

clarity of the information to be collected; and (d) ways to minimize the burden of the collection of information on respondents, including through the use of automated collection techniques or other forms of information technology. Written comments should be received within 60 days of this notice.

Proposed Project

Study to Examine Web-Based Administration of the Youth Risk Behavior Survey—New—National Center for Chronic Disease Prevention and Health Promotion (NCCDPHP), Centers for Disease Control and Prevention (CDC).

Background and Brief Description

The Youth Risk Behavior Survey (YRBS) has been conducted biennially since 1991 using paper-and-pencil

questionnaires in schools. Because of technological improvements in survey research methods, CDC is considering changing to Web-based administration of the YRBS. Because YRBS is the only national source of data for at least 10 national health objectives in Healthy People 2010, it is critical to understand (1) whether it is feasible to change to web-based administration, and (2) how a change to web-based administration, both with and without the use of skip patterns in the questionnaire, might affect prevalence estimates of the priority health risk behaviors reported in the YRBS.

CDC is proposing two studies to address these issues. The first study is a survey of U.S. high school principals, using a questionnaire designed to assess the feasibility and burden of web-based administration in schools. The second

study is a survey of approximately 6000 9th- and 10th-grade students attending schools in the United States, using the YRBS questionnaire. In the second study, students will be assigned randomly to one of the following conditions: (1) Paper-and-pencil group administration without skip patterns, (2) web-based group administration without skip patterns, (3) web-based group administration with skip patterns, and (4) web-based individual administration without skip patterns. An additional 1500 9th- and 10th-grade students assigned to condition #4 will participate in a sub-study to assess how incentives affect participation rates.

There are no costs to respondents except their time to participate in the survey and, in the case of school administrators, to assist in school recruitment.

ESTIMATED ANNUALIZED BURDEN HOURS

Respondents	Number of respondents	Number of responses per respondent	Average burden per response (in hrs.)	Total burden (in hours)
High school students	7500	1	45/60	5625
High school principals	600	1	25/60	250
School administrators	210	1	30/60	105
Total				5980

Dated: February 28, 2007.

Joan F. Karr,

Acting Reports Clearance Officer, Centers for Disease Control and Prevention.
