**SUPPLEMENTARY INFORMATION:** The FEIS integrates analyses and consultation required by the National Environmental Policy Act (NEPA), Section 10 of the Rivers and Harbors Act of 1899, Section 401 and Section 404 of the Clean Water Act, Section 7 of the Endangered Species Act, the Clean Air Act, the U.S. Fish and Wildlife Coordination Act, Section 106 of the National Historic Preservation Act, and the Magnuson-Stevens Fishery Conservation and Management Act. All appropriate documentation (i.e., Section 7 and Section 106 coordination letters and public and agency comments) have been obtained and are included as part of the FEIS. In compliance with the Clean Air Act, a Draft Air Quality General Conformity Determination has been completed and is available in the FEIS for public comment. The USACE has preliminarily determined that the General Conformity Analysis prepared for the proposed Masonville Dredged Material Containment Facility (DMCF) dated November 17, 2006, with the compensation proposed, conforms to the General Conformity requirements of the Clean Air Act. A final determination will be made no sooner than thirty (30) days from the date of this notice. The decision on whether or not to issue a Department of the Army permit for this project will be based on an evaluation of the probable impact, including cumulative impacts, of the proposed activity on the public interest. That decision will reflect the national concern for both protection and utilization of important resources. The benefit, which may reasonably be expected to accrue from the proposal, will be balanced against it reasonably foreseeable detriments. All factors that may be relevant to the proposal are considered as part of the evaluation process. Factors relevant to the proposed project include: Conservation, economics, aesthetics, general environmental concerns, wetlands, cultural values, fish and wildlife values, flood hazards, floodplain values, land use, navigation, shoreline erosion and accretion, recreation, water supply and conservation, water and air quality, hazardous, toxic, and radioactive substances, threatened and endangered species, regional geology energy needs, food and fiber production, safety,

environmental justice, cumulative impacts and the general needs and welfare of the public.
