**LEGAL SERVICES CORPORATION**

**Notice of Availability of Calendar Year 2008 Competitive Grant Funds**

**AGENCY:** Legal Services Corporation.  
**ACTION:** Solicitation for proposals for the provision of civil legal services.

**SUMMARY:** The Legal Services Corporation (LSC) is the national organization charged with administering Federal funds provided for civil legal services to low-income people.

LSC hereby announces the availability of competitive grant funds and is soliciting grant proposals from interested parties who are qualified to provide effective, efficient, and high quality civil legal services to eligible clients in the service area(s) of the states and territories identified below. The exact amount of congressionally appropriated funds and the date, terms, and conditions of their availability for calendar year 2008 have not been determined.

**DATES:** See **SUPPLEMENTARY INFORMATION** section for grants competition dates.

**ADDRESSES:** Legal Services Corporation—Competitive Grants, 3333 K Street, NW., Third Floor, Washington, DC 20007-3522.

**FOR FURTHER INFORMATION CONTACT:** Office of Program Performance by e-mail at [competition@lsc.gov](mailto:competition@lsc.gov), or visit the grants competition Web site at [www.ain.lsc.gov](http://www.ain.lsc.gov).

**SUPPLEMENTARY INFORMATION:** The Request for Proposals (RFP) will be available the week of April 16, 2007. Applicants must file a Notice of Intent to Compete (NIC; RFP Form-H) to participate in the competitive grants process.

Applicants competing for the service areas listed below, except for VA-20, must file the NIC by May 21, 2007, 5 p.m. E.D.T. The due date for filing grant proposals for these service areas is June 14, 2007, 5 p.m. E.D.T.

Applicants competing for service area VA-20 in Virginia must file the NIC by July 2, 2007, 5 p.m. E.D.T. The due date for filing grant proposals for service area VA-20 in Virginia is September 3, 2007, 5 p.m. E.D.T.

LSC is seeking proposals from: (1) Non-profit organizations that have as a purpose the provision of legal assistance to eligible clients; (2) private attorneys; (3) groups of private attorneys or law firms; (4) state or local governments; and (5) sub-state regional planning and coordination agencies that are composed of sub-state areas and whose governing boards are controlled by locally elected officials.

The RFP, containing the NIC (Form-H) and grant application, guidelines, proposal content requirements, service area descriptions, and specific selection criteria, will be available from [www.ain.lsc.gov](http://www.ain.lsc.gov) the week of April 16, 2007. LSC will not fax the RFP to interested parties.

Below are the service areas for which LSC is requesting grant proposals. Service area descriptions will be available from Appendix A of the RFP. Interested parties are asked to visit [www.ain.lsc.gov](http://www.ain.lsc.gov) regularly for updates on the LSC competitive grants process.

**NATIONAL SCIENCE FOUNDATION**

**Advisory Committee of International Science and Engineering; Notice of Meeting**

In accordance with Federal Advisory Committee Act (Pub. L. 92-463, as amended), the National Science Foundation announces the following meeting:

*Name:* Advisory Committee for International Science and Engineering (#25104).

*Date/Time:* May 4, 2007; 3 p.m. to 5 p.m.

*Place:* National Science Foundation, 4201 Wilson Boulevard, Room 950, Arlington, Virginia.

*Type of Meeting:* Open (Teleconference).

*Contact Person:* Eduardo Feller, National Science Foundation, 4201 Wilson Boulevard, Arlington, VA 22230, (703) 292-8710.

If you are attending the meeting and need access to the NSF, please contact the individual listed above so your name may be added to the building access list.

*Purpose of Meeting:* To provide advice concerning the NSF programs in international science and engineering.

*Agenda:* Discussion of current programs, initiatives and future budget cycle.

Dated: April 10, 2007.

**Susanne Bolton,**

*Committee Management Officer.*

BILLING CODE 7555-01-P

## NUCLEAR REGULATORY COMMISSION

[Docket No. 50-133]

### Environmental Assessment and Finding of No Significant Impact Related to Issuance of License Amendment for the Humboldt Bay Power Plant Unit 3 License DPR-007, Humboldt, CA

**AGENCY:** U.S. Nuclear Regulatory Commission.

**ACTION:** Environmental assessment and finding of no significant impact.

**FOR FURTHER INFORMATION CONTACT:** John Hickman, Division of Waste Management and Environmental Protection, Office of Federal and State Materials and Environmental Management Programs, U.S. Nuclear Regulatory Commission, Mail Stop: T7E18, Washington, DC 20555-00001. Telephone: (301) 415-3017; e-mail: [jbh@nrc.gov](mailto:jbh@nrc.gov).

#### SUPPLEMENTARY INFORMATION:

##### I. Introduction

The U.S. Nuclear Regulatory Commission (NRC) is considering a request, dated December 20, 2006, by the Pacific Gas and Electric Company (PGE or the Licensee), to approve an amendment to Facility Operating License No. DPR-7 that would revise License Condition 2.B.3 to allow the receipt, possession, and use of byproduct, source, or special nuclear material without restriction to amount or atomic number, for sample analysis or instrument calibration or associated with radioactive apparatus or components.

##### II. Environmental Assessment

###### Background

Humboldt Bay Power Plant (HBPP) was permanently shut down in July 1976, and until recently was in safe storage condition (SAFSTOR). SAFSTOR is the decommissioning method in which a nuclear facility is placed and maintained in a condition

that allows the safe storage of radioactive components of the nuclear plant and subsequent decontamination to levels that permit license termination. A Decommissioning Plan (DP) was approved in July 1988. Subsequent to the 1996 License Termination rule, the licensee converted its DP into its Defueled Safety Analysis Report which is updated every two years. A Post Shutdown Decommissioning Activities Report was issued by the licensee in February 1998. The licensee is now engaged in some incremental decommissioning activities. In December 2003, PG&E formally submitted a license application to the U.S. Nuclear Regulatory Commission (NRC) for approval of a dry-cask Independent Spent Fuel Storage Installation (ISFSI) at the Humboldt Bay site. A license and safety evaluation report for the Humboldt Bay ISFSI were issued on November 17, 2005. PG&E plans to begin active decommissioning of the facility in 2007.

This Environmental Assessment (EA) has been developed in accordance with the requirements of 10 CFR Part 51.21.

###### Proposed Action

The change proposed by this amendment will replace the current license condition 2.B.3© which addresses the receipt, possession, and use of byproduct materials with one which allows the receipt, possession, and use of byproduct, source, or special nuclear material without restriction to chemical or physical form or atomic number, for sample analysis or instrument calibration or associated with radioactive apparatus or components. The proposed action is contained in the licensee's application dated December 20, 2006.

###### Need for Proposed Action

The current license condition was included in the license that was issued by the NRC when HBPP entered the possess-but-not-operate SAFSTOR phase. The license, including License Condition 2.B.3(c), was proposed by PG&E on July 30, 1984, and approved and issued by the NRC on July 16, 1985, as Amendment No. 19 to the facility license. License Condition 2.B.3(c) was established based on the byproduct materials onsite at the time and not based on any safety issue. The licensee has now begun preparations for transfer of the spent fuel from the spent fuel pool to an onsite Independent Spent Fuel Storage Installation and for active decommissioning. Offsite equipment will need to be received to perform these activities. However, review of potential equipment has revealed that

some would be unsuitable due to radiological composition which contains atomic numbers not allowed by the current license condition.

###### Environmental Impacts of the Proposed Action

The NRC has completed its evaluation of the proposed amendments to the License and concludes the changes provide a minor revision of the existing provision for the receipt, possession, and use of special nuclear, source, and byproduct materials. The revised license condition is similar to the license condition currently in place for multiple decommissioning and operating nuclear power facilities. The NRC evaluated the safety impacts of the proposed changes and determined that the changes proposed by this license amendment request will provide reasonable assurance that the applicable radiation protection requirements of 10 CFR parts 20, 30, 40, and 70 will be met.

The NRC has evaluated the change and determined that the revised license condition will not significantly change the types or quantities of special nuclear, source, and byproduct materials the license may receive, possess, or use and would therefore have no significant impacts to the environment.

Due to the limited nature of the amendment which will not significantly change the licensed activities on site, the proposed action does not have a potential to affect any historic sites, would not increase the probability or consequences of accidents, would not change the types of effluents that may be released offsite, and would not increase occupation or public radiation exposure.

###### Alternatives to the Proposed Action

The alternative to the proposed action would be to deny the request. Denial of this amendment request would have the same environmental impact as the proposed action.

###### Agencies and Persons Consulted

This EA was prepared by John B. Hickman, Project Manager, Decommissioning Directorate, Division of Waste Management and Environmental Protection (DWMEP). NRC staff determined that the proposed action is not a major decommissioning activity and will not affect listed or proposed endangered species, nor critical habitat. Therefore, no further consultation is required under Section 7 of the Endangered Species Act. Likewise, NRC staff determined that the proposed action is not the type of activity that has the potential to cause
