#### SUPPLEMENTARY INFORMATION:

##### 1. Background

Under Title IX of the Public Health Service Act, AHRQ is charged with enhancing the quality, appropriateness, and effectiveness of health care services and access to such services. AHRQ accomplishes these goals through scientific research, including evaluative medical literature reviews and technology assessments, and through the promotion of improvements in clinical practice and health systems practices.

##### 2. Purpose and Overview

The purpose of this notice is to solicit topic nominations for evidence reports, technology assessments, and comparative and effectiveness reviews. Professional societies, health systems, employers, insurers, providers, and consumer groups are encouraged to nominate topics and then collaborate with AHRQ, as it carries out its mission to promote the practice of evidence-based health care. In this endeavor, AHRQ serves as a science partner with private-sector and public organizations in their efforts to improve the quality, effectiveness, and appropriateness of health care delivery in the United States, and to expedite the translation of evidence-based research findings into improved health care services. To undertake scientific analyses and evidence syntheses on topics of high priority to its public and private health care partners and the health care community generally, AHRQ awards task order contracts to its Evidence-based Practice Centers (EPCs).

The EPCs produce systematic reviews of the scientific literature—evidence reports, technology assessments, and comparative and effectiveness reviews—that provide to public and private organizations the foundation for developing and implementing their own practice guidelines, performance
