medicine physician; (b) nuclear cardiologist; (c) medical physicist in nuclear medicine unsealed byproduct material; (d) therapy medical physicist; (e) radiation safety officer; (f) nuclear pharmacist; (g) two radiation oncologists; (h) patients' rights advocate; (i) Food and Drug Administration representative; (j) State representative; and (k) health care administrator.

NRC is inviting nominations for the nuclear pharmacist appointment to the ACMUI. The term of the individual currently occupying this position will end September 2008. Committee members currently serve a four-year term and may be considered for reappointment to an additional term.

Nominees must be U.S. citizens and be able to devote approximately 160 hours per year to Committee business. Members who are not Federal employees are compensated for their service. In addition, non-Federal members are reimbursed travel, secretarial and correspondence expenses. Full-time Federal employees are reimbursed travel expenses only.

Security Background Check: The selected nominee will undergo a thorough security background check. Security paperwork may take the nominee several weeks to complete. Nominees will also be required to complete a financial disclosure statement to avoid conflicts of interest.

Dated at Rockville, Maryland this 26th day of March 2007.

For the U.S. Nuclear Regulatory Commission.

Andrew L. Bates,

Advisory Committee Management Officer. [FR Doc. E7–5918 Filed 3–29–07; 8:45 am] BILLING CODE 7590–01–P

NUCLEAR REGULATORY COMMISSION

Advisory Committee on Nuclear Waste Meeting on Planning and Procedures; Notice of Meeting

The Advisory Committee on Nuclear Waste (ACNW) will hold a Planning and Procedures meeting on April 10, 2007, Room T–2B1, 11545 Rockville Pike, Rockville, Maryland. The entire meeting will be open to public attendance, with the exception of a portion that may be closed pursuant to 5 U.S.C. 552b(c)(2) and (6) to discuss organizational and personnel matters that relate solely to internal personnel rules and practices of ACNW, and information the release of which would constitute a clearly unwarranted invasion of personal privacy.

The agenda for the subject meeting shall be as follows:

Tuesday, April 10, 2007—8:30 a.m.-10 a.m.

The Committee will discuss proposed ACNW activities and related matters. The purpose of this meeting is to gather information, analyze relevant issues and facts, and formulate proposed positions and actions, as appropriate, for deliberation by the full Committee.

Members of the public desiring to provide oral statements and/or written comments should notify the Designated Federal Official, Mr. Antonio F. Dias (*Telephone:* 301/415–6805) between 8:15 a.m. and 5 p.m. (ET) five days prior to the meeting, if possible, so that appropriate arrangements can be made. Electronic recordings will be permitted only during those portions of the meeting that are open to the public.

Further information regarding this meeting can be obtained by contacting the Designated Federal Official between 8:15 a.m. and 5 p.m. (ET). Persons planning to attend this meeting are urged to contact the above named individual at least two working days prior to the meeting to be advised of any potential changes in the agenda.

Dated: March 22, 2007.

Antonio F. Dias,

Acting Branch Chief, ACNW.

NUCLEAR REGULATORY COMMISSION

Interim Regulatory Guide: Issuance, Availability

The U.S. Nuclear Regulatory
Commission (NRC) has issued an
interim revision to an existing guide in
the agency's Regulatory Guide Series.
This series has been developed to
describe and make available to the
public such information as methods that
are acceptable to the NRC staff for
implementing specific parts of the
agency's regulations, techniques that the
staff uses in evaluating specific
problems or postulated accidents, and
data that the staff needs in its review of
applications for permits and licenses.

The revised guide, entitled "Quality Assurance for Radiological Monitoring Programs (Inception Through Normal Operations to License Termination)— Effluent Streams and the Environment," is identified as Interim Revision 2 of Regulatory Guide 4.15. Like its predecessor, this interim revision describes a method that the NRC staff considers acceptable for use in

designing and implementing programs to ensure the quality of the results of measurements of radioactive materials in the effluents from, and environment outside of, facilities that process, use, or store radioactive materials during all phases of the facility's life cycle. Quality assurance (QA) is a fundamental expectation of Title 10, "Energy," of the Code of Federal Regulations (10 CFR) for items and activities that are relied on to protect the health and safety of the public and the environment.

This interim guide serves as a final regulatory guide for, and may be used by applicants and licensees of nuclear power reactors. It also presents draft NRC staff positions on a method for designing and implementing QA programs for use by non-nuclear power reactor applicants and licensees subject to the agency's QA requirements. The NRC staff seeks public comments on this regulatory guide with respect to its application to such licensees. The NRC staff will issue this guide in final form after resolving any comments received during the public comment period.

Interim Revision 2 of Regulatory Guide 4.15 specifically applies to facilities for which NRC regulations require routine monitoring of radioactive effluents to the environment, and particularly those facilities licensed under the following regulations:

- 10 CFR Part 50, "Domestic Licensing of Production and Utilization Facilities"
- 10 CFR Part 52, "Licenses, Certifications, and Approvals for Nuclear Power Plants"
- 10 CFR Part 61, "Licensing Requirements for Land Disposal of Radioactive Waste"
- 10 CFR Part 72, "Licensing Requirements for the Independent Storage of Spent Nuclear Fuel, High-Level Radioactive Waste, and Reactor-Related Greater Than Class C Waste"
- 10 CFR Part 76, "Certification of Gaseous Diffusion Plants"

The guidance may also apply to other NRC-licensed facilities, for which the agency may impose specific license conditions for effluent or environmental monitoring, as deemed necessary to ensure the health and safety of the public and the environment, including those licensed under the following regulations:

- 10 CFR Part 30, "Rules of General Applicability to Domestic Licensing of Byproduct Material"
- 10 CFR Part 40, "Domestic Licensing of Source Material"
- 10 CFR Part 70, "Domestic Licensing of Special Nuclear Material"
