information about the electronic docket, go to www.regulations.gov.

Title: National Oil and Hazardous Substances Pollution Contingency Plan (Renewal).

ICR Numbers: EPA ICR Number 1664.06, OMB Control Number 2050–0141.

ICR Status: This ICR is scheduled to expire on June 30, 2007. Under OMB regulations, the Agency may continue to conduct or sponsor the collection of information while this submission is pending at OMB. An Agency may not conduct or sponsor, and a person is not required to respond to, a collection of information, unless it displays a currently valid OMB control number. The OMB control numbers for EPA's regulations in title 40 of the CFR, after appearing in the Federal Register when approved, are listed in 40 CFR part 9, and displayed either by publication in the **Federal Register** or by other appropriate means, such as on the related collection instrument or form, if applicable. The display of OMB control numbers in certain EPA regulations is consolidated in 40 CFR part 9.

Abstract: This Information Collection Request (ICR) renewal supports activities to implement the National Oil and Hazardous Substances Pollution Contingency Plan (NCP), Subpart J (40 CFR 300.900), "Use of Dispersants and Other Chemicals." Subpart J requirements include criteria for listing oil spill mitigating agents on the NCP Product Schedule. Under Subpart J, respondents who want to add a product to the Schedule must submit technical product data to the U.S. Environmental Protection Agency. Specifically, Subpart J requires the manufacturer to conduct specific toxicity and effectiveness tests and submit the corresponding technical product data along with other detailed information to the EPA Office of Emergency Management. EPA uses product information when responding to oil spills in accordance with the NCP.

Burden Statement: The annual public reporting and recordkeeping burden for this collection of information is estimated to average 26 hours per response. Burden means the total time, effort, or financial resources expended by persons to generate, maintain, retain, or disclose or provide information to or for a Federal agency. This includes the time needed to review instructions; develop, acquire, install, and utilize technology and systems for the purposes of collecting, validating, and verifying information, processing and maintaining information, and disclosing and providing information; adjust the existing ways to comply with any previously applicable instructions and

requirements which have subsequently changed; train personnel to be able to respond to a collection of information; search data sources; complete and review the collection of information; and transmit or otherwise disclose the information.

Respondents/Affected Entities:
Entities potentially affected by this include, but are not limited to, manufacturers of bioremediation agents, dispersants, surface collecting agents, surface washing agents and other chemical agents and biological additives used as countermeasures against oil spills.

Estimated Number of Respondents: 14.

Frequency of Response: On occasion. Estimated Total Annual Hour Burden: 390 hours.

Estimated Total Annual Cost: \$100,493, which comprises an estimated \$17,693 in labor costs and \$82,800 for operating & maintenance costs. There are no startup/capital costs.

Changes in the Estimates: EPA does not anticipate any changes in the annual burden hours or capital and O&M costs under this ICR renewal.

Dated: May 14, 2007.

Sara Hisel-McCoy,

Acting Director, Collection Strategies Division.

EXPORT-IMPORT BANK

Economic Impact Policy

This notice is to inform the public that the Export-Import Bank of the United States has received an application to guarantee approximately \$54 in commercial bank financing for the export of approximately \$54 million in U.S. equipment and services to a hot briquetted iron (HBI) plant in Russia. This project is not associated with an increase in steel production capacity. The U.S. exports will enable the facility to produce approximately 1.4 million metric tons of HBI as a steel scrap substitute. Initial production of HBI at this facility is expected to commence in 2008.

Available information indicates that the HBI will be consumed primarily in the Ukraine, with smaller amounts being consumed in Russia and Holland. Interested parties may submit comments on this transaction by e-mail to xeconomic.impact@exim.gov or by mail to 811 Vermont Avenue, NW., Room 1238, Washington, DC 20571, within 14

days of the date this notice appears in the **Federal Register**.
