

with respect to VoIP service (*i.e.*, voice telephone calls made via the Internet rather than the PSTN), and that for this reason, the Commission has presently mandated that VoIP providers obtain a registered location for each of their customers so that the providers can direct an emergency VoIP call to the appropriate PSAP. In the pending *VRS 911 NPRM*, the Commission sought comment on the adoption of a registered location requirement similar to the VoIP requirement. *VRS 911 NPRM*, 20 FCC Rcd 19484–19486, paragraphs 19–22. In addition, the Commission raised other potential options for addressing emergency call handling, including developing a unified database of PSAPs that providers could use when receiving an emergency call, requiring providers to give priority access to emergency calls, and structuring VRS and IP Relay calls in such a way that they include a VoIP call, so that the VoIP registration could apply to the VRS or IP Relay call. *VRS 911 NPRM*, 20 FCC Rcd 19487, paragraphs 24–26. These issues remain pending.
