

certifies each portion separately according to quality. That is, if a consignment consists of both U.S. No. 1 and 2 Smooth Green Dry Peas, current procedure requires that the quantity representing each of the different qualities receive separate certification. Such certification may not meet the terms of sale for the contract.

The U.S. standards for rice and grains offer an alternative approach that is termed "Option 2" grade designation. When a contract specifies an Option 2 grade designation, the applicant may specifically request Option 2 certification. Under Option 2 certification, there is no limitation placed on the amount of better quality grain in the lot. When a lot meets or is of better quality than the declared grade, inspectors include the term "or better" immediately following the numerical or sample grade designation.

We would like to offer the Option 2 grade designation and certification approach for peas and lentils. Under such an approach, peas or lentils that are a better quality than that specified by the contract would be certified as a specific grade "or better;" (for example, U.S. No. 2, or better, Smooth Dry Peas). The applicant for inspection can obtain the optional certification procedure by requesting it on the application for inspection. The applicant would file the request for the optional certification prior to the beginning of inspection so the inspector knows how to certify the lot. We believe that Option 2 grade designation and certification will better align the pea and lentil industries with the rice and grain industries, provide sellers with the flexibility to ship peas and lentils of better quality, and provide buyers with the desirable option of receiving better quality.

Mixed Whole Dry Peas

We also intend to eliminate the requirement that certain grade related information be shown on the grade line of the certificate for the class of Mixed Whole Dry Peas. Currently, the U.S. standards for Whole Dry Peas require a breakdown of the different classes, in order of predominance, be shown on the grade line of the certificate, in addition to the regular grade designation information, when the peas are classed as Mixed peas. Instead of showing this information on the grade line, we plan to enter such information in the "Results" section of the certificate. This approach will not change the grade of the product. We intend for the change to improve the readability of the certificate. The grade line will provide the grade designation and other related information will be provided in the

"Results" section of the certificate. Further, this change in the U.S. standards for Whole Dry Peas will better align certification requirements in peas with other graded commodities such as rice, beans, and lentils.
