

and Order protects the specific location of incumbent BRS licensees' end-user/subscriber equipment, customer names, addresses and contact for purpose of relocation, which could raise competitive concerns. The Commission's rules permit parties filing information with the Commission to request confidential treatment of that information under 47 CFR 0.459.

*Needs and Uses:* The Commission will submit this information collection to OMB as a revision during this comment period to obtain the full three-year clearance from them. The Commission has changed the number of respondents, total annual burden hours and annual costs.

The Commission adopted and released a Ninth Report and Order in FCC 06-45, ET Docket No. 00-258 and WT Docket No. 02-353 which adopted disclosures related to negotiation and relocation of incumbent Fixed Microwave Service (FS) radio links and incumbent Broadband Radio Service (BRS) systems, and for the registration of these relocation expenses with a clearinghouse, including documentation of reimbursable costs for FS and BRS relocations, documentation when a new Advanced Wireless Services (AWS) and Mobile Satellite Service Ancillary Terrestrial Components (MSS/ATC) operators trigger a cost-sharing obligation, prior coordination notices to identify when a specific site will trigger a cost-sharing obligation, and retention of records by the clearinghouses.

Privately administered clearinghouses, selected by the FCC, will keep track of and administer the cost sharing obligations over the next 10-15 years as AWS and MSS-ATC operators build new stations that require them to relocate incumbents.

In a Public Notice issued jointly with the National Telecommunications and Information Administration (NTIA), the FCC sets forth procedures for AWS licensees to coordinate with Federal Government operators in the 1.7 GHz band, and AWS licenses are granted with a special condition that requires coordination with Federal operators.
