

FOR FURTHER INFORMATION CONTACT:

Aaron Collmann, Room 6029, GSA Building, 1800 F Street, NW., Washington, DC 20405 (202) 501-1021 or e-mail at sbac@gsa.gov.

SUPPLEMENTARY INFORMATION: This notice is published in accordance with the provisions of the Federal Advisory Committee Act (FACA) (Pub. L. 92-463). The purpose of this meeting is to develop the topics generated during the previous meeting December 6-7, 2006; to receive briefings from small business topical experts, and to hear from interested members of the public on proposals to improve GSA's small business contracting performance. Topics to be discussed from the previous meeting may include, but are not limited to, Contractor Teaming Agreements and the Small Business Set-asides on the GSA Multiple Awards Schedules Program. Information from previous meetings can be found online at <http://www.gsa.gov/sbac>.

Dated: April 20, 2007.

Felipe Mendoza,

Associate Administrator, Office of Small Business Utilization, General Services Administration.

BILLING CODE 6820-34-S

DEPARTMENT OF HEALTH AND HUMAN SERVICES
Office of the Secretary

[Document Identifier: OS-0990-0000]; [30-day notice]

**Agency Information Collection
Activities: Proposed Collection;
Comment Request**

AGENCY: Office of the Secretary, HHS.

In compliance with the requirement of section 3506(c)(2)(A) of the Paperwork Reduction Act of 1995, the Office of the Secretary (OS), Department of Health and Human Services, is publishing the following summary of a proposed collection for public comment. Interested persons are invited to send comments regarding this burden estimate or any other aspect of this collection of information, including any of the following subjects: (1) The necessity and utility of the proposed information collection for the proper performance of the agency's functions; (2) the accuracy of the estimated burden; (3) ways to enhance the quality, utility, and clarity of the information to be collected; and (4) the use of automated collection techniques or other forms of information technology to

minimize the information collection burden.

Type of Information Collection Request: New collection.

Title of Information Collection: A National Survey to Measure the Adoption of Electronic Health Records (EHR) among Physicians and Group Practices.

Frequency: One year.

Form/OMB No.: 0990-New.

Use: The Office of the Secretary will evaluate barriers and facilitators to acquisition of electronic record keeping in medical practices. This will allow the Secretary to identify policy choices to encourage use of EHR thereby improving the flow of medical information.

Frequency: One time reporting.

Affected Public: Business or other for-profit and Not-for-profit institutions.

Annual Number of Respondents: 6,000.

Total Annual Responses: 1.

Average Burden per Response: 15 minutes.

Total Annual Hours: 1500.

To obtain copies of the supporting statement and any related forms for the proposed paperwork collections referenced above, e-mail your request, including your address, phone number, OMB number, and OS document identifier, to Sherette.funncoleman@hhs.gov, or call the Reports Clearance Office on (202) 690-6162. Written comments and recommendations for the proposed information collections must be received within 30 days of this notice directly to the Desk Officer at the address below: OMB Desk Officer: John Kraemer, OMB Human Resources and Housing Branch, Attention: (OMB #0990-New), New Executive Office Building, Room 10235, Washington, DC 20503.

Dated: April 17, 2007.

Alice Bettencourt,

Office of the Secretary, Paperwork Reduction Act Reports Clearance Officer.

Type of Information Collection

Request: New Collection.

Title of Information Collection: The National Evaluation of the Rural/Frontier Women's Health Coordinator Center Program.

Form/OMB No.: 0990-New.

Use: The Department of Health and Human Services Office on Women's Health (OWH) is seeking clearance to conduct data collection efforts as part of the National Evaluation of the Rural/Frontier Coordinating Center (RFCC) program. The Office on Women's Health funded the creation of three RFCCs in September 2004, and awarded eight additional RFCC contracts in fiscal year 2005. The impetus for creating the RFCCs was to identify, coordinate, and leverage the network of existing resources to provide a full range of culturally and linguistically appropriate health services to women and their families. To effectively meet the numerous health care needs of this diverse population, rural health providers must not only offer comprehensive health care services but also integrate these services to maximize awareness, access, and quality. RFCCs were created to accomplish this task. Evaluating the effectiveness of RFCCs is essential for determining whether these centers are the best vehicles for coordinating and leveraging new and existing resources for women's health in rural and frontier communities. The OWH is seeking to evaluate all eleven RFCCs. This evaluation will also enable the OWH to determine *how well* RFCCs are facilitating access to integrated and comprehensive primary care services to women and their families residing in rural and frontier regions of the U.S.

Frequency: Report on Occasion.

Affected Public: Not-for-profit institutions.
Annual Number of Respondents: 833.
Total Annual Responses: 833.
Average Burden per Response: 34 minutes.

Total Annual Hours: 472.
 To obtain copies of the supporting statement and any related forms for the proposed paperwork collections referenced above, e-mail your request, including your address, phone number, OMB number, and OS document identifier, to *Sherette.funncoleman@hhs.gov*, or call the Reports Clearance Office on (202) 690-6162. Proposed Data Collections Submitted for Public Comment and Recommendations

In compliance with the requirement of Section 3506(c)(2)(A) of the Paperwork Reduction Act of 1995 for opportunity for public comment on proposed data collection projects, the Centers for Disease Control and Prevention (CDC) will publish periodic summaries of proposed projects. To

request more information on the proposed projects or to obtain a copy of the data collection plans and instruments, call 404-639-5960 and send comments to Joan Karr, CDC Acting Reports Clearance Officer, 1600 Clifton Road, MS-D74, Atlanta, GA 30333 or send an e-mail to *omb@cdc.gov*.

Comments are invited on: (a) Whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information shall have practical utility; (b) the accuracy of the agency's estimate of the burden of the proposed collection of information; (c) ways to enhance the quality, utility, and clarity of the information to be collected; and (d) ways to minimize the burden of the collection of information on respondents, including through the use of automated collection techniques or other forms of information technology. Written comments should be received within 60 days of this notice.

Proposed Project

Experimental and Theoretical Study of Early Detection and Isolation of Influenza—NEW—The National Institute for Occupational Safety and Health (NIOSH), Centers for Disease Control and Prevention (CDC).

Background and Brief Description

The Federal Occupational Safety and Health Act of 1970, section 501, enables NIOSH to carry out research relevant to the health and safety of workers. Some diseases like influenza and Severe Acute Respiratory Syndrome (SARS) can be spread when people produce clouds of droplets (called aerosols) by coughing or sneezing. Aerosol transmission of infectious diseases is of particular interest today because of increased concern over a possible global influenza pandemic. The possible airborne spread of influenza is especially important to health-care workers and emergency responders, who face a much greater risk of

exposure than does the general public. However, substantial gaps exist in our understanding of the generation and spread of infectious aerosols containing influenza. This lack of information hampers the ability of health scientists to model and predict the transmission of influenza by airborne particles and to understand whether or not aerosols are likely to be an important route of transmission of influenza during a pandemic.

The purpose of this study is to gain a better understanding of the production and dissemination of aerosols containing the influenza virus. The results of this research will give scientists and health professional's greater insight into the airborne transmission of influenza and allow them to better assess the potential effectiveness of preventive measures.

The first part of this study will measure the quantity and size distribution of aerosol droplets produced by people with influenza when they cough. To accomplish this, volunteers with influenza-like illness will be asked to provide an oral swab for influenza testing, and then will cough into a spirometer. The aerosol produced by each person will be measured using commercially-available instrumentation. The oral swabs will be processed after the aerosol experiments are completed.

The second part of this study will determine the amount and size of airborne particles containing influenza virus that are present in a hospital emergency department during influenza season. Health care workers will be recruited to wear small aerosol collection devices as they go about their normal duties. The collected samples will then be analyzed for influenza virus. Adult patients in the emergency department with influenza-like illness will be asked to provide an oral swab to test for the flu virus in order to estimate the number of potential sources of viral-laden airborne particles. There will be no costs to study participants other than their time.

ESTIMATED ANNUALIZED BURDEN HOURS

Respondents	Number of respondents	Number of responses per respondent	Average burden per response (in hours)	Total burden (in hours)
Part 1 participants	40	2	1	80
Part 2 health care workers	30	1	1	30
Part 2 patients	15	1	0.5	8.0
Total	118
