

to be sold for use on U.S. highways. The drivers are experienced CMV operators with valid Japanese-issued CDLs. Because each of the drivers was required to satisfy strict CDL testing standards in Japan to obtain a CDL, and has extensive training and experience operating CMVs, Isuzu believes that the exemption will maintain a level of safety equivalent to the level of safety that would be obtained absent the exemption.

Method To Ensure an Equivalent or Greater Level of Safety

Drivers in Japan must hold a conventional driver's license for at least three years before applying to obtain a Japanese-issued CDL. At that point, they must take and pass both a knowledge test and a skills test in order to obtain a license to operate CMVs. These tests thoroughly assess the driver's ability to operate a CMV, and are comparable to the tests administered to CDL applicants in the United States. Once a driver is granted a Japanese CDL, he or she is allowed to drive any CMV currently allowed on Japanese roads. There are no limits to types or weights of vehicles that may be operated by the drivers.

Therefore, the process for obtaining a Japanese-issued CDL is considered to be comparable to, or as effective as, the requirements of 49 CFR part 383.

Comments

The Agency received one comment in response to its request for public comments (71 FR 42170, July 25, 2006). The commenter recommended that Isuzu use U.S. drivers for this testing. The commenter did not provide a substantive basis for this opinion. The docket number of this matter is referenced at the beginning of this notice.

FMCSA Decision

The FMCSA decision to grant these drivers an exemption from section 383.23 is based on the merits of the application for exemption, the rigorous knowledge and skills testing of Japanese drivers concerning the safe operation of CMVs, and consideration of the comment submitted in response to the public notice.

Terms and Conditions for the Exemption

After considering the comment to the docket and based upon evaluation of the application for an exemption, FMCSA grants Isuzu an exemption from the Federal commercial driver's license requirement in 49 CFR 383.23 for 76 drivers, identified under the "Japanese

Drivers" heading above, to test-drive CMVs within the United States, subject to the following terms and conditions: (1) That these drivers will be subject to drug and alcohol regulations, including testing, as provided in 49 CFR part 382, (2) that these drivers are subject to the same driver disqualification rules under 49 CFR parts 383 and 391 that apply to other CMV drivers in the U.S., (3) that these drivers keep a copy of the exemption on the vehicle at all times, (4) that Isuzu notify FMCSA in writing of any accident, as defined in 49 CFR 390.5, involving one of the exempted drivers, and (5) that Isuzu notify FMCSA in writing if any driver is convicted of a disqualifying offense described in section 383.51 or 391.15 of the FMCSRs.

In accordance with 49 U.S.C. 31315 and 31136(e), the exemption will be valid for 2 years unless revoked earlier by the FMCSA. The exemption will be revoked if: (1) The drivers for Isuzu fail to comply with the terms and conditions of the exemption; (2) the exemption has resulted in a lower level of safety than was maintained before it was granted; or (3) continuation of the exemption would not be consistent with the goals and objectives of 49 U.S.C. 31315 and 31136.
