protection. The OSC detects the rocket plume of missiles and sends appropriate signals to the CP for processing. The CP analyzes the data from each OSC and automatically deploys the appropriate countermeasures . The CP also contains comprehensive built-in test circuitry. The control indicator displays the incoming direction of the threat, so that the pilot can take appropriate action. Hardware is Unclassified. Technical data and documentation to be provided is Unclassified.

4. The AN/ALR-56M Advanced Radar Warning Receiver continuously detects and intercepts Radio Frequency signals in certain frequency ranges and analyzes and separates threat signals from non-threat signals. It contributes to full-dimensional protection by providing individual aircraft probability of survival through improved aircrew situational awareness of the radar-guided threat environment. The ALR-56M is designed to provide improved performance in a dense signal environment and improved detection of modern threats signals. Hardware is Unclassified. Technical data and documentation to be provided is Unclassified.

5. The AN/ALQ-157 Infrared Counter Measures System provides multiple simultaneous protection for large heavy-lift helicopters and medium-size fixed-wing aircraft against Surface-to-air Missiles and Air-to-air Missiles threats. The system employs advanced components and microprocessor technology to allow operator jamming code selection and reprogram capability for future threats. The two fuselage-mounted synchronized jammer assemblies provide continuous protection against threats launched from any direction. The power module, line filter and pilot control indicator can be placed anywhere within the aircraft. Hardware is Unclassified. Technical data and documentation to be provided is Unclassified.

6. If a technologically advanced adversary were to obtain knowledge of the specific hardware or software in this proposed sale, the information could be used to develop countermeasures that might reduce system effectiveness or be used in the development of a system with similar or advanced capabilities.

Subcommittee Site Visit of the President's Commission on Care for America's Returning Wounded Warriors

AGENCY: Department of Defense.

ACTION: Notice.

SUMMARY: Pursuant to Section 10(a), Public Law 92–462, as amended, notice is hereby given of a forthcoming subcommittee site visit of the President's Commission on America's Returning Wounded Warriors. The purpose of the subcommittee site visit is to gather information.

DATES: Tuesday, 8 May 2007.

Location: Richmond, Virginia, McGuire Veterans Affairs Medical Center, 1201 Broad Rock Blvd, Phone 804–675–5000.

FOR FURTHER INFORMATION CONTACT: Col. Denise Daily, 703–588–0439.

SUPPLEMENTARY INFORMATION: None.

Note: Exact order and topics may vary.

Dated: April 19, 2007.

L.M. Bynum,

Alternate OSD Federal Register Liaison Officer, DoD.

Missile Defense Advisory Committee (MDAC)

AGENCY: Department of Defense; Missile Defense Agency (MDA)/

ACTION: Notice of closed meeting.

SUMMARY: The Missile Defense Advisory Committee will meet in closed session on May 3–4, 2007, in Washington, DC.

The mission of the Missile Defense Advisory Committee is to provide the Department of Defense advice on all matters relating to missile defense, including system development, technology, program maturity and readiness of configurations of the Ballistic Missile Defense System (BMDS) to enter the acquisition process. At this meeting, the Committee will receive classified briefings by
