information on the respondents, including the use of automated collection techniques or other forms of information technology.

SUPPLEMENTARY INFORMATION: OMB Control Number: 3060-XXXX.

Title: Consummation of Assignments and Transfers of Control of Station Authorization.

Form No.: N/A.

Type of Review: New collection.

Respondents: Business or other for-profit.

Number of Respondents: 586 respondents; 586 responses.

Estimated Time Per Response: 1 hour.

Frequency of Response: On occasion reporting requirement.

Obligation to Respond: Required to obtain or retain benefits.

Total Annual Burden: 586 hours.

Total Annual Cost: N/A.

Privacy Act Impact Assessment: N/A.

Nature and Extent of Confidentiality: There is no need for confidentiality pertaining to the information collection requirements in this collection.

Needs and Uses: The Commission will submit this new information collection to the OMB after this 60-day comment period to obtain the full three-year clearance from them. The Federal Communications Commission ("Commission") is requesting that the Office of Management and Budget (OMB) approve the establishment of a new collection for consummation of assignments and transfers of control of

station authorization. In addition, the Commission is requesting the OMB's approval of mandatory electronic filing of consummations of assignments and transfers of control of licenses for all telecommunications services.

A consummation is a party's notification to the Commission that a transaction (assignment or transfer of control of station authorization) has been completed within a designated period of time. A consummation is applicable to all international telecommunications services, including International High Frequency (IHF), Section 214 Applications (ITC), Satellite Space Stations (SAT), Submarine Cable Landing Licenses (SCL) and Satellite Earth Station (SES) stations.

Currently, applicants send multiple letters to various offices within the Commission for each file number and call sign that are part of the consummation. The new, proposed consummation module will eliminate the applicant's requirement to notify the Commission by letter with the details of the consummation. With this new collection, the applicant will complete an on-line form (consummation module) in the Commission's electronic International Bureau Filing System ("IBFS"). After the applicant enters the FCC Registration Number (FRN) in the form, the system will generate a list of file numbers and call signs that are related to the FRN. The applicant can select the file numbers and call signs that are part of the consummation. The consummation module: (1) Saves time for the applicants and the Commission staff because the information is readily accessible for viewing and processing 24 hours a day/7 days a week, (2) eliminates the applicants completion by paper and mailing of letters, and (3) expedites the Commission staff's receipt of consummations in a timely manner.

The Commission has authority for this information collection pursuant to 47 CFR 1.767, 25.119, 63.24(e), 73.3540 and 73.3541. Without this collection of information, the Commission would not have critical information such as a change in a controlling interest in the ownership of the licensee. Furthermore, the Commission would not have the authority to review assignments and transfers of control of satellite licenses to determine whether the initial license was obtained in good faith with the intent to construct a satellite system.

Federal Communications Commission.

Secretary.
