SUPPLEMENTARY INFORMATION: Pursuant to various legal authorities, and subject to allocation of supplies and priority of water rights under state law, Reclamation and the Corps operate dams, reservoirs, and other facilities in the upper Rio Grande basin to:

- (1) Store and deliver water for agricultural, domestic, municipal, industrial, and environmental uses;
- (2) Assist the Commission in meeting downstream water delivery obligations mandated by the Rio Grande Compact;
- (3) Provide flood protection and sediment control; and
- (4) Comply with existing laws, contract obligations, and international treaties.

The Upper Rio Grande Basin Water Operations Review (Review) provides the basis of, and is integral to, preparation of the FEIS. The purpose of the Review and FEIS is to:

- (1) Identify flexibilities in operation of federal reservoirs and facilities in the upper Rio Grande basin that are within existing authorities of Reclamation, the Corps, and the Commission, and in compliance with Federal and State laws;
- (2) Develop a better understanding of how these facilities could be operated more efficiently and effectively as an integrated system;
- (3) Formulate a plan for future water operations at these facilities that is within the existing authorities of Reclamation, the Corps, and the Commission; complies with Federal, State, and other applicable laws and regulations; and assures continued safe dam operations;
- (4) Improve processes for making decisions about water operations through better interagency communication and coordination and facilitation of public review and input; and
- (5) Support compliance by the Corps, Reclamation, and the Commission with applicable laws and regulations, including, but not limited to, the National Environmental Policy Act and the Endangered Species Act.

The FEIS addresses water operations at the following facilities with the noted exceptions and limitations:

- Flood control operations at Platoro Reservoir (the Review and FEIS include only flood control operations at Platoro that are under the Corps' authority; water supply operations at Platoro are under local control)
- Closed Basin Division-San Luis Valley Project
 - Heron Dam and Reservoir
 - Abiquiu Dam and Reservoir
 - Cochiti Dam and Reservoir
 - Low Flow Conveyance Channel
 - Flood control operations at Elephant Butte Dam and Reservoir (because of current litigation, water supply operations at Elephant Butte are not included in the Review or FEIS)
 - Flood control operations at Caballo Dam and Reservoir (because of current litigation, water supply operations at Caballo are not included in the Review or FEIS).

Proposed Federal Action

Reclamation, the Corps, and the Commission identified Alternative E-3 as the preferred alternative for water operations in the upper Rio Grande basin. This alternative allows for increased native (Rio Grande) water conservation and storage in Abiquiu

Reservoir, maintains current channel capacity below Abiquiu Dam, increases channel capacity below Cochiti Dam, and allows a full range of operation for the Low Flow Conveyance Channel, with continued communication and coordination for flood control operations at Elephant Butte and Caballo Dams.

No decision will be made on the proposed Federal action until 60 days after the release of the FEIS. After the 60-day waiting period, Reclamation, the Corps, and the Commission will complete individual agency Records of Decision. The Records of Decision will identify the action(s) that will be implemented and discuss all factors leading to the decision(s).

Dated: March 2, 2007.

Regional Director—Upper Colorado Region, Bureau of Reclamation.
