Abstract: The current OMB package requests clearance for data collection instruments to be used in the Study of the Program for Infant Toddler Care (PITC). This study is one of the rigorous research studies of REL West (the Regional Educational Laboratory—West) and will measure the impact of the PITC on child care quality and children's development. The evaluation will be conducted by Berkeley Policy Associates in partnership with the University of Texas at Austin and SRM Boulder. Evaluation measures include baseline and follow-up questionnaires for parents, programs, and caregivers; baseline and follow-up program observations; and two rounds of child observations/interviews to measure children's language, social and cognitive development. Baseline data collection will take place 2007; follow-up data collection will take place in 2008 and 2009.

This document is intended to notify the general public.

DATE AND TIME: Friday, April 13, 2007, beginning at 8:30 a.m. and ending at approximately 3 p.m.

SUPPLEMENTARY INFORMATION: The Advisory Committee on Student Financial Assistance is established under Section 491 of the Higher Education Act of 1965 as amended by Public Law 100-50 (20 U.S.C. 1098). The Advisory Committee serves as an independent source of advice and counsel to the Congress and the Secretary of Education on student financial aid policy. Since its inception, the congressional mandate requires the Advisory Committee to conduct objective, nonpartisan, and independent analyses on important aspects of the student assistance programs under Title IV of the Higher Education Act, and to make recommendations that will result in the maintenance of access to postsecondary education for low- and middle-income students. In addition, Congress expanded the Advisory Committee's mission in the Higher Education Amendments of 1998 to include several important areas: access, Title IV modernization, distance education, and early information and needs assessment. Specifically, the Advisory Committee is to review, monitor and evaluate the Department of Education's progress in these areas and report recommended improvements to Congress and the Secretary.

The Advisory Committee has scheduled the hearing on Friday, April 13 in Portland, Oregon to conduct activities related to its congressionally requested study to make textbooks more affordable (Textbook Study). This one-year study, which was requested by the U.S. House of Representative Committee on Education and Labor (formerly Education and the Workforce), will investigate further the problem of rising textbook prices; determine the impact of rising textbook prices on students' ability to afford a postsecondary education; and make recommendations to Congress, the Secretary, and other stakeholders on what can be done to make textbooks more affordable for students. Over the course of the study, the Committee will conduct three field hearings that will include testimony from stakeholders around the country who are currently working to make textbooks more affordable for students.

The proposed agenda includes expert testimony and discussions by prominent higher education community leaders, state representatives, and institutions that will share what they are doing to

make textbooks more affordable for students. The Advisory Committee will also conduct a public comment and discussion session.

The Advisory Committee invites the public to submit written comments on the Textbook Study to the following e-mail address: ACSFA@ed.gov. Information regarding the Textbook Study will also be available on the Advisory Committee's Web site, <http://www.ed.gov/ACSFA>. To be included in the hearing materials, we must receive your comments on or before Thursday, April 5, 2007; additional comments should be provided to the Committee no later than May 7, 2007.

Notice of Intent To Prepare a Supplemental Environmental Impact Statement for Surplus Plutonium Disposition at the Savannah River Site

AGENCY: Department of Energy.

ACTION: Notice of Intent.

SUMMARY: The U.S. Department of Energy (DOE) intends to prepare a Supplemental Environmental Impact Statement (SEIS) to evaluate the potential environmental impacts of

plutonium disposition capabilities that would be constructed and operated at the Savannah River Site (SRS) near Aiken, South Carolina. DOE completed the *Surplus Plutonium Disposition (SPD) EIS* (DOE/EIS-0283) in November 1999, and on January 11, 2000, published a Record of Decision (ROD) in the **Federal Register** (65 FR 1608). DOE decided to dispose of approximately 17 metric tons of plutonium surplus to the nation's defense needs using an immobilization process and up to 33 metric tons by using the surplus plutonium as feedstock in the fabrication of mixed oxide (MOX) fuel to be irradiated in commercial reactors. DOE selected the SRS as the site for all surplus plutonium disposition facilities. Subsequently, DOE cancelled the immobilization portion of its disposition strategy due to budgetary constraints (ROD, 67 FR 19432, April 19, 2002). The selection of the SRS as the location for disposition facilities for up to 50 metric tons of surplus plutonium remains unchanged. Site preparation for the MOX Fuel Fabrication Facility at the SRS began in November 2005.

The 2002 decision left DOE with about 13 metric tons of surplus plutonium that does not have a defined path to disposition (about 4 metric tons of the 17 metric tons originally considered for immobilization has been designated for programmatic use). DOE has been investigating alternative disposition technologies and will now prepare an *SEIS for Surplus Plutonium Disposition at the SRS* (DOE/EIS-0283-S2) to evaluate the potential environmental impacts of those alternatives. DOE's preferred alternative is to construct and operate a vitrification facility within an existing building at the SRS. This facility would immobilize plutonium within a lanthanide borosilicate glass inside stainless steel cans. The cans then would be placed within larger canisters to be filled with vitrified high-level radioactive waste in the Defense Waste Processing Facility (DWPF) at the SRS. The canisters would be suitable for disposal in a geologic repository. DOE also would prepare some of the surplus plutonium for disposal by processing it in the H-Canyon at the SRS, then sending it to the high-level waste tanks and DWPF. DOE seeks to take this action to reduce the threat of nuclear weapons proliferation worldwide by disposing of surplus plutonium in the United States in a safe and environmentally sound manner. The preferred vitrification technology, along with processing in H-Canyon, would fulfill this need for
