BILLING CODE 4310-RK-P

DEPARTMENT OF THE INTERIOR

Fish and Wildlife Service

Post-delisting Monitoring Plan for Eggert's Sunflower (*Helianthus eggertii*)

AGENCY: Fish and Wildlife Service, Interior.

ACTION: Notice of document availability.

SUMMARY: We, the Fish and Wildlife Service, announce the availability of the Post-delisting Monitoring Plan for Eggert's sunflower (*Helianthus eggertii*) (Monitoring Plan). The status of Eggert's sunflower will be monitored over a 5-year period from 2006 through 2010, through annual evaluation of information routinely being collected by seven agencies that have entered into long-term management agreements with us covering 27 populations of Eggert's sunflowers, combined with a total census of these populations during the second and fifth year of the monitoring period.

ADDRESSES: Copies of the Monitoring Plan are available by request from the Field Supervisor, Fish and Wildlife Service, 446 Neal Street, Cookeville, Tennessee 38501 (telephone 931-528-6481; fax: 931-528-7074). This Monitoring Plan is also available on the World Wide Web at <http://www.fws.gov/cookeville>.

FOR FURTHER INFORMATION CONTACT: Geoff Call, Recovery Coordinator, at the above Cookeville address, at geoff_call@fws.gov, or at 931/528-6481, extension 213.

SUPPLEMENTARY INFORMATION:

Background

Eggert's sunflower is a perennial member of the aster family (Asteraceae) known only from Alabama, Kentucky, and Tennessee. The species is commonly associated with the barrens/woodland ecosystem. It occurs on rolling-to-flat uplands and in full sun or

partial shade. It is often found in open fields or in thickets along woodland borders and with other tall herbs and small trees. It persists in, and may even invade, roadsides, power line rights-of-way, or fields that have suitable open habitat.

Eggert's sunflower was listed as threatened under the Endangered Species Act (Act) on May 22, 1997 (62 FR 27973). At the time of listing, there were 34 known Eggert's sunflower sites occurring in 1 site in 1 county in Alabama, 13 sites in 5 counties in Kentucky, and 20 sites in 8 counties in Tennessee. When the Recovery Plan for this species was finalized in 1999, there was 1 known site in Alabama, 27 sites in 6 counties in Kentucky, and 203 sites in 12 counties in Tennessee. Presently, there are 287 known Eggert's sunflower sites distributed across 3 counties in Alabama, 9 counties in Kentucky, and 15 counties in Tennessee.

On August 18, 2005, we published a final rule removing Eggert's sunflower from the Federal List of Endangered and Threatened Wildlife and Plants (70 FR 48482). Our decision to delist this species was based on a review of all available data, which indicated that the species was more widespread and abundant than was documented at the time of listing, was more resilient and less vulnerable to certain activities than previously thought, and is now protected on Federal, State, and county lands.

Section 4(g)(1) of the Act requires that we implement a system, in cooperation with the States, to monitor all species that have been delisted, or removed from the Federal List of Endangered and Threatened Wildlife and Plants, due to recovery for at least 5 years following delisting. The purpose of this post-delisting monitoring is to verify that a species delisted due to recovery remains secure from risk of extinction after it no longer has the protections of the Act. In keeping with that mandate, we developed this Monitoring Plan in cooperation with the States of Alabama, Kentucky, and Tennessee. We are responsible for compliance with section 4(g) and must remain actively engaged in all phases of the post-delisting monitoring.

The Draft Post-delisting Monitoring Plan for Eggert's sunflower was available for public comment from August 18, 2005 through September 19, 2005 (70 FR 48577). The only response we received was from the State of Tennessee, which supported the plan. Since we had no additional information provided to us during the comment period, we have finalized the Post-

delisting Monitoring Plan with no changes from the draft.

The Monitoring Plan is designed to track the population status of Eggert's sunflower by using information routinely collected by our partners on a yearly basis as well as a total population census during the second and fifth years of the monitoring period for the 27 populations that occur on public lands. We will also annually evaluate the effectiveness of the Cooperative Management Agreements in protecting Eggert's sunflower populations on these public lands.

If we determine at the end of the 5-year post-delisting monitoring period that "recovered" status is still appropriate and factors that led to the listing of Eggert's sunflower, or any new factors, remain sufficiently reduced or eliminated, monitoring may be reduced or terminated. If data show that the species is declining or if one or more factors that have the potential to cause a decline are identified, we will continue monitoring beyond the 5-year period and may modify the Monitoring Plan based on an evaluation of the results of the initial Monitoring Plan, or reinitiate listing if necessary.

Author

The primary author of this proposed rule is Geoff Call (see **ADDRESSES** section).

Authority

The authority for this action is the Endangered Species Act of 1973 (16 U.S.C. 1531 *et seq.*).

Dated: December 19, 2006.

Cynthia K. Dohner,

Acting Regional Director, Southeast Region.

BILLING CODE 4310-55-P

DEPARTMENT OF THE INTERIOR

Fish and Wildlife Service

Buck Island, Green Cay, and Sandy Point National Wildlife Refuges in the U.S. Virgin Islands

AGENCY: Fish and Wildlife Service, Interior.

ACTION: Notice of intent to prepare a comprehensive conservation plan and environmental assessment; request for comments.

SUMMARY: We, the Fish and Wildlife Service, intend to gather information necessary to prepare a comprehensive conservation plan and associated environmental documents for Buck Island, Green Cay, and Sandy Point

National Wildlife Refuges. We furnish this notice in compliance with our comprehensive conservation planning policy to advise other agencies and the public of our intentions, and to obtain suggestions and information on the scope of issues to be considered in the planning process.

DATES: To ensure consideration, we must receive your written comments by April 11, 2007.

ADDRESSES: Send your comments or requests for more information to Ms. Susan Silander, Refuge Manager, Caribbean Islands National Wildlife Refuge Complex, P.O. Box 510, Boquerón, PR 00622; Telephone: 787/851-7258; or electronically to: susan_silander@fws.gov.

SUPPLEMENTARY INFORMATION: With this notice, we initiate the process for developing a comprehensive conservation plan for Buck Island, Green Cay, and Sandy Point National Wildlife Refuges with headquarters in Boquerón, Puerto Rico.

The National Wildlife Refuge System Administration Act of 1966, as amended by the National Wildlife Refuge System Improvement Act of 1997 (16 U.S.C. 668dd-668ee), requires the Service to develop a comprehensive conservation plan for each national wildlife refuge. The purpose in developing a comprehensive conservation plan is to provide refuge managers with a 15-year strategy for achieving refuge purposes and contributing toward the mission of the National Wildlife Refuge System, consistent with sound principles of fish and wildlife management, conservation, legal mandates, and Service policies. In addition to outlining broad management direction on conserving wildlife and their habitats, plans identify wildlife-dependent recreational opportunities available to the public, including opportunities for hunting, fishing, wildlife observation, wildlife photography, and environmental education and interpretation.

We establish each unit of the National Wildlife Refuge System with specific purposes. We use these purposes to develop and prioritize management goals and objectives within the National Wildlife Refuge System mission, and to guide which public uses will occur on these refuges. The planning process is a way for us and the public to evaluate management goals and objectives for the best possible conservation efforts of these important wildlife habitats, while providing for wildlife-dependent recreation opportunities that are compatible with each refuge's establishing purposes and the mission of the National Wildlife Refuge System.

We will conduct a comprehensive conservation planning process that will provide opportunity for Tribal, State, and local governments; agencies; organizations; and the public to participate in issue scoping and public comment. We request input for issues, concerns, ideas, and suggestions for the management of the Buck Island, Green Cay, and Sandy Point National Wildlife Refuges, with headquarters in Boquerón, Puerto Rico. We invite anyone interested to respond to the following two questions:

1. What problems or issues do you want to see addressed in the comprehensive conservation plan?

2. What improvements would you recommend for the Buck Island, Green Cay, and Sandy Point National Wildlife Refuges?

We have provided the above questions for your optional use; you are not required to provide information to us. Our Planning Team developed these questions to gather information about individual issues and ideas concerning these refuges. Our Planning Team will use comments it receives as part of the planning process; however, we will not reference individual comments in our reports or directly respond to them.

We will also give the public an opportunity to provide input at an open house and public scoping meetings during 2007, to identify issues to be addressed in the plan. These events will be advertised through local media outlets. You may also submit comments anytime during the planning process by writing to the address in the **ADDRESSES** section. All information provided voluntarily by mail, phone, or at public meetings becomes part of our official record (i.e., names, addresses, letters of comment, input recorded during meeting).

We will conduct the environmental review of this project in accordance with the requirements of the National Environmental Policy Act of 1969, as amended (42 U.S.C. 4321 *et seq.*); NEPA Regulations (40 CFR parts 1500-1508); other appropriate Federal laws and regulations; and our policies and procedures for compliance with those regulations. All comments we receive on our environmental assessment become part of the official public record. We will handle requests for such comments in accordance with the Freedom of Information Act, NEPA [40 CFR 1506.6(f)], and other Departmental and Service policies and procedures. When we receive a request, we generally will provide comment letters with the names and addresses of the individuals who wrote the comments.

Buck Island Refuge was established in 1969, and consists of 45 acres. It is an unstaffed refuge administered as part of the Caribbean Islands National Wildlife Refuge Complex. The island was transferred to the Fish and Wildlife Service due to its "value for migratory birds." However, little nesting occurs due to the presence of introduced rates. Visitors to the refuge may see red-billed tropic birds, frigate birds, terns, laughing gulls, and other species in the vicinity of the island.

Green Cay Refuge was established in 1977, and consists of 14 acres. It is an unstaffed refuge administered as part of the Caribbean Islands National Wildlife Refuge Complex. The island provides critical habitat for one of only two remaining natural populations of the endangered St. Croix ground lizard. Its extirpation from the mainland of St. Croix is generally attributed to the introduction of the small Indian mongoose. Outcrops of lava, tuffs, and breccias are prominent geological features. The island is closed to the public due to fragile habitat and easily disturbed wildlife, such as the St. Croix ground lizard.

Sandy Point Refuge was established in 1984, and consists of 360 acres. It is a staffed refuge administered as part of the Caribbean Islands National Wildlife Refuge Complex. The island hosts the largest nesting population of endangered leatherback sea turtles under United States jurisdiction. Approximately 11,000 people visit the refuge annually.

Authority: This notice is published under the authority of the National Wildlife Refuge System Improvement Act of 1997, Public Law 105-57.

Dated: February 8, 2007.

Cynthia K. Dohner,

Acting Regional Director.
