**II. Background**

*A. What Action is the Agency Taking?*

EPA is releasing for public comment its human health and environmental fate and effects risk assessments, and related documents for dichlorprop-p, a phenoxy pesticide, and soliciting public comment on risk management ideas or proposals. Dichlorprop-p is a post emergence herbicide frequently co-formulated with other phenoxy herbicides. Dichlorprop-p is used for the management of annual and perennial broadleaf weeds and brush control in ornamental turf (i.e. golf courses, cemeteries, parks, sports fields, turf, residential lawns) and woody plant control in non-crop areas (i.e. rights-of-way, firebreaks, fence rows, forests, and industrial sites). EPA developed the risk assessments and risk characterization for dichlorprop-p through a modified version of its public process for making pesticide reregistration eligibility decisions. Through these programs, EPA is ensuring that pesticides meet current standards under the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA) and the Federal Food, Drug, and Cosmetic Act (FFDCA), as amended by the Food Quality Protection Act of 1996 (FQPA).

EPA is providing an opportunity, through this notice, for interested parties to provide comments and input on the Agency's risk assessments for dichlorprop-p. Such comments and input could address, for example, the availability of additional data to further refine the risk assessments, such as typical use rate data, or could address the Agency's risk assessment methodologies and assumptions as applied to this specific pesticide.

Through this notice, EPA also is providing an opportunity for interested parties to provide risk management proposals or otherwise comment on risk management for dichlorprop-p. Risks of concern associated with the use of dichlorprop-p are potential effects to some terrestrial and aquatic organisms. In targeting these risks of concern, the

Agency solicits information on effective and practical risk reduction measures.

EPA seeks to achieve environmental justice, the fair treatment and meaningful involvement of all people, regardless of race, color, national origin, or income, in the development, implementation, and enforcement of environmental laws, regulations, and policies. To help address potential environmental justice issues, the Agency seeks information on any groups or segments of the population who, as a result of their location, cultural practices, or other factors, may have atypical, unusually high exposure to dichlorprop-p, compared to the general population.

EPA is applying the principles of public participation to all pesticides undergoing reregistration. The Agency's Pesticide Tolerance Reassessment and Reregistration; Public Participation Process, published in the **Federal Register** on May 14, 2004 (69 FR 26819)(FRL-7357-9), explains that in conducting these programs, the Agency is tailoring its public participation process to be commensurate with the level of risk, extent of use, complexity of the issues, and degree of public concern associated with each pesticide. For dichlorprop-p, a modified, 4-Phase process with 1 comment period and ample opportunity for public consultation seems appropriate in view of its few complex issues. However, if as a result of comments received during this comment period EPA finds that additional issues warranting further discussion are raised, the Agency may lengthen the process and include a second comment period, as needed.

All comments should be submitted using the methods in **ADDRESSES**, and must be received by EPA on or before the closing date. Comments will become part of the Agency Docket for dichlorprop-p. Comments received after the close of the comment period will be marked "late." EPA is not required to consider these late comments.

*B. What is the Agency's Authority for Taking this Action?*

Section 4(g)(2) of FIFRA as amended directs that, after submission of all data concerning a pesticide active ingredient, "the Administrator shall determine whether pesticides containing such active ingredient are eligible for reregistration," before calling in product-specific data on individual end-use products and either reregistering products or taking other "appropriate regulatory action."

*Needs and Uses:* The Commission is seeking emergency processing of this information collection by May 8, 2007.

This collection is part of the Commission's on-going review of its media ownership rules. This review began in June 2006 when the Commission opened a new phase of a rulemaking proceeding that concerns its major broadcast ownership rules.

In July 2006 the Commission began to seek comment on how to address the issues raised by the opinion of the U.S. Court of Appeals for the Third Circuit in *Prometheus v. FCC* and on whether the media ownership rules are "necessary in the public interest as the result of competition." The Commission has six broadcast ownership rules (the national television multiple ownership rule, the local television multiple ownership rule, the radio/television cross-ownership rule, the dual network rule, the local radio ownership rule, and the newspaper/broadcast cross-ownership rule) that the public was invited to comment on.

The Commission particularly asked commenters to address the impact of various ownership rules on minorities, women, and small businesses. We also urged commenters to discuss the potential effects, if any, of the broadcast ownership rules currently in effect, and the effect of any changes on advertising markets, the ability of independent stations to compete, the availability of family-friendly and children's programming, the amount of indecent and/or violent content broadcast over-the-air, and the availability of independent programming.

Congress has also indicated a high level of interest in the topic of media ownership. One evidence of this is an August 1, 2006, letter to Chairman Martin that was signed by 84 members of the House of Representatives. These members expressed their view that "access to diverse sources of information is necessary to maintain the informed citizenry that is crucial to a functioning democracy." And, they encouraged the Commission "to invite the greatest level of public participation possible in your deliberation of new ownership rules." To do this the Commission decided to hold public hearings on this topic and conducted such hearings in Los Angeles (October 2006), Nashville (December 2006), Harrisburg, PA (February 2007). A public hearing will be held in Tampa on April 30, 2007, and additional public meetings are also planned.

Finally, to supplement the information received from the public and Congress, the Commission also decided (November 2006) to sponsor ten economic studies on media ownership rules. This information collection relates to the first of these studies—"How People Get News and Information." This study will be conducted by Nielsen Media Research under contract to the Commission. It will be conducted as a phone survey of 3,000 consumers and will ask questions about their use of media. It will identify consumers' primary, secondary, and tertiary sources of news and information; whether these sources change depending on the time of day or day of the week; and the frequency with which consumers access these sources.

Understanding whether consumers rely most heavily on traditional broadcast and print media outlets versus newer media sources such as the Internet will help the Commission fully understand the realities of today's market. This will allow the Commission, the Administration, and Congress to make decisions on media ownership based on current, on-the-ground realities and not on old
