[Docket No. CP07-32-000]

Gulf South Pipeline Company, LP; Notice of Availability of the Draft Environmental Impact Statement for the Proposed Southeast Expansion Project

April 13, 2007.

The staff of the Federal Energy Regulatory Commission (FERC or Commission) has prepared a Draft Environmental Impact Statement (EIS) on the natural gas pipeline facilities proposed by Gulf South Pipeline Company, LP (Gulf South) in the above-referenced docket.

The Draft EIS was prepared to satisfy the requirements of the National Environmental Policy Act. The FERC staff concludes that the proposed

Project, with the appropriate mitigation measures as recommended, would have limited adverse environmental impact.

The U.S. Fish and Wildlife Service (FWS), National Park Service (NPS), U.S. Environmental Protection Agency (EPA), and the U.S. Army Corps of Engineers (COE) are federal cooperating agencies for the development of this EIS. A federal cooperating agency has jurisdiction by law or special expertise with respect to any environmental impact involved with the proposal and is involved in the NEPA analysis.

The purpose of the proposed Project is to transport up to 1.7 billion cubic feet per day of natural gas from production fields in eastern Texas to markets in the Gulf coast, Midwestern, Northeastern and Southeastern regions of the United States.

The Draft EIS addresses the potential environmental impacts resulting from the construction and operation of the following facilities:

- Approximately 111 miles of 42-inch-diameter natural gas transmission pipeline extending easterly from Simpson County, Mississippi to Choctaw County, Alabama;
- Three new compressor stations, the Delhi, Harrisville, and Destin Compressor Stations, located in Richland County, Louisiana; Simpson County, Mississippi; and Choctaw County Alabama, respectively; and
- other ancillary facilities including five meter and regulator (M/R) facilities, eight mainline valves, 1 side valves, and two pig launcher and/or receiver facilities.
