulin, and is able to drive a CMV safely. Mr. Gagnier meets the requirements of the vision standard at 49 CFR 391.41(b)(10). His optometrist examined him in 2006 and certified that he does not have diabetic retinopathy. He holds a Class C operator's license from Nevada.

Steven A. Gibbs

Mr. Gibbs, 39, has had ITDM since 2001. His endocrinologist examined him in 2006 and certified that he has had no hypoglycemic reactions resulting in loss of consciousness, requiring the assistance of another person, or resulting in impaired cognitive function that occurred without warning in the past 5 years; understands diabetes management and monitoring; and has stable control of his diabetes using insulin, and is able to drive a CMV safely. Mr. Gibbs meets the requirements of the vision standard at 49 CFR 391.41(b)(10). His optometrist examined him in 2006 and certified that he does not have diabetic retinopathy. He holds a Class A CDL from Georgia.

Kenneth D. Gregory

Mr. Gregory, 61, has had ITDM since 2005. His endocrinologist examined him in 2006 and certified that he has had no hypoglycemic reactions resulting in loss of consciousness, requiring the assistance of another person, or resulting in impaired cognitive function that occurred without warning in the past 5 years; understands diabetes management and monitoring; and has stable control of his diabetes using insulin, and is able to drive a CMV safely. Mr. Gregory meets the requirements of the vision standard at 49 CFR 391.41(b)(10). His optometrist examined him in 2006 and certified that he does not have diabetic retinopathy. He holds a Class A CDL from Illinois.

Perry S. Green

Mr. Green, 49, has had ITDM since 1995. His endocrinologist examined him in 2006 and certified that he has had no hypoglycemic reactions resulting in loss of consciousness, requiring the assistance of another person, or resulting in impaired cognitive function that occurred without warning in the past 5 years; understands diabetes management and monitoring; and has stable control of his diabetes using insulin, and is able to drive a CMV safely. Mr. Green meets the requirements of the vision standard at 49 CFR 391.41(b)(10). His ophthalmologist examined him in 2006 and certified that he has stable nonproliferative diabetic retinopathy. He holds a Class A CDL from Florida.

Paul M. Harris

Mr. Harris, 61, has had ITDM since 2005. His endocrinologist examined him in 2006 and certified that he has had no hypoglycemic reactions resulting in loss of consciousness, requiring the assistance of another person, or resulting in impaired cognitive function that occurred without warning in the past 5 years; understands diabetes management and monitoring; and has stable control of his diabetes using insulin, and is able to drive a CMV safely. Mr. Harris meets the requirements of the vision standard at 49 CFR 391.41(b)(10). His ophthalmologist examined him in 2006 and certified that he does not have diabetic retinopathy. He holds a Class A CDL from Missouri.

Robert A. Hartung

Mr. Hartung, 50, has had ITDM since 1989. His endocrinologist examined him in 2006 and certified that he has had no hypoglycemic reactions resulting in loss of consciousness, requiring the assistance of another person, or

resulting in impaired cognitive function that occurred without warning in the past 5 years; understands diabetes management and monitoring; and has stable control of his diabetes using insulin, and is able to drive a CMV safely. Mr. Hartung meets the requirements of the vision standard at 49 CFR 391.41(b)(10). His ophthalmologist examined him in 2006 and certified that he has stable nonproliferative diabetic retinopathy. He holds a Class A CDL from Michigan.

Andrew J. Hayek

Mr. Hayek, 41, has had ITDM since 1997. His endocrinologist examined him in 2006 and certified that he has had no hypoglycemic reactions resulting in loss of consciousness, requiring the assistance of another person, or resulting in impaired cognitive function that occurred without warning in the past 5 years; understands diabetes management and monitoring; and has stable control of his diabetes using insulin, and is able to drive a CMV safely. Mr. Hayek meets the requirements of the vision standard at 49 CFR 391.41(b)(10). His ophthalmologist examined him in 2006 and certified that he has stable proliferative diabetic retinopathy. He holds a Class B CDL from Wisconsin.

Gary L. Koehn

Mr. Koehn, 52, has had ITDM since 2003. His endocrinologist examined him in 2006 and certified that he has had no hypoglycemic reactions resulting in loss of consciousness, requiring the assistance of another person, or resulting in impaired cognitive function that occurred without warning in the past 5 years; understands diabetes management and monitoring; and has stable control of his diabetes using insulin, and is able to drive a CMV safely. Mr. Koehn meets the requirements of the vision standard at 49 CFR 391.41(b)(10). His optometrist examined him in 2006 and certified that he has stable nonproliferative diabetic retinopathy. He holds a Class A CDL from Nebraska.

Randall B. Kutzke

Mr. Kutzke, 46, has had ITDM since 2003. His endocrinologist examined him in 2006 and certified that he has had no hypoglycemic reactions resulting in loss of consciousness, requiring the assistance of another person, or resulting in impaired cognitive function that occurred without warning in the past 5 years; understands diabetes management and monitoring; and has stable control of his diabetes using insulin, and is able to drive a CMV

safely. Mr. Kutzke meets the requirements of the vision standard at 49 CFR 391.41(b)(10). His optometrist examined him in 2006 and certified that he does not have diabetic retinopathy. He holds a Class A CDL from Kansas.

Michael J. Marlin

Mr. Marlin, 51, has had ITDM since 2004. His endocrinologist examined him in 2006 and certified that he has had no hypoglycemic reactions resulting in loss of consciousness, requiring the assistance of another person, or resulting in impaired cognitive function that occurred without warning in the past 5 years; understands diabetes management and monitoring; and has stable control of his diabetes using insulin, and is able to drive a CMV safely. Mr. Marlin meets the requirements of the vision standard at 49 CFR 391.41(b)(10). His ophthalmologist examined him in 2006 and certified that he does not have diabetic retinopathy. He holds a Class B CDL from North Carolina.

Marc K. Marsing

Mr. Marsing, 36, has had ITDM since 1990. His endocrinologist examined him in 2006 and certified that he has had no hypoglycemic reactions resulting in loss of consciousness, requiring the assistance of another person, or resulting in impaired cognitive function that occurred without warning in the past 5 years; understands diabetes management and monitoring; and has stable control of his diabetes using insulin, and is able to drive a CMV safely. Mr. Marsing meets the requirements of the vision standard at 49 CFR 391.41(b)(10). His ophthalmologist examined him in 2006 and certified that he has stable nonproliferative diabetic retinopathy. He holds a Class D operator's license from Utah.

Frank J. Mattos

Mr. Mattos, 59, has had ITDM since 2004. His endocrinologist examined him in 2006 and certified that he has had no hypoglycemic reactions resulting in loss of consciousness, requiring the assistance of another person, or resulting in impaired cognitive function that occurred without warning in the past 5 years; understands diabetes management and monitoring; and has stable control of his diabetes using insulin, and is able to drive a CMV safely. Mr. Mattos meets the requirements of the vision standard at 49 CFR 391.41(b)(10). His optometrist examined him in 2006 and certified that he does not have diabetic retinopathy.

He holds a Class C operator's license from California.

Winfred A. McMurray

Mr. McMurray, 61, has had ITDM since 2006. His endocrinologist examined him in 2006 and certified that he has had no hypoglycemic reactions resulting in loss of consciousness, requiring the assistance of another person, or resulting in impaired cognitive function that occurred without warning in the past 5 years; understands diabetes management and monitoring; and has stable control of his diabetes using insulin, and is able to drive a CMV safely. Mr. McMurray meets the requirements of the vision standard at 49 CFR 391.41(b)(10). His optometrist examined him in 2006 and certified that he does not have diabetic retinopathy. He holds a Class A CDL from South Carolina.

Edward T. Megee

Mr. Megee, 46, has had ITDM since 1987. His endocrinologist examined him in February 2006 and certified that he has had no hypoglycemic reactions resulting in loss of consciousness, requiring the assistance of another person, or resulting in impaired cognitive function that occurred without warning in the past 5 years; understands diabetes management and monitoring; and has stable control of his diabetes using insulin, and is able to drive a CMV safely. Mr. Megee meets the requirements of the vision standard at 49 CFR 391.41(b)(10). His ophthalmologist examined him in 2006 and certified that he has stable nonproliferative diabetic retinopathy. He holds a Class C operator's license from California.

Steven T. Moody

Mr. Moody, 40, has had ITDM since 1972. His endocrinologist examined him in 2006 and certified that he has had no hypoglycemic reactions resulting in loss of consciousness, requiring the assistance of another person, or resulting in impaired cognitive function that occurred without warning in the past 5 years; understands diabetes management and monitoring; and has stable control of his diabetes using insulin, and is able to drive a CMV safely. Mr. Moody meets the requirements of the vision standard at 49 CFR 391.41(b)(10). His ophthalmologist examined him in 2006 and certified that he does not have diabetic retinopathy. He holds a Class D operator's license from Alabama.

Paul E. Mougín

Mr. Mougín, 58, has had ITDM since 2006. His endocrinologist examined him

in 2006 and certified that he has had no hypoglycemic reactions resulting in loss of consciousness, requiring the assistance of another person, or resulting in impaired cognitive function that occurred without warning in the past 5 years; understands diabetes management and monitoring; and has stable control of his diabetes using insulin, and is able to drive a CMV safely. Mr. Mougín meets the requirements of the vision standard at 49 CFR 391.41(b)(10). His ophthalmologist examined him in 2006 and certified that he has stable nonproliferative diabetic retinopathy. He holds a Class A CDL from Massachusetts.

Timothy W. Nelson

Mr. Nelson, 49, has had ITDM since 1977. His endocrinologist examined him in 2006 and certified that he has had no hypoglycemic reactions resulting in loss of consciousness, requiring the assistance of another person, or resulting in impaired cognitive function that occurred without warning in the past 5 years; understands diabetes management and monitoring; and has stable control of his diabetes using insulin, and is able to drive a CMV safely. Mr. Nelson meets the requirements of the vision standard at 49 CFR 391.41(b)(10). His optometrist examined him in 2006 and certified that he does not have diabetic retinopathy. He holds a Class A CDL from Minnesota.

Richard W. Newman

Mr. Newman, 51, has had ITDM since 1970. His endocrinologist examined him in 2006 and certified that he has had no hypoglycemic reactions resulting in loss of consciousness, requiring the assistance of another person, or resulting in impaired cognitive function that occurred without warning in the past 5 years; understands diabetes management and monitoring; and has stable control of his diabetes using insulin, and is able to drive a CMV safely. Mr. Newman meets the requirements of the vision standard at 49 CFR 391.41(b)(10). His ophthalmologist examined him in 2006 and certified that he has stable proliferative diabetic retinopathy. He holds a Class B CDL from New York.

Jamison P. Noel

Mr. Noel, 18, has had ITDM since 2003. His endocrinologist examined him in 2006 and certified that he has had no hypoglycemic reactions resulting in loss of consciousness, requiring the assistance of another person, or resulting in impaired cognitive function

that occurred without warning in the past 5 years; understands diabetes management and monitoring; and has stable control of his diabetes using insulin, and is able to drive a CMV safely. Mr. Noel meets the requirements of the vision standard at 49 CFR 391.41(b)(10). His ophthalmologist examined him in 2006 and certified that he does not have diabetic retinopathy. He holds a Class C operator's license from Iowa.

Rex S. Norquist

Mr. Norquist, 57, has had ITDM since 1999. His endocrinologist examined him in 2006 and certified that he has had no hypoglycemic reactions resulting in loss of consciousness, requiring the assistance of another person, or resulting in impaired cognitive function that occurred without warning in the past 5 years; understands diabetes management and monitoring; and has stable control of his diabetes using insulin, and is able to drive a CMV safely. Mr. Norquist meets the requirements of the vision standard at 49 CFR 391.41(b)(10). His optometrist examined him in 2006 and certified that he does not have diabetic retinopathy. He holds a Class A CDL from Kansas.

Steven B. Novak

Mr. Novak, 47, has had ITDM since 1999. His endocrinologist examined him in 2006 and certified that he has had no hypoglycemic reactions resulting in loss of consciousness, requiring the assistance of another person, or resulting in impaired cognitive function that occurred without warning in the past 5 years; understands diabetes management and monitoring; and has stable control of his diabetes using insulin, and is able to drive a CMV safely. Mr. Novak meets the requirements of the vision standard at 49 CFR 391.41(b)(10). His optometrist examined him in 2006 and certified that he does not have diabetic retinopathy. He holds a Class A CDL from California.

Lawrence E. Olson

Mr. Olson, 58, has had ITDM since 2005. His endocrinologist examined him in 2006 and certified that he has had no hypoglycemic reactions resulting in loss of consciousness, requiring the assistance of another person, or resulting in impaired cognitive function that occurred without warning in the past 5 years; understands diabetes management and monitoring; and has stable control of his diabetes using insulin, and is able to drive a CMV safely. Mr. Olson meets the requirements of the vision standard at 49 CFR 391.41(b)(10). His

ophthalmologist examined him in 2006 and certified that he has stable nonproliferative diabetic retinopathy. He holds a Class A CDL from Washington.

Ronnie L. Patterson

Mr. Patterson, 51, has had ITDM since 2006. His endocrinologist examined him in 2006 and certified that he has had no hypoglycemic reactions resulting in loss of consciousness, requiring the assistance of another person, or resulting in impaired cognitive function that occurred without warning in the past 5 years; understands diabetes management and monitoring; and has stable control of his diabetes using insulin, and is able to drive a CMV safely. Mr. Patterson meets the requirements of the vision standard at 49 CFR 391.41(b)(10). His ophthalmologist examined him in 2006 and certified that he does not have diabetic retinopathy. He holds a Class A CDL from Minnesota.

Benigno A. Piedra

Mr. Piedra, 45, has had ITDM since 2005. His endocrinologist examined him in 2006 and certified that he has had no hypoglycemic reactions resulting in loss of consciousness, requiring the assistance of another person, or resulting in impaired cognitive function that occurred without warning in the past 5 years; understands diabetes management and monitoring; has stable control of his diabetes using insulin, and is able to drive a CMV safely. Mr. Piedra meets the requirements of the vision standard at 49 CFR 391.41(b)(10). His optometrist examined him in 2006 and certified that he does not have diabetic retinopathy. He holds a Class B CDL from New Jersey.

David L. Rice

Mr. Rice, 41, has had ITDM since 1996. His endocrinologist examined him in 2006 and certified that he has had no hypoglycemic reactions resulting in loss of consciousness, requiring the assistance of another person, or resulting in impaired cognitive function that occurred without warning in the past 5 years; understands diabetes management and monitoring; and has stable control of his diabetes using insulin, and is able to drive a CMV safely. Mr. Rice meets the requirements of the vision standard at 49 CFR 391.41(b)(10). His ophthalmologist examined him in 2006 and certified that he has stable nonproliferative diabetic retinopathy. He holds a Class A CDL from Maine.

Emiliano Rios

Mr. Rios, 43, has had ITDM since 2005. His endocrinologist examined him in 2006 and certified that he has had no hypoglycemic reactions resulting in loss of consciousness, requiring the assistance of another person, or resulting in impaired cognitive function that occurred without warning in the past 5 years; understands diabetes management and monitoring; and has stable control of his diabetes using insulin, and is able to drive a CMV safely. Mr. Rios meets the requirements of the vision standard at 49 CFR 391.41(b)(10). His ophthalmologist examined him in 2006 and certified that he does not have diabetic retinopathy. He holds a Class A CDL from Pennsylvania.

Russell D. Rockefeller

Mr. Rockefeller, 43, has had ITDM since 2004. His endocrinologist examined him in 2006 and certified that he has had no hypoglycemic reactions resulting in loss of consciousness, requiring the assistance of another person, or resulting in impaired cognitive function that occurred without warning in the past 5 years; understands diabetes management and monitoring; and has stable control of his diabetes using insulin, and is able to drive a CMV safely. Mr. Rockefeller meets the requirements of the vision standard at 49 CFR 391.41(b)(10). His ophthalmologist examined him in 2006 and certified that he has stable nonproliferative diabetic retinopathy. He holds a Class A CDL from New York.

Matthew T. Russell

Mr. Russell, 26, has had ITDM since 1987. His endocrinologist examined him in 2006 and certified that he has had no hypoglycemic reactions resulting in loss of consciousness, requiring the assistance of another person, or resulting in impaired cognitive function that occurred without warning in the past 5 years; understands diabetes management and monitoring; and has stable control of his diabetes using insulin, and is able to drive a CMV safely. Mr. Russell meets the requirements of the vision standard at 49 CFR 391.41(b)(10). His optometrist examined him in 2006 and certified that he does not have diabetic retinopathy. He holds a Class A CDL from Tennessee.

Larry V. Schwaller

Mr. Schwaller, 65, has had ITDM since 1990. His endocrinologist examined him in 2006 and certified that he has had no hypoglycemic reactions resulting in loss of consciousness, requiring the assistance of another

person, or resulting in impaired cognitive function that occurred without warning in the past 5 years; understands diabetes management and monitoring; and has stable control of his diabetes using insulin, and is able to drive a CMV safely. Mr. Schwaller meets the requirements of the vision standard at 49 CFR 391.41(b)(10). His optometrist examined him in 2006 and certified that he does not have diabetic retinopathy. He holds a Class E operator's license from Missouri, which allows him to drive any non-commercial combination of motor vehicles with a gross vehicle weight less than 26,001 pounds.

Ellis D. Scott

Mr. Scott, 59, has had ITDM since 1997. His endocrinologist examined him in 2006 and certified that he has had no hypoglycemic reactions resulting in loss of consciousness, requiring the assistance of another person, or resulting in impaired cognitive function that occurred without warning in the past 5 years; understands diabetes management and monitoring; and has stable control of his diabetes using insulin, and is able to drive a CMV safely. Mr. Scott meets the requirements of the vision standard at 49 CFR 391.41(b)(10). His ophthalmologist examined him in 2006 and certified that he has stable nonproliferative diabetic retinopathy. He holds a Class D operator's license from Alabama.

Scott Sheerer

Mr. Sheerer, 37, has had ITDM since 1986. His endocrinologist examined him in 2006 and certified that he has had no hypoglycemic reactions resulting in loss of consciousness, requiring the assistance of another person, or resulting in impaired cognitive function that occurred without warning in the past 5 years; understands diabetes management and monitoring; and has stable control of his diabetes using insulin, and is able to drive a CMV safely. Mr. Sheerer meets the requirements of the vision standard at 49 CFR 391.41(b)(10). His ophthalmologist examined him in 2006 and certified that he has stable nonproliferative diabetic retinopathy. He holds a Class D operator's license from Ohio.

Lowell P. Smith

Mr. Smith, 53, has had ITDM since 2005. His endocrinologist examined him in 2006 and certified that he has had no hypoglycemic reactions resulting in loss of consciousness, requiring the assistance of another person, or resulting in impaired cognitive function that occurred without warning in the

past 5 years; understands diabetes management and monitoring; and has stable control of his diabetes using insulin, and is able to drive a CMV safely. Mr. Smith meets the requirements of the vision standard at 49 CFR 391.41(b)(10). His ophthalmologist examined him in 2006 and certified that he has stable nonproliferative diabetic retinopathy. He holds a Class A CDL from Iowa.

Richard L. Strange

Mr. Strange, 56, has had ITDM since 2005. His endocrinologist examined him in 2006 and certified that he has had no hypoglycemic reactions resulting in loss of consciousness, requiring the assistance of another person, or resulting in impaired cognitive function that occurred without warning in the past 5 years; understands diabetes management and monitoring; and has stable control of his diabetes using insulin, and is able to drive a CMV safely. Mr. Strange meets the requirements of the vision standard at 49 CFR 391.41(b)(10). His optometrist examined him in 2006 and certified that he does not have diabetic retinopathy. He holds a Class A CDL from Iowa.

Samuel G. Thiel

Mr. Thiel, 44, has had ITDM since 2002. His endocrinologist examined him in 2006 and certified that he has had no hypoglycemic reactions resulting in loss of consciousness, requiring the assistance of another person, or resulting in impaired cognitive function that occurred without warning in the past 5 years; understands diabetes management and monitoring; and has stable control of his diabetes using insulin, and is able to drive a CMV safely. Mr. Thiel meets the requirements of the vision standard at 49 CFR 391.41(b)(10). His optometrist examined him in 2006 and certified that he does not have diabetic retinopathy. He holds a Class A CDL from North Dakota.

Robert J. Varetoni

Mr. Varetoni, 55, has had ITDM since 2003. His endocrinologist examined him in 2006 and certified that he has had no hypoglycemic reactions resulting in loss of consciousness, requiring the assistance of another person, or resulting in impaired cognitive function that occurred without warning in the past 5 years; understands diabetes management and monitoring; and has stable control of his diabetes using insulin, and is able to drive a CMV safely. Mr. Varetoni meets the requirements of the vision standard at 49 CFR 391.41(b)(10). His optometrist examined him in 2006 and certified that

he does not have diabetic retinopathy. He holds a Class A CDL from New Jersey.

Michael R. Vaupel

Mr. Vaupel, 26, has had ITDM since 1993. His endocrinologist examined him in 2006 and certified that he has had no hypoglycemic reactions resulting in loss of consciousness, requiring the assistance of another person, or resulting in impaired cognitive function that occurred without warning in the past 5 years; understands diabetes management and monitoring; and has stable control of his diabetes using insulin, and is able to drive a CMV safely. Mr. Vaupel meets the requirements of the vision standard at 49 CFR 391.41(b)(10). His optometrist examined him in 2006 and certified that he does not have diabetic retinopathy. He holds a Class A CDL from Kansas.

David G. White

Mr. White, 41, has had ITDM since 1992. His endocrinologist examined him in 2006 and certified that he has had no hypoglycemic reactions resulting in loss of consciousness, requiring the assistance of another person, or resulting in impaired cognitive function that occurred without warning in the past 5 years; understands diabetes management and monitoring; and has stable control of his diabetes using insulin, and is able to drive a CMV safely. Mr. White meets the requirements of the vision standard at 49 CFR 391.41(b)(10). His optometrist examined him in 2006 and certified that he does not have diabetic retinopathy. He holds a Class A CDL from Alabama.

Ray W. Wright

Mr. Wright, 68, has had ITDM since 2005. His endocrinologist examined him in 2006 and certified that he has had no hypoglycemic reactions resulting in loss of consciousness, requiring the assistance of another person, or resulting in impaired cognitive function that occurred without warning in the past 5 years; understands diabetes management and monitoring; and has stable control of his diabetes using insulin, and is able to drive a CMV safely. Mr. Wright meets the requirements of the vision standard at 49 CFR 391.41(b)(10). His ophthalmologist examined him in 2006 and certified that he has stable nonproliferative diabetic retinopathy. He holds a Class A CDL from Virginia.

Request for Comments

In accordance with 49 U.S.C. 31136(e) and 31315, FMCSA requests public comment from all interested persons on

the exemption petitions described in this notice. We will consider all comments received before the close of business on the closing date indicated earlier in the notice.

FMCSA notes that Section 4129 of the Safe, Accountable, Flexible and Efficient Transportation Equity Act: A Legacy for Users (SAFETEA-LU) requires the Secretary to revise its diabetes exemption program established on September 3, 2003 (68 FR 52441).¹ The revision must provide for individual assessment of drivers with diabetes mellitus, and be consistent with the criteria described in section 4018 of the Transportation Equity Act for the 21st Century (49 U.S.C. 31305).

Section 4129 requires: (1) The elimination of the requirement for three years of experience operating CMVs while being treated with insulin; and (2) the establishment of a specified minimum period of insulin use to demonstrate stable control of diabetes before being allowed to operate a CMV.

In response to section 4129, FMCSA made immediate revisions to the diabetes exemption program established by the September 3, 2003 Notice. FMCSA discontinued use of the 3-year driving experience and fulfilled the requirements of section 4129 while continuing to ensure that operation of CMVs by drivers with ITDM will achieve the requisite level of safety required of all exemptions granted under 49 U.S.C. 31136(e).

Section 4129(d) also directed FMCSA to ensure that drivers of CMVs with ITDM are not held to a higher standard than other drivers, with the exception of limited operating, monitoring and medical requirements that are deemed medically necessary. FMCSA concluded that all of the operating, monitoring and medical requirements set out in the September 3, 2003 Notice, except as modified, were in compliance with section 4129(d). Therefore, all of the requirements set out in the September 3, 2003 Notice, except as modified in the Notice in the **Federal Register** on November 8, 2005 (70 FR 67777), remain in effect.

Issued on: February 22, 2007.

Larry W. Minor,

Office Director, Bus and Truck Standards and Operations.
